PRESENTANCE OF VTB GROUP BANKING AND INVESTMENT-BANKING BUSINESS

1.7 thousand
VTB GROUP BRANCH NETWORK IN RUSSIA
VTB Group Today

MISSION
We help people to make their plans a reality by creating the best financial solutions. We are a team of professionals, working for the benefit of our customers and the country as a whole.

IDENTITY
VTB Group is the leading Russian financial institution with a strong presence in key international markets.

VISION
A universal financial group that is developing both dynamically and sustainably, one that is focused on being the first-choice financial partner for its customers, and which provides the most convenient and cutting edge solutions to their needs.

VALUES
WE VALUE OUR CUSTOMERS
We put our customer needs first. We trust our customers and strive to earn their trust. We listen to our customers and act upon their feedback.

WE WORK AS A TEAM
We respect and trust each other. We support each other and help our colleagues grow. We achieve common goals.

WE ARE RESPONSIBLE FOR OUR RESULTS
We are result-, not process-oriented. Each of us is responsible for our contribution to the common goals. We openly discuss our successes and failures.

WE ARE PROACTIVE
We are not indifferent to what we are doing. We contribute proactively when dealing with shared tasks. We go beyond our formal duties.

WE CONTINUOUSLY IMPROVE OUR PERFORMANCE
We are open to change. We start change with ourselves. We have no fear to experiment.

In Russia, the Group performs banking operations through a parent company (VTB Bank) and a number of subsidiary banks – Vozrozhdenie Bank, West Siberian Commercial Bank, Sarovbusinessbank – as well as through the Post Bank joint venture. As of the end of 2019, the Group’s banking and investment banking business was active in 18 countries around the world. Outside Russia, the Group operates through eight subsidiary banks located in Germany, the United Kingdom, Armenia, Belarus, Kazakhstan, Azerbaijan, Georgia and Angola and through two representative offices located in Italy and China, as well as two VTB branches in China and India, a branch of VTB Bank (Europe) in Austria and a branch of VTB Capital in Singapore. The Group’s investment banking division conducts operations with securities and provides financial advisory services in Hong Kong, while also conducting investment banking services in Bulgaria and offering commodities financing in Switzerland. The Group also has an associated bank in Cyprus. In addition, VRB Bank, a joint venture between VTB and a Vietnamese bank, conducts banking activities in Vietnam. The Group operates in all major segments of the financial market: Corporate-investment Business, Medium and Small Business and Retail Business are the Group’s global business lines, which specialise in servicing various client segments.

VTB GROUP’S PRESENCE

VTB Group includes Russian and foreign commercial banks as well as financial companies. VTB Group is structured as a holding company, which envisages a unified strategy for the development of Group companies, a single brand, centralised financial management and risk management and unified control systems.

VTB GROUP’S GLOBAL NETWORK IS UNIQUE TO THE RUSSIAN BANKING INDUSTRY

Group companies provide services in the CIS, Europe and Asia, enabling the Group to facilitate international partnerships and promote Russian companies aiming to engage with global markets. The Group’s international operations enable diversification and increased profitability from its transactions in high-margin markets.

AS OF THE END OF 2019, THE GROUP’S BANKING AND INVESTMENT BANKING BUSINESS WAS ACTIVE IN

18 COUNTRIES AROUND THE WORLD
In January 2019, Sarovbusinessbank and West Siberian Commercial Bank were included in VTB Group consolidation perimeter.

KEY CHANGES IN THE STRUCTURE OF VTB GROUP IN 2019

According to VTB Bank’s Development Strategy, one of its key priorities is to strengthen the positions of VTB Group banks in the retail banking market and to attract customer deposits.

In an effort to achieve this, VTB Bank acquired West Siberian Commercial Bank and Sarovbusinessbank in January 2019.

• Sarovbusinessbank is one of the leading banks in the Nizhny Novgorod region. VTB’s acquisition of Sarovbusinessbank enabled the Group to increase its base of active retail clients in the Nizhny Novgorod region (about 183 thousand active retail clients) and to greatly increase its market share in the region in terms of retail deposits and retail lending.

• West Siberian Commercial Bank is one of the leading banks in the Tyumen region and also has a significant presence in the Yamalo-Nenets and Khanty-Mansi autonomous districts (333 thousand active retail clients). With these acquisitions, VTB Group bolstered its branch network in the Nizhny Novgorod and Tyumen regions, its base of salary clients (more than 314 thousand individual salary clients) and its client base among small and medium-sized enterprises (SME) (about 24 thousand SME clients).

During the reporting year, VTB Bank worked on the integration of West Siberian Commercial Bank and Sarovbusinessbank, as well as Vozrozhdenie Bank, which was acquired in 2018, into VTB Group. These efforts included the following:

- Technical and legal concepts were prepared for the integration;
- Corporate actions were taken to buy back shares from minority shareholders in accordance with legal requirements;
- The management teams at subsidiary banks were strengthened (representatives of VTB Bank joined the banks’ Boards of Directors and Management Boards);
- VTB Group’s standards for client segmentation, financial reporting and business planning were introduced;
- An analysis was carried regarding the support and control processes for further alignment with VTB standards.
VTB GROUP’S COMPETITIVE ADVANTAGES
Enable the Group to support and strengthen its market positions

- Strong market positions in Russia – a leading, systemically important bank, holds a significant share of the banking system’s total customer accounts and deposits and total assets
- With an expansive international network, the Group has a unique opportunity to serve Russian clients across the globe
- Strong relationships with leading Russian companies in key economy industries
- Has a large branch network and a broad client base
- A diversified universal banking business with significant market shares in various segments of the Russian market
- Corporate-Investment Business division VTB Capital provides a full range of services in international financial markets
- Leading positions in retail banking services, a leader in the market of investment products for individuals
- Strong relationships with leading Russian companies in key economy industries
- Sizeable capital creates potential for sustainable asset growth and enables the Bank to finance large companies
- Brand awareness and state interest ensure financial strength and increased customer confidence
- A professional team with a client-oriented approach

VTB GROUP CLIENTS

1.9 thousand groups of companies of Corporate-Investment Business segment
513 thousand companies of Medium and Small Business segment
13.3 million clients of Retail Business segment
VTB Bank shares are included in Moscow Exchange’s Level 1 list and are included in the Moscow Exchange and RTS Index, as well as the Subindex, the MOEX 10 Index, the Broader Market Index, the Finance Index, the RTS Finance Index and the RTS Broad Market Index.

Ordinary shares are also included in the international MSCI Russia Index and the MSCI EM Index.

VTB Bank’s GDRs are included in the FTSE All-World Index, FTSE EMEA Index and MVIS Russia Index.

Each GDR is equivalent to 2 thousand of VTB ordinary shares.

VTB Bank’s GDRs are included in the FTSE All-World Index, FTSE EMEA Index and MVIS Russia Index.

1. Indicators for the years of 2015–2018 are presented as published in the IFRS accounts for the relative period with no further adjustments or reclassifications.  
2. The P&L components have been compared with modified financial results for 2018 for purposes of accuracy of the year-on-year analysis (not including operational results of Post Bank, Multicarta, VTB Bank (Ukraine) and VTB Bank (Belgrade)).
Statement of the Chairman of the Supervisory Council

Dear shareholders, clients, and partners,

In 2019, VTB Group strengthened its position as Russian leading financial institution: profitability targets were met, and significant progress was achieved across all aspects of the Bank’s Development Strategy.

The Group’s results are undoubtedly positive. IFRS net profit exceeded RUB 200 billion. The number and quality of remote services available to individuals increased, the range of services for businesses was expanded, and the investment services platform was improved. We saw better-than-market mortgage sales and increased market share in retail deposits by 110 b.p. to 15.1%. While maintaining excellent positions in terms of corporate lending, the Group focused on small and medium-sized enterprises, a segment that is extremely important for the national economy.

Important steps were taken to further the Bank’s digitalisation and technological transformation. The Group launched a number of important projects in its Retail Business in 2019 in an effort to further improve customer service. VTB Bank was one of the first banks to start using the Bank of Russia’s Faster Payments System. In addition, a biometric platform was launched that can identify Bank’s customers through facial and voice recognition. A digital mortgage project was also implemented, which enables customers to carry out a number of operations remotely through the VTB’s mobile application.

VTB’s practice of maintaining a constructive dialogue with shareholders and representatives of the investment community is recognised as one of the best in Russia, and the Supervisory Council pays special attention to relations with shareholders. For example, the Bank’s Development Strategy includes major proposals on the part of minority shareholders. These steps have enabled the Bank to maintain a consistently high National Corporate Governance Rating.

Today, the rapidly changing landscape in the banking business poses new challenges for VTB. The Group’s Development Strategy for 2019–2022, which was approved by VTB’s Supervisory Council last year, was one of the main drivers behind the Group’s positive results in 2019, while also providing guidelines for operating in the new business environment.

The priority areas covered in the new Strategy include healthy growth in the banking business, a strengthened focus on customer interests, as well as the accelerated introduction of advanced technologies. The achievement of these objectives will enable the Group to meet its target of RUB 300 billion in net profit in 2022.

In 2019, an external assessment of the work of the Supervisory Council was conducted for the first time. The assessment concluded that the Supervisory Council was highly engaged in decision-making on key issues concerning the Bank’s operations. At the same time, the assessment highlighted areas where the activities of both the Supervisory Council itself and its committees could be improved. The necessary changes will be implemented starting this year.

I am certain that the Group’s Development Strategy, approved by the Supervisory Council, will take not only our business to a new level but also the Russian financial services sector as a whole, making it more technology-driven and customer-oriented.

I would like to express my gratitude to VTB’s shareholders, clients and partners for their support and high degree of trust. In the future, the Bank will do everything necessary not just to meet your expectations but to exceed them and to achieve success together, while working for the good of society and the prosperity of our country.

Sincerely,

Anton Siluanov
Chairman of the Supervisory Council
Net profit amounted to RUB 201 billion, an increase of 13 % year-on-year. This increase was driven by organic business growth and improving balance sheet structure thanks to better asset quality.

In 2019, the Group’s net profit amounted to RUB 201.2 billion, which was 12.9 % higher year-on-year and in line with our target. Profit growth was the result of higher fee and commission income and improved asset quality. Another factor behind the improvement in our operating metrics was lower provision thanks to higher asset quality. On the back of increased net profit, return on equity increased to 12.8 %.

VTB Group’s retail loan portfolio demonstrated excellent growth during the reporting period, increasing by 13 % to RUB 3.4 trillion. VTB was one of the few banks to increase mortgage volumes in 2019. As of the end of the year, our housing loan portfolio amounted to RUB 1.6 trillion, while the total volume of mortgage loans amounted to RUB 712 billion – an all-time record for VTB Group. In 2019, VTB issued one out of every four mortgage loans in Russia, around 1.4 million families were able to purchase housing with our help.

Our corporate loan portfolio decreased by 4 % in 2019, mainly as a result of a series of large repayments. At the same time, our loan portfolio in the Medium and Small Business segment grew by 10 % over the year. VTB Group offers affordable financing, high-quality service, and advanced digital solutions for SME throughout Russia. Last year, we continued to develop remote banking channels and services that allow entrepreneurs to save significant time and manage their business effectively.

The Group continued to increase the share of Retail Business in its liabilities. In 2019, retail deposits grew by 14 % to RUB 5.0 trillion, increasing at a rate twice as fast as to the Russian banking sector overall. Corporate deposits remained virtually unchanged over the year, amounting to RUB 5.9 trillion as of 31 December 2019. Our faster-than-market growth in client funding enabled us to improve the stability of our balance sheet structure: our loans-to-deposits ratio decreased to 98.2 % over the year.

In 2019, our main banking revenues increased by 5 %. At the same time, despite a lower net interest margin, which began to recover only in the second half of the year, we were able to – through the continued optimisation of our balance sheet structure – maintain a net interest income at 2018 levels. In addition, excellent growth in cross-sales enabled us to achieve a considerable increase of 29.2 % in net fee and commission income.

In 2019, we were able to improve the quality of our assets: the share of non-performing loans in our total loan portfolio decreased by 100 b.p. year-on-year to 4.7 %. We also saw declines in the cost of risk and provision charge, which amounted to RUB 92.2 billion, down 38 % year-on-year. The NPL coverage ratio increased to 128.7 % at the end of 2019, compared with 112.6 % a year earlier. Last year, staff costs and administrative expenses increased by 12.6 % year-on-year, while the cost to income ratio was 41.6 %, which indicates a high degree of operational efficiency. The substantial investments in infrastructure and competences that we made in 2019 will serve as a good basis for further growth in productivity.

In 2019, we greatly improved our positions in retail and in servicing small and medium-sized businesses; we saw significant development in retail investment products, and we also maintained a leading position in the corporate-investment business.

In 2019, VTB consolidated its leadership in the corporate-investment business: VTB Capital was named the best investment bank in emerging markets for the third year in a row and was also recognised as the leading bookrunner in Russia, the CIS and Eastern Europe. We continued to arrange financing for regional and federal projects in the areas of social infrastructure, road construction and railway infrastructure, as well as innovative and high-tech projects in the real sector of the Russian economy.

We also continued to provide investment services for individuals. VTB Capital investments, a retail broker, became a recognised leader in the Russian market, having made a qualitative breakthrough in attracting new customers to the stock market, with its client base growing by 15 % in 2019 to more than 700 thousand. The number of active clients using the VTB My Investments mobile platform increased sixfold to more than 170 thousand; the total volume of transactions exceeded RUB 2 trillion. The quality and appeal of VTB mutual funds followed suit: last year, investors placed RUB 49.5 billion with VTB Capital Management’s mutual funds. This was about half of the funds raised by all market players in Russia.

Our 2019–2022 Development Strategy is based on VTB Group’s vision as a dynamically and steadily growing universal financial company that is designed to be the first-choice financial partner for our customers, meeting their needs in the most convenient manner possible and using the most advanced tools available.

Last year marked an important stage in the development of VTB Group: we successfully completed implementation of our 2017–2019 Development Strategy, and we embarked on a path towards increasing return on equity: we met all of our priority targets in terms of business volumes and market positions. The integration of the Group’s main subsidiaries was our top priority in the previous strategic cycle. The banking market has shifted to a new development paradigm: the market...
is increasingly turning towards digitalisation, and all processes can be carried out much more quickly, while competition for customers is increasing and the traditional banking business is becoming less profitable. This demands a different business model; adaptation to ongoing tasks and challenges, customer-centricity and a detailed understanding of the client’s needs, as well as timely responses to changes are critical aspects of interaction and a real competitive advantage. All these aspects form new growth points for us.

Under these conditions, we adopted a new Development Strategy, including an updated mission, vision and values, in accordance with which VTB Group identified three key development priorities to 2022. The first priority is an increased focus on clients’ transactional operations, support for daily operations, payments and transfers. Another key strategic focus is the optimisation of funding costs. With the goal of maintaining our leadership in the corporate segment, we plan to continue to increase our retail customer base to 18 million and to double our customer base of the Medium and Small Business.

In 2019, the Group dramatically reorganised and restructured its IT function. In a short time frame, we conducted a detailed audit of our entire IT landscape, infrastructure, production process and project management and switched to a new format for change management, i.e., through programmes. We focused on improving the stability and reliability of our IT systems and our entire IT infrastructure, upgrading origination conveyors to accelerate bringing in new customers and to improve the quality of our loan portfolio and the speed of decision-making by using advanced technologies for data analysis and modelling. In addition, recognising the importance of working with data, we began building an updated data platform and creating an advanced analytics laboratory to fully utilise the competitive advantages of our existing customer base and to attract new customers.

Programmes were launched for the purpose of digitalising banking support processes and increasing the speed of decision-making, as well as introducing an approach to assessing credit risk based on internal ratings.

I would also highlight our work on building an omnichannel platform, which should become the flagship of our digitalisation process and should also create additional competitive advantages through, first of all, a new customer experience – convenient, high-quality, reliable and secure service for our customers – and through the quick rollout of new client services and products, integration with partners, a state-of-the-art IT landscape and the application of advanced technologies. All this will be created in accordance with a new IT process involving cross-functional teams – close interaction between IT and business and functional customers.

Our responsibility to the public drives all our actions and strategic priorities. With the adoption of VTB Group’s new Development Strategy to 2022, we began the comprehensive implementation of sustainable development principles in our activities. The Group’s updated strategy, mission and values are aligned with the UN Sustainable Development Goals and are contributing to the implementation of all 17 goals that all UN-member states agreed to achieve by 2030.

In 2019, we identified eight priority goals that VTB will contribute to through its core business.

Our achievements in the past year established a solid foundation for responding to the serious challenges that 2020 has brought. Thanks to our considerable safety buffer, VTB Group continues to expand its business and increase the speed of internal transformations, and we are ready to use the opportunities that are arising to further strengthen our market position. I would like to thank the entire VTB team – a large but tight-knit group – for their hard work, their readiness for change and their desire for continuous improvement, as well as our shareholders, customers and partners for their trust in us. Our goal is to live up to that trust. Together, we will continue to work for the good of society, while playing a role in the successful development of our country.

In 2019, we identified 8 priority goals that VTB will contribute to through its core business.

Sincerely,

Andrey Kostin

Andrey Kostin
The Russian economy grew by 1.3% in 2019. The largest driver of growth was household final consumption expenditure, which increased by 2.3% in 2019.

In 2018–2019, the structure of economic growth from the demand perspective was shaped by the Ministry of Finance of the Russian Federation budget rule1: the real effective exchange rate decreased by 7.7% in 2018 and increased by 2.5% in 2019 despite an increase in the price of oil in 2018 and a decrease in 2019.

As a result, exports fell by 2.2% in 2019, while imports expanded by 2.2%.

From the point of view of industrial GDP, the financial sector (+9.7%) was the biggest contributor to economic growth in 2019 thanks to higher retail and corporate lending, followed by industrial production (+2.4%) and wholesale and retail trade (+1.7%). Industrial production increased in 2019 thanks to growth in mining (+3.1%) and manufacturing (+2.3%).

An increase in the VAT rate sped up inflation at the beginning of the year (+5.3% year-on-year in March) before slowing to +3.0% year-on-year by the end of the year. Two main factors contributed to the slowdown in inflation: an increase in supply in some food markets (in meat, fruits and vegetables in particular) and a stronger rouble, which slowed inflation for non-food products.

Slower-than-expected growth in prices led the Bank of Russia to lower its key rate from 7.75% at the beginning of 2019 to 6.00% at the beginning of 2020.

OIL PRICE AND EXCHANGE RATES

In addition, economic growth was supported by a 1.4% increase in gross fixed capital formation and by a 2.8% increase in government spending.

Household demand was supported by solid real wage growth and the expansion of retail lending. Real wages increased by 2.9% in 2019, accelerating in December to 6.9% year-on-year. The higher pace of growth in real wages was partly due to a slowdown in consumer inflation, though it was to a large degree attributable to an increase in companies’ net profit: in 2019, companies’ net profit increased by 17.5% from RUB 13.4 trillion to RUB 15.8 trillion2.

On the whole, consumer confidence matched growth in real wages, as it increased in the second half of 2019 amid an increase in wages and slower inflation. In 2019, retail sales grew by 1.6%, with more visible growth in the non-food segment.

An increase in the VAT rate sped up inflation at the beginning of the year (+5.3% year-on-year in March) before slowing to +3.0% year-on-year by the end of the year. Two main factors contributed to the slowdown in inflation: an increase in supply in some food markets (in meat, fruits and vegetables in particular) and a stronger rouble, which slowed inflation for non-food products.

Slower-than-expected growth in prices led the Bank of Russia to lower its key rate from 7.75% at the beginning of 2019 to 6.00% at the beginning of 2020.

From the point of view of industrial GDP, the financial sector (+9.7%) was the biggest contributor to economic growth in 2019 thanks to higher retail and corporate lending, followed by industrial production (+2.4%) and wholesale and retail trade (+1.7%). Industrial production increased in 2019 thanks to growth in mining (+3.1%) and manufacturing (+2.3%).

Slower-than-expected growth in prices led the Bank of Russia to lower its key rate from 7.75% at the beginning of 2019 to 6.00% at the beginning of 2020.

Inflation and Bank of Russia Key Rate

Still, economic growth was supported by a 1.4% increase in gross fixed capital formation and by a 2.8% increase in government spending.

Household demand was supported by solid real wage growth and the expansion of retail lending. Real wages increased by 2.9% in 2019, accelerating in December to 6.9% year-on-year. The higher pace of growth in real wages was partly due to a slowdown in consumer inflation, though it was to a large degree attributable to an increase in companies’ net profit: in 2019, companies’ net profit increased by 17.5% from RUB 13.4 trillion to RUB 15.8 trillion2.

On the whole, consumer confidence matched growth in real wages, as it increased in the second half of 2019 amid an increase in wages and slower inflation. In 2019, retail sales grew by 1.6%, with more visible growth in the non-food segment.

From the point of view of industrial GDP, the financial sector (+9.7%) was the biggest contributor to economic growth in 2019 thanks to higher retail and corporate lending, followed by industrial production (+2.4%) and wholesale and retail trade (+1.7%). Industrial production increased in 2019 thanks to growth in mining (+3.1%) and manufacturing (+2.3%).

An increase in the VAT rate sped up inflation at the beginning of the year (+5.3% year-on-year in March) before slowing to +3.0% year-on-year by the end of the year. Two main factors contributed to the slowdown in inflation: an increase in supply in some food markets (in meat, fruits and vegetables in particular) and a stronger rouble, which slowed inflation for non-food products.

Slower-than-expected growth in prices led the Bank of Russia to lower its key rate from 7.75% at the beginning of 2019 to 6.00% at the beginning of 2020.
In 2019, growth in the Russian banking sector continued on the back of real GDP growth, a decrease in the key rate and the strengthening of the rouble against the US dollar. Asset growth slowed to 2.7% compared with a 10.4% increase a year earlier. At the same time, the penetration of banking services (the ratio of banks’ total assets to GDP) decreased by 2.4 p.p. for the year to 88%.

Growth in the loan portfolio was driven by demand amid lower interest rates on loans stemming from the Bank of Russia’s easing of monetary policy. At the same time, the measures taken by the regulator to cool growth in consumer lending had a visible effect, especially in the fourth quarter, when additional premiums were introduced on risk factors for unsecured consumer loans depending on the borrower’s debt load and the total cost of the loan. As a result, growth in retail lending slowed in the context of a stronger rouble and lower deposit rates. Corporate account balances increased by 1.2% compared with 14.1% in 2018, while term deposits increased by 7.3% (compared with 9.5% in 2018). During the year, the net loans-to-deposits ratio decreased by 2.2 p.p. to 74%. Banking sector debt to the Bank of Russia decreased by 6% to 2.8% of assets.

Corporate accounts and deposits remained an important source of funding, accounting for 72% of banks’ liabilities. At the same time, growth in mortgage lending was down to 16.8% (compared with 23.3% in 2018), while consumer lending increased by 19.7% (compared with 21.8% in 2018). Growth in the corporate portfolio was constrained by poor demand in the first half of the year and the appreciation of the rouble against the US dollar. By the end of the year, the portfolio had increased by 2.3% compared with 12.0% growth in 2018. The share of overdue loans in the corporate portfolio increased by 1.3 p.p. to 6.9%, while decreasing by 0.8 p.p. in the retail portfolio to 4.3%.

Profit before tax during 2019 increased by 52% to RUB 2.0 trillion, while net profit increased by 73% to RUB 1.7 trillion. At the same time, return on equity increased from 10.8% in 2018 to 17.6% in 2019. The number of unprofitable credit institutions decreased from 100 at the end of 2018 to 69. Profit growth boosted capital adequacy by 18 b.p. to 12.3%.
2019 KEY EVENTS

• VTB Bank merged its retail and corporate networks – the largest merger in the history of the Russian banking system and a logical continuation of the project successfully completed in 2018 to merge VTB24 with VTB Bank.

• VTB received a patent for a blockchain-based multi-issuer settlement and payment system – the Bank’s first-ever patent for its intellectual property. The technology will enable VTB to create digital products, services and payment instruments that provide a solution for the problem of accounting for reciprocal payments between a practically unlimited number of system participants.

• VTB Bank was named the winner in the Breakthrough of the Year in the Retail Financial Business category at the 12th annual Retail Finance Awards presented by The Retail Finance magazine for achievements in the financial business in Russia. Experts noted VTB Bank’s record-setting performance in terms of mortgages, lending, savings and commission products, as well as the VTB My Investments mobile application.

• A new VTB Group’s Development Strategy was adopted, which includes an updated mission, vision and values for the Group. The Group sets ambitious new goals, such as significantly improving its business model and achieving, by 2022, the net profit of more than RUB 300 billion with a return on equity of 15 %. The Group’s Strategy for 2019–2022 is built around three main priorities:
  – Healthy growth of the banking business, complemented by initiatives related to the digital economy;
  – A focus on customer interests and service quality;
  – New trends: increased efficiency, digitalisation and advanced technologies.

• VTB Bank was recognised as the best bank for trade and export finance in Eastern Europe according to the authoritative international publication Global Trade Review. The biggest international banks took part in the competition. The selection criteria were the volume and geography of completed transactions, as well as banks’ innovative approach to business and participation in projects of strategic importance. VTB’s unique experience in terms of servicing business contracts ensures an individual approach and offers the most advanced and most profitable solutions for the Bank’s clients.

• VTB Bank joined the Ministry of Economic Development's updated programme for preferential financing of small and medium-sized enterprises. The programme provides for the issuance of loans to SMEs at a rate of not more than 8.5 % per annum in 2019–2024, with subsequent subsidies for lending institutions from the federal budget.

• VTB Capital Investment was named the winner of the Runet Golden App 2018 mobile applications competition in the Best Investment App category. The competition was organised by the Russian Association of Electronic Communications. The VTB My Investments mobile app for private investors received the highest rating among projects by leading Russian companies.

• VTB launched a product factory and a digital factory for working with small and medium-sized enterprises to develop and introduce new high-tech products and services:
  – The product factory is aimed at the dynamic development of transactional and credit products for small and medium-sized enterprises. It will improve and accelerate the development of new proposals to meet every business need, and it will ensure that products are brought to market as quickly as possible;
  – The digital factory is responsible for the development of remote sales and the creation of a range of non-banking services for the Medium and Small Business segment. The objectives of the digital factory include the organisation of business processes related to remote sales, the introduction and development of non-banking services for entrepreneurs, the provision of state-of-the-art digital solutions for business, as well as the development of new digital communication channels.

• VTB was named the winner in the BREAKTHROUGH OF THE YEAR IN THE RETAIL FINANCIAL BUSINESS CATEGORY at the 12th annual Retail Finance Awards. The biggest international banks took part in the competition. The selection criteria were the volume and geography of completed transactions, as well as banks’ innovative approach to business and participation in projects of strategic importance. VTB’s unique experience in terms of servicing business contracts ensures an individual approach and offers the most advanced and most profitable solutions for the Bank’s clients.
• The Bank’s Annual General Meeting of Shareholders was held on 5 June and was attended by 2,348 shareholders and their representatives, including 740 who attended in person. The event was broadcasted online on VTB Bank’s website. For the convenience of shareholders, an e-voting system was available for use at the meeting.

• VTB Bank received an award for high-quality service, as it became one of the best-performing banks in the world in terms of having fewest fraudulent transactions involving Visa payment cards.

• VTB Bank completed a strategic project to build its own IT cloud: a unified platform for the flexible management of IT infrastructure was created, which made it possible to reduce the cost of IT resources and to speed up the provision of those resources.

• VTB Bank launched a virtual mobile operator, VTB Mobile, which uses Tele2’s radio access network and infrastructure. Users can choose a tariff depending on their minutes or internet data needs and communicate unlimited within the network. International roaming is available for users travelling abroad, it has special options to save money on calls and internet. Clients can also use bonuses that they receive in the Multibonus loyalty programme to pay for extra services. When connecting, a user can switch a network with keeping his phone number.

• VTB Bank received an award for high-quality service, as it became one of the best-performing banks in the world in terms of having fewest fraudulent transactions involving Visa payment cards.

• My Smart City application developed by VTB Bank was named THE BEST TECHNOLOGY PRODUCT OF THE YEAR by The Banker magazine.

• My Smart City application developed by VTB Bank was named THE BEST TECHNOLOGY PRODUCT OF THE YEAR by The Banker magazine.

• VTB Leasing was named THE LEASING COMPANY OF THE YEAR at the international Leader Leasing Awards.

Annual Report / 2019

THE VTB ACCELERATOR

was designed to search the market for ready-made innovative solutions that can reduce costs or bring the Bank additional profit through the creation of new products and services. Through the accelerator, pilots are quickly carried out to assess the potential business impact and technological feasibility of innovative solutions, and the best performers are scaled up. For its second intake, the VTB accelerator received 301 applications from five countries from technology companies that meet the Bank’s requirements.

VTB began connecting clients to its contactless payment service for smartphones. This is a SoftPOS mobile application that will completely replace classic POS terminals. The Bank provides acquiring services for the platform for self-employed Russians and for micro-enterprises. They can accept payment for their services without purchasing special equipment.

DECEMBER

VTB became the first bank in the market to issue a QR code payment service through the Faster Payments System in the VTB Online mobile application.

VTB became the first bank in the market to issue a mortgage loan through a VR mortgage service. When a client from Krasnoyarsk completed the purchase of an apartment in St. Petersburg using the service. The Bank’s VR mortgage service enables clients to use virtual reality goggles to evaluate all the features of a property. Including its location on a city map, infrastructure, layout and detailed potential room designs.

As part of its work with small and medium-sized enterprises, VTB launched a platform for non-banking services that allows entrepreneurs to hook up the services they need to automate their activities online. The new resource offers customers accounting and tax payment solutions, round-the-clock legal support for their business, and a package of services for taking their business online. In addition, entrepreneurs have access to a service that enables them to search for freelancers to find solutions to one-time business problems, trade management services, as well as express services for verifying counterparties and registering trademarks.

Global Finance recognised VTB as the best trade finance bank in Russia in 2019. The publication’s editorial board reached this conclusion based on an assessment of a number of indicators, including transaction volume; innovative products, services and technologies; and the quality of the services provided. In addition, the opinions of international analysts and experts in the field of trade finance were also taken into account in determining the winners. In 2019, VTB completed trade and export finance transactions in partnership with 75 international financial institutions from more than 50 countries. Transactions were carried out both in traditional industries – chemicals, transport, steelmaking, nuclear energy – and in new alternative industries, including solar and wind energy.

VIB is recognised as THE BEST TRADE FINANCE BANK IN RUSSIA by the Global Finance

NOVEMBER

2,500 visitors from 68 countries attracted the 11th annual Russia Calling! investment forum in Moscow

VTB Capital hosted the 11th annual Russia Calling! investment forum in Moscow. The event attracted more than 2,500 visitors, including more than 500 investors and foreign delegates from 68 countries, as well as government officials and heads of leading global corporations. Russian President Vladimir Putin addressed the forum’s plenary session.

With VTB’s involvement, the M-11 Moscow – St. Petersburg toll highway was opened. The highway was built through a public–private partnership. The construction of the last two sections of the highway – stages 7 and 8 – was completed on the basis of a concession agreement between the Government of the Russian Federation, represented by the state-owned company Avtodor, and Two Capitals Highway, which was established by VTB Capital investment bank and VINCI Highways. The agreement was concluded for 27 years: for the period of construction to 2019 and for the period of operation to 2041.

• VTB, as part of the second intake for the corporate accelerator it runs jointly with the Internet Initiatives Development Fund, launched 12 pilot projects with startups, including a borrower assessment service based on client behaviour data, remote verification of mobile services users, an interactive assistant for employee training and a platform to create virtual voice operators.

WE CHOOSE THE BEST PATH

2022 STRATEGY

- FOCUS ON CUSTOMER INTERESTS
- ROBUST BUSINESS GROWTH AND DEVELOPMENT OF DIGITAL ECONOMY INITIATIVES
- DIGITALISATION AND IMPROVED EFFICIENCY
STRATEGY

CONTEXT FOR THE DEVELOPMENT OF A NEW STRATEGY

VTB Group broadly met the key targets outlined in its Development Strategy for 2017–2019 ahead of schedule. The Group exceeded its targets in terms of return on equity, growth rates of its loan portfolio and customer funding. VTB Bank’s merger with VTB24 to create a single bank was the biggest integration project to take place in the Russian market in 2018; ambitious work is under way aimed at the digital transformation of the Group’s business and processes.

In response to the new situation at the end of April 2019, VTB Bank’s Supervisory Council adopted a new VTB Bank’s Development Strategy for 2019–2022, which includes an updated mission, along with a renewed vision and values.

VTB’s new mission: We help people to make their plans a reality by creating the best financial solutions. We are a team of professionals, working for the benefit of our customers and the country as a whole.

VTB’s strategic vision: A universal financial group that is developing both dynamically and sustainably, one that is focused on being the first-choice financial partner for its customers and which provides the most convenient and cutting-edge solutions to their needs.

KEY STRATEGIC PRIORITIES FOR VTB GROUP’S DEVELOPMENT IN 2019–2022

The changing landscape poses new challenges for VTB Group. Competition for customers is heating up, while barriers to their movement between banks are breaking down, and competition from non-financial players is increasing. The model for the consumption of financial services is being transformed with a trend towards greater digitalisation of products and services. Pressure on margins in traditional banking and stagnation in the banking sector continue.

While VTB is focused on long-term and sustainable development, it has to adapt in response to new challenges, which means the evolution of the Bank’s business model, an increased focus on customers and their needs, acceleration of internal processes and optimisation of the Bank’s operating model.

In accordance with its mission, values and strategic vision, VTB identifies three key development priorities for 2019–2022:

1. Customers’ usage of digital channels to conduct banking is expected to increase significantly: more than 50 % of sales will be completely digital and 100 % of products will be available to customers through electronic channels by the end of 2022; more than 80 % of service operations will move to remote channels. While remaining a universal bank, VTB will take its branch network and other traditional channels to a new technological level by creating a full-fledged multichannel interface for client interaction. An important priority is the digitalisation of internal processes, which will involve, in particular, the transition to a completely paperless internal workflow while maximising the electronic workflow in relations with external counterparts;

2. The Bank plans to build an advanced operational and processing platform based on a next-generation microservice IT architecture that will create competitive advantages for the Group in terms of the speed at which technological solutions are introduced and new services are brought to market. A single operations centre will be created to provide a high degree of reliability, scalability and efficiency in terms of operational processes. Investments in technological solutions will be aimed at creating leading solutions in such areas as the use of biometric identification platforms, robotics and advanced analytics; the virtualisation of processes based on artificial intelligence technology; the creation of a system of open interfaces for prompt integration with partners; and automation of the cloud infrastructure for the acceleration and scaling of capacities;

3. Key factors will be accelerating the Bank’s response to market changes and customer demand and promoting values within the corporate culture such as innovation, engagement, a commitment to results and teamwork. This new approach will be facilitated by initiatives to develop human capital: the creation of a pleasant working environment and attractive conditions for the top talent in the market, the systematic development of tomorrow’s leaders, ensuring productivity growth and competitive motivation, and a balance of team and individual success. The introduction and scaling of a new model of cross-functional teams will be an important driver for speeding up these processes.

1 VTB Bank’s document VTB Bank’s Development Strategy for 2019–2022 was approved by VTB Bank’s Supervisory Council in minutes No. 5 as of 23 April 2019. VTB Group’s development strategy for 2019–2022 is an integral part of the document (hereinafter the Development Strategy).
The Bank made it possible to open a current account without visiting a Bank office by using a service of mobile specialists; a service was launched to enable the online registration of limited-liability companies and sole proprietorships using an electronic signature through a mobile phone.

As part of the Bank’s expansion into non-financial services, a joint offer was developed by VTB and First-OFD (fiscal data operator) for the sale of online cash registers and OFD products to VTB customers at a discount; a Digital Accounting service and VTB Business QR were piloted for small enterprises.

VTB launched a platform for non-banking services that allows both VTB Bank clients and users, who are not VTB clients, to access state-of-the-art tools for automating business processes and improving their efficiency.

Thanks to a new sales and service model introduced at the beginning of the year, three times more settlement accounts were opened through remote channels compared to 2018. As a result, conversions nearly doubled, and the Bank showed a fourfold improvement in its response time.

The Retail Business strategy envisages an increase in the client base by 50% to 18 million customers along with an increase in market share in retail lending to 22% and, accordingly, an increase to 35% in terms of the share of loans to individuals in the Group’s loan portfolio. Concerning retail customer accounts and deposits, the Bank plans to increase its market share to 20% on the back of faster growth in balances of current and savings accounts, their share in the structure of deposits from individuals will be greatly increased. Optimisation of the cost of funding, an increase in the share of customers carrying out transactions and customers with multiple products will ensure income diversification and above-market growth in terms of average income per customer.

As of the end of 2019, VTB had seen a record increase in terms of its active clients – more than 1 million people – which was achieved by, among other things, working with the existing customer base in order to reduce the loss of clients, and also by developing digital services and introducing new digital products to market.

In 2019, VTB enabled customers to receive cash loans through a mobile application, introduced a digital debit card and expanded the possibilities for money transfers and payments. VTB added an option to its website that enables customer to get a mortgage approval in 30 seconds without visiting the Bank’s branch. The Bank updated its loyalty programme and added more than 10 thousand partners to the Multibonus programme. The Bank launched a new Savings Jar product, which helps increase the share of savings accounts in the portfolio of customer accounts.

In 2019, VTB enabled customers to receive cash loans through a mobile application, introduced a digital debit card and expanded the possibilities for money transfers and payments. VTB added an option to its website that enables customer to get a mortgage approval in 30 seconds without visiting the Bank’s branch. The Bank updated its loyalty programme and added more than 10 thousand partners to the Multibonus programme. The Bank launched a new Savings Jar product, which helps increase the share of savings accounts in the portfolio of customer accounts.

The Bank updated its loyalty programme and added more than 10 thousand partners to the Multibonus programme. The Bank launched a new Savings Jar product, which helps increase the share of savings accounts in the portfolio of customer accounts.

Goals of the Medium and Small Business global business line: doubling the client base among small and medium-sized enterprises with an increase in average revenue of 15%–35% depending on the subsegment. This will be made possible first of all by increasing the transactional revenue of the business – the share of current account balances among customer accounts in the segment will exceed 40%, and the share of fees and commissions in net operating income will exceed 35%. Remote and partner channels will play a significant role in increasing the client base; the share of sales through digital channels will exceed 50%.

In 2019, the Bank launched a new universal line of settlement and cash services packages for small and medium-sized enterprises that offer a full range of the banking services to meet customers’ needs. Since its launch, more than 20% of VTB’s client base has taken advantage of this new financial product. The most popular package among VTB Bank’s new clients is the For Starters service package, which was developed to support small and medium-sized enterprises.

The Bank made it possible to open a current account without visiting a Bank office by using a service of mobile specialists; a service was launched to enable the online registration of limited-liability companies and sole proprietorships using an electronic signature through a mobile phone.

As part of the Bank’s expansion into non-financial services, a joint offer was developed by VTB and First-OFD (fiscal data operator) for the sale of online cash registers and OFD products to VTB customers at a discount; a Digital Accounting service and VTB Business QR were piloted for small enterprises. VTB launched a platform for non-banking services that allows both VTB Bank clients and users, who are not VTB clients, to access state-of-the-art tools for automating business processes and improving their efficiency.

VTB launched a platform for non-banking services that allows both VTB Bank clients and users, who are not VTB clients, to access state-of-the-art tools for automating business processes and improving their efficiency.
VTB’s strategic vision for its Corporate-Investment Business implies the development of its existing business model with a special focus on an individualised client approach based on industry specifics and an understanding of client needs, expertise and partnerships to resolve financing challenges of any size, as well as unchallenged leadership in the investment business.

The goals for the development of the Corporate-Investment Business global business line are to maintain leadership positions in investment banking services for corporate and institutional clients, to ensure better-than-market growth in current account balances and fees and commissions for transaction products, and to create, together with the Retail Business, conditions for a breakthrough in the investment products market for individuals and, by the end of 2022, to have secured at least 25% of this market.

In 2019, the Corporate-Investment Business global business line launched a new functionality that uses biometric data to authenticate clients through remote banking service channels; the questionnaire was shortened, and the process of requesting documents from clients was streamlined. Among the new tools introduced, a novel model for financing housing construction was launched using escrow accounts, and pilot projects were launched with key developers.

In order to reinforce the development of investment products, VTB enabled to open brokerage and individual investment accounts through VTB Online, two partners were connected using the Open API (Application Programming Interface) technology, and a pilot roboadvisory project was launched.

A strategy for financing housing construction was approved that involves a transition to the use of escrow accounts in working with developers.

Transport solutions for Moscow and St. Petersburg were introduced; the process of transitioning cardholders from their Moskowite social cards to Moscow resident cards got under way; My Smart City application and a Russian Railways card project were launched. Transport processing using an integrated payment aggregation mechanism was introduced in the Moscow Metro and for above-ground transport.

SYNERGIES AMONG GLOBAL BUSINESS LINES

One of the key areas for the Bank in terms of the Development Strategy implementation is the development of synergies among its global business lines.

Based on 2019 results, initiatives were developed to reinforce the synergies between the corporate and retail businesses. In particular, a number of initiatives were carried out regarding salary clients and cross-promotion of products to clients of the Retail and Corporate Businesses.

Retail customers were connected to the Faster Payments System (FPS) to enable them to transfer funds to individuals by telephone number. VTB Business QR was launched, making it the first solution in the market enabling customers to receive C2B payments using a QR code through the Faster Payments System.

In order to reinforce the development of investment products, VTB enabled to open brokerage and individual investment accounts through VTB Online, two partners were connected using the Open API (Application Programming Interface) technology, and a pilot roboadvisory project was launched.

A strategy for financing housing construction was approved that involves a transition to the use of escrow accounts in working with developers.

Transport solutions for Moscow and St. Petersburg were introduced; the process of transitioning cardholders from their Moskowite social cards to Moscow resident cards got under way; My Smart City application and a Russian Railways card project were launched. Transport processing using an integrated payment aggregation mechanism was introduced in the Moscow Metro and for above-ground transport.

DEVELOPMENT OF OPERATIONAL AND TECHNOLOGICAL PLATFORM

A key condition for the successful implementation of the strategies of the Bank’s global business lines and for development in the digital economy is the creation of an advanced operational and processing platform that involves efficient processes for operational support, business support and information systems that ensure a high level of automation and stability.

In 2019, VTB developed its Retail Business IT systems; the number of changes made to the IT systems increased by 30% compared with 2018. In terms of IT solutions for the corporate business, VTB continued developing its remote banking channels. The Bank also began operating cross-functional teams made up of staff from different Bank departments (business divisions, IT, and other organisational units), which individually or in cooperation with other teams work on the delivery of final products to the market. This format has been most common in the development of the Retail Business and Medium and Small Business. Since the end of 2019, the Bank has been changing over to a new production process; nine key Strategic programmes were initiated and launched already by the end of 2019 that will be the main drivers of the Bank’s development in 2020–2022. As of the end of the year, the Bank had launched and was operating more than 270 such teams.
DATA MANAGEMENT AND INFORMATION SECURITY STRATEGY

In accordance with VTB’s data management and information security strategy, 2019 saw the creation of a data lab team, the launch of a big data centre and the establishment of an information security monitoring centre.

The Bank’s information security complyes with the recommendations of the Bank of Russia. The Bank did not suffer any downtime of critical information systems or losses as a result of cyberattacks.

HUMAN RESOURCES, CORPORATE CULTURE AND HUMAN CAPITAL DEVELOPMENT STRATEGY

Based on 2019 results, the Bank became one of the top three employers in the banking industry and one of the top two employers for IT professionals and students.

As part of the Bank’s work with young specialists in 2019, the Junior programme was extended to the regional network, and a separate specialisation was added, IT Junior, which added more than 70 technical specialists to the Bank’s team.

A pilot project enabling some employees to work remotely was also successfully conducted in 2019, which helped prepare the Bank’s infrastructure and evaluate all the necessary technologies in case of an emergency situation.

An initiative to reduce paper workflow was carried out, which enabled the Bank to reduce the volume of paper printed per employee by 10 % and the volume of paper workflow involving government documents by 50 % compared with 2018.

To realise the innovative potential of staff, an Innovation Centre was created, which establishes a unified cultural, resource- and infrastructure-related milieu for the creation, adoption, introduction and adaptation of innovative ideas, practices and processes.

CLIENT-CENTRICITY AND QUALITY

As part of the implementation of the Client-Centricity and Quality strategic initiative, a Quality Centre was created, which began conducting regular research on the quality of the customer experience on the part of retail customers, and a regular employee survey was introduced to evaluate internal services.

In addition, a strategy for managing the quality of the customer experience in the Retail Business was also developed in 2019. According to the 2019 survey, the loyalty index increased by 2 p.p. compared with 2018.

In 2019, work got under way on the development of a data management centre to provide customers with personalised offers through digital channels. Piloting and an assessment of customer satisfaction on the part of corporate clients in the Medium and Small Business segment got under way.

COST EFFICIENCY AND OPTIMISATION

The main areas of cost optimisation and improving the Bank’s efficiency are simplifying processes related to standard operations, automating and roboticising routine functions and processes, increasing transparency and reducing costs, managing non-core assets, reformating the network, centralising and regionalising homogeneous functions, and integrating banks.

DATA MANAGEMENT AND INFORMATION SECURITY STRATEGY

In accordance with VTB’s data management and information security strategy, 2019 saw the creation of a data lab team, the launch of a big data centre and the establishment of an information security monitoring centre.

The Bank’s information security complyes with the recommendations of the Bank of Russia. The Bank did not suffer any downtime of critical information systems or losses as a result of cyberattacks.

HUMAN RESOURCES, CORPORATE CULTURE AND HUMAN CAPITAL DEVELOPMENT STRATEGY

Based on 2019 results, the Bank became one of the top three employers in the banking industry and one of the top two employers for IT professionals and students.

As part of the Bank’s work with young specialists in 2019, the Junior programme was extended to the regional network, and a separate specialisation was added, IT Junior, which added more than 70 technical specialists to the Bank’s team.

A pilot project enabling some employees to work remotely was also successfully conducted in 2019, which helped prepare the Bank’s infrastructure and evaluate all the necessary technologies in case of an emergency situation.

An initiative to reduce paper workflow was carried out, which enabled the Bank to reduce the volume of paper printed per employee by 10 % and the volume of paper workflow involving government documents by 50 % compared with 2018.

RESULTS OVERVIEW

FINANCIAL REVIEW

VTB GROUP KEY IFRS FINANCIAL RESULTS

The P&L statement components have been compared with modified financial results for 2018 for the purposes of accuracy of the year-on-year analysis (operating results of Post Bank, Multicard, VTB Insurance, VTB Bank (Ukraine) and VTB Bank (Belgrade) have been excluded as if these companies have not been consolidated by the Group during 2018).

All figures in the present report are based on the financial results from IFRS Consolidated Financial Statements of VTB Group and might be rounded which allows for insignificant deviations in calculations expressed in percentage amounts compared to data from the Financial Statements of the Group.
ANALYSIS OF VTB GROUP’S IFRS INCOME STATEMENT

The P&L statement components have been compared with modified financial results for 2018 for the purposes of accuracy of the year-on-year analysis (operating results of Post Bank, Multicard, VTB Insurance, VTB Bank (Ivaniyka) and VTB Bank (Belgrade) have been excluded as if these companies have not been consolidated by the Group during 2018).

Net interest income and net interest margin

Net interest income for 2019 amounted to RUB 440.6 billion, compared with RUB 439.7 billion a year earlier. In 2019, interest income and expenses grew on the back of an increase in interest-earning assets and interest-bearing liabilities, while the increase in interest expense (19.4 % year-on-year) outstripped growth in interest income (11.0 % year-on-year) mainly due to an increase in the cost of funding by 30 b.p. (5.2 % in 2019) compared with a 10 b.p. decrease in the return on interest-earning assets to 8.4 % in 2019.

Net fee and commission income

Gross fee and commission income increased by 30.3 % in 2019 to RUB 166.3 billion. The bulk of commission income came from settlement transactions and trade finance, which accounted for 56.5 % (57.0 % in 2018) of the total amount. Total fee and commission expense increased by 32.6 % in 2019, mainly due to a 37.1% increase in commission expense on settlement and cash transactions and trade finance.

Net fee and commission income for 2019 increased by 29.2 % year-on-year to RUB 108.5 billion. The robust growth in net fee and commission income was due to operations with securities and capital market transactions (accounting for 9.3 p.p. of the 29.2 p.p. increase in net fee and commission income), fees for the distribution of insurance products and agents’ services (7.8 p.p. of the 29.2 p.p. increase), as well as the consolidation of three acquired banks (6.5 p.p. of the 29.2 p.p. increase).

The Group’s net commission margin increased by 10 b.p. year-on-year to 0.7 %. The Group’s net fee and commission income outstripped growth in net interest income (0.2 % year-on-year) and net other income (–6.1 % year-on-year).

The Group’s net fee and commission income in the structure of operating income before provisions increased to 17.8 % from 14.3 % in 2018.

As of the end of 2019, net interest margin had decreased by 30 b.p. to 3.4 %. On the back of a series of reductions in the Bank of Russia’s key rate starting in June 2019, the Group’s net interest margin began growing in 2H 2019. In 1Q 2019, the Group’s net interest margin reached its lowest level for the year at 3.2 % amid rising funding costs (outstripping the revaluation of assets) due to an increase in the Bank of Russia’s key rate at the end of 2018. In 2Q, net interest margin increased slightly quarter-on-quarter and remained at a stable level of 3.3 % throughout 2Q and 3Q 2019. In 4Q, VTB Group’s net interest margin increased to 3.5 % due to a consistent easing of monetary policy and an improvement in the Group’s funding structure.

1 Provision charge for credit losses on debt financial assets, credit related commitments and other debt financial assets and (provision charge) / reversal of provision for legal claims and other commitments.
 Provision change
In 2019, the Group’s provision change for credit losses on debt financial assets, credit related commitments and other debt financial assets, legal claims and other commitments amounted to RUB 103.3 billion, a decrease of 33.2 % compared with 2018.
The cost of risk was 0.8 % in 2019, down by 70 p.p. year-on-year.
The decrease in the cost of risk and the drop in provision charge occurred while the quality of portfolios in all business segments remained stable.

Staff costs and administrative expenses
Staff costs and administrative expenses amounted to RUB 254.2 billion in 2019, up 12.6 % from 2018.
The increase in expenses was attributable to the consolidation of acquired banks (up 6.8 p.p. of the 12.6 p.p. increase in staff costs and administrative expenses) and to expenses for information technology, digitalisation and the transformation of business processes.
The second quarter of the year saw a slowdown in the growth of expenses: as of the end of 1H, staff costs and administrative expenses had increased 22.2 % year-on-year, which slowed to 13.8 % in 3Q. Moreover, expenses decreased by 2.1 % year-on-year in 4Q 2019.
The cost to income ratio (CIR) decreased during the year from 46.6 % in 1H to 37.8 % in 3Q and 37.7 % in 4Q. At the end of 2019, the cost to income ratio was 41.6 %.

Net profit
Net profit for 2019 increased by 12.9 % compared with 2018 and amounted to RUB 201.2 billion – this is in line with the Bank’s strategic forecast of RUB 200 billion – amid strong growth in fee and commission income and improved asset quality. The net profit of RUB 201.2 billion was an all-time high for VTB Group.

ANALYSIS OF VTB GROUP’S IFRS BALANCE SHEET

As of 31 December 2019, the Group’s total assets amounted to RUB 15.5 trillion, an increase of 5.1 % compared with 31 December 2018.

Assets
As of 31 December 2019, the Group’s total assets amounted to RUB 15.5 trillion, an increase of 5.1 % compared with 31 December 2018.

Significant transactions involving the sale of securitised mortgage loans had an impact on the growth of the Group’s retail loan portfolio.

In 2019, the Bank continued creating mortgage-backed securities and raising awareness of them among customers. This product enables the Bank to attract liquidity, optimise the utilisation of capital on mortgage loans, remove interest risks from its balance sheet and earn profits by lowering market interest rates. In 2019, VTB Bank increased its volume of issued mortgage-backed securities to RUB 265 billion1, which is a record for the Russian market.

The Group’s corporate loan portfolio decreased by 4.0 % in 2019 to RUB 8.1 trillion, mainly as the result of a series of large loan repayments in 4Q. In light of this, the Group’s market share in the corporate lending segment in Russia decreased by 40 p.p. to 18.2 %.

As of 31 December 2019, secured loans (mortgages and car loans) accounted for 52 % of total retail lending, unchanged from the beginning of the year.

The share of retail loans in the total loan portfolio structure increased to 29.4 % compared with 26.2 % in 2018.

The Group’s market share in the retail lending segment in Russia amounted to 17.4 %, decreasing by 30 p.p. in 2019, which was due mainly to the sale of securitised mortgage loans.

The Group’s corporate loan portfolio decreased by 4.0 % in 2019 to RUB 8.1 trillion, mainly as the result of a series of large loan repayments in 4Q. In light of this, the Group’s market share in the corporate lending segment in Russia decreased by 40 p.p. to 18.2 %.

LOANS TO LEGAL ENTITIES, RUB billion

At the same time, the loan portfolio (before provisions) in the Medium and Small Business (MSB) segment enjoyed robust growth of 10.0 % in 2019, reaching RUB 1,481.0 billion. Loans to MSB borrowers accounted for 18 % of the total portfolio of loans to legal entities in 2019, an increase of 230 b.p.

1 VTB Group’s IFRS financial statements for 2019 take into account the disposal of securitised mortgage loans in the amount of RUB 190 billion.
2 To ensure comparability of data on the MSB segment of the loan portfolio, data for Vozrozhdenie Bank was included in the segment portfolio as of 31 December 2018. In the Group’s financial statements for 2018, data on Vozrozhdenie Bank was provided in a separate segment.
By lending to legal entities in a number of industries, the Group continued to expand its loan portfolio, seeing growth in industries such as metals, building construction, transport, food and agriculture. The Group continued making advances in its work with all sectors, while making lending to small and medium-sized enterprises a priority.

**Asset quality**

As of 31 December 2019, the total amount of non-performing loans1 was RUB 534 billion, or 4.7 % of gross total customer loans (compared with RUB 654 billion, or 5.7 %, as of 31 December 2018).

The Group continued its policy of writing off bad assets at the expense of the corresponding allowance for loan impairment after all necessary procedures to recover the asset have been carried out. The volume of non-performing loans written off in 2019 amounted to RUB 165.5 billion (compared with RUB 156.8 billion in 2018).

As a result of the write-off of non-performing loans, the allowance for loan impairment represented 6.0 % of the total gross loans as of 31 December 2019, compared with 6.4 % as of 31 December 2018. At the same time, the non-performing loans coverage ratio increased 17 p.p. to 128.7 % as of 31 December 2019, compared with 112.0 % as of 31 December 2018.

---

1 The Group defines non-performing loans (NPL) as lifetime ECL (expected credit losses) credit-impaired financial assets with contractual principal and/or interest payments overdue more than 90 days and POCI (purchased or originated credit impaired financial assets) loans with principal and/or interest payments becoming overdue more than 90 days after the date of initial recognition. Loans with no contractual payments until maturity, grace period on principal and/or interest payments, as well as restructured loans are not considered NPL unless amounts due contractually become more than 90 days overdue.
In line with its Development Strategy, the Group continued to increase the share of Retail Business in total liabilities. Customer funding from individuals increased by 14.4% in 2019 to RUB 5.0 trillion, being ahead twice as much as the growth rate in the Russian banking sector in funding from individuals.

As of the end of the reporting period, funding from legal entities decreased by 1.1% to RUB 5.9 trillion, while funding from customers in the MSB segment increased 11.8%1 from the beginning of the year. Thus, the MSB segment accounted for 14.8% of customer funding, up from 13.9% as of 31 December 2018.

As of 31 December 2019, VTB Group’s share of customer funding in the corporate and retail segments in Russia amounted to 20.2% (a decrease of 50 b.p. in 2019) and 15.1% (an increase of 110 b.p. in 2019), respectively.

The Group’s dependence on funding from debt capital markets remains low. The share of funds raised through issues of debt securities in total liabilities increased slightly from 2.0% as of 31 December 2018 to 2.5% as of 31 December 2019.

**Capital and capital adequacy**

The Group’s capital management policy is to maintain a sustainable capital base so as to retain the confidence of investors, creditors and the market participants, as well as to ensure the future development of its operations. The Group manages its capital in accordance with the requirements of the Bank of Russia. The Bank of Russia has recognised the Bank as a systemically important credit institution. Thus, capital adequacy requirements calculated in accordance with the requirements of the Bank of Russia include premiums on a banking group’s risk-weighted capital adequacy standards, as well as a premium for systemic importance.

The Group monitors compliance with capital adequacy standards, defined as a percentage of the risk-weighted assets calculated in accordance with the requirements of the Bank of Russia: common equity adequacy ratio (N20.1), tier 1 capital adequacy ratio (N20.2) and total capital adequacy ratio (N20.0).
CORPORATE-INVESTMENT BUSINESS
The Corporate-Investment Business (CIB) global business line specialises in servicing major corporate clients through sales of lending, transaction and investment products, as well as leasing and factoring services in Russia, the CIS countries, Europe, Asia and Africa.

Source: VTB Group’s IFRS consolidated financial statements for 2019.

To maximise the impact of its CIB client service, VTB created a dedicated client coverage unit and product units that are responsible for maintaining and developing a line of cutting-edge banking products.

The client coverage unit’s service model centres on sector coverage, with dedicated teams responsible for doing business with clients from different sectors of the economy. This approach enables the Group to improve the quality of its sector expertise and build products and solutions tailored to the needs of specific clients.

The product units are also structured for sector specialisation and to meet the requirements of major corporate clients. This allows the Group to enhance its approach to credit analysis and improve the quality of its corporate loan portfolio.

Transaction banking comprises two main product lines: the documentary business, which includes a variety of credit lines with drawdown limits, credit limits or a combination of these limits; and liquidity management products, including account management products, financing products (such as the accrual of interest on client account balances), as well as acquiring services, remote banking services, and settlement and cash services.

The Group’s investment banking business offers a full range of investment banking products, including trading operations, organising debt and equity issuance, consulting services on M&A transactions, private equity, asset management, FX and interest-rate products and hedging strategies.

In 2019, the Bank achieved its targets in terms of key financial indicators in the Corporate-Investment Business and was able to maintain its leading positions thanks to its flexible business model and its willingness to use innovative approach while taking decisions according to market conditions.

The Bank focused in particular on improving the efficiency of processes and continued cost reductions.

LENDING TO CIB CLIENTS
VTB offers a wide range of lending products for corporate clients, providing financing for various terms in all major global currencies. The Bank also offers a variety of credit lines with drawdown limits, credit limits or a combination of these limits.

In addition to traditional financing, VTB also offers major corporate clients complex credit products, including structured repo, investment and project financing, debt and equity financing services, consulting services on structuring investment projects, trade finance services and direct financing from institutional investors and banks. VTB’s clients have access to structured financing products that make it possible to reduce interest rates considerably by allowing the Bank to select the repayment currency. Leasing and factoring products are provided to the Group’s customers through VTB leasing and VTB Factoring.

As a result of stiff competition on capital markets in 2019, the Group offered its customers complex products with more attractive financing conditions. In particular, the Bank carried out extensive work with exporting companies regarding instruments operated by the Russian Export Center and the Ministry of Industry and Trade of Russia to support and stimulate exports. One of the main targets was the development of new approaches and loan products for agricultural producers managing a land bank.

At the same time, the Bank’s emphasis on working with solid clients and strengthening the structure of transactions helped reduce losses by creating provisions and reducing the volume of non-performing loans. This was also achieved thanks to accurate market positioning based on an analysis of macroeconomic trends in various sectors of the economy.

Lowered expectations in terms of inflation and developers’ transition to escrow accounts spurred growth in project and equity financing for major real estate developers. In terms of escrow financing, more than 10 transactions were completed with a drawdown limit of over RUB 130 billion.

The Bank also successfully implemented portfolio investments in residential projects: two properties were delivered on schedule, and sales were better than expected.

It is also worth noting that the Bank enjoyed significant success in project financing in 2019:

- VTB consolidated its leading position in terms of financing Russia’s port infrastructure; agreements were signed with a total limit of USD 2 billion, with the potential to increase the limit to USD 3.5 billion;
- A syndicate agreement involving VTB was signed to finance the largest gas processing plant in Russia worth the equivalent of EUR 1 billion;
- The VEB RF project financing factory completed its largest-ever transaction for a methanol plant project (with VTB’s involvement in the amount of EUR 1.1 billion);
- Funding was provided for new solar and wind generation projects through a power purchase agreement worth RUB 40 billion.

In 2019, VTB Bank continued to develop trade and export financing, expanding its product line and introducing individual solutions for its clients. VTB Group supported trading transactions in more than 50 countries all over the world using both traditional products of trade financing (including confirmation and discounting of letters of credit, issuance of guarantees, supply of connected trading currencies) and long-term export financing instruments.

Bank fully supported exporters in emerging markets (including in CIS, Asia and Africa) in cooperation with export credit agencies. In 2019, the portfolio of relevant transactions grew by 30%, the amount of new transactions doubled. Developing this sector Bank realised unique solutions in terms of companies’ financing in the sphere of green energy.

VTB Bank continued developing effective infrastructure to fully support Clients’ foreign trade activities in the international markets. VTB Bank (Europe) and Afreximbank thus signed an agreement to support clients’ business in African region. Under the agreement Afreximbank ensures obligations fulfilment by African financial institutions on the trade financing transactions. This will help increase VTB Group’s business scale in the African market.
DEPOSITS AND ACCOUNTS FROM CIB CLIENTS
Attracting deposits and accounts from CIB clients is an important part of VTB’s business. The Bank is constantly taking steps to improve customer service and streamline business processes to further develop deposit products and reduce operating expenses. In order to make liquidity management more effective, the Bank enabled customers to make overnight deposits from a pool of accounts through the Client Settlement Centre system. The Bank’s electronic click deposit system for the simplified investment of free cash continued to gain popularity, as it greatly reduces the time needed to process deposit transactions.

The structure of contracts was also revised for the investment of funds in minimum-balance accounts, which further made it easier for customers to invest funds, thanks to a flexible policy in setting rates and its individual approach to customers made it possible to respond in a timely manner to market changes and requests from Russian companies.

CIB TRANSACTION BANKING
Products for managing payments and liquidity
VTB offers a wide range of transactional products and services. During the reporting period, VTB increased the number of projects aimed at providing customers with cutting-edge services and improving service quality:

- A project was launched together with one of the leading telecommunication companies in Russia to send out invoices through an electronic document management system. The software solution provides a simple and quick tool for the exchange of legal documents between the users of the electronic document management system, including in communications with the Federal Tax Service of Russia;
- In the interests of servicing one of Russia’s largest retailers, a project was launched to make it possible to accept cash through special devices – Automated Deposit Machine (ADM) installed in clients’ stores. This amount of funds deposited to the client’s current account in real time. This solution increases the efficiency of the client’s business processes related to the processing and collection of cash revenue, including by enabling the client to avoid errors while processing cash payments, reduce paperwork and not be dependent on a collection schedule;
- A service was introduced that offers extended business hours, allowing customers to make internal RUB payments until 11 PM and external RUB payments until 7 PM Moscow time;
- The process of opening a client account was greatly simplified. Account numbers are reserved online; the term for resident legal entities to open their first RUB account was reduced to one business day, and clients only have to visit a Bank branch once to open an account;
- A pilot service of mobile specialists was launched that provides customers with the submission of all the documents needed to open a current account and to connect to the remote banking system without having to visit a Bank branch;
- For a number of corporate clients, financial data exchange with the Bank was set up through the Bank of Russia’s Financial Data Interchange System and also in accordance with the ISO 20022 international standard. The Financial Data Interchange System helps reduce risks that could have an impact on the uninterrupted operation, security and confidentiality of financial data exchange, and the development of 2022 makes it possible for the Bank to link its clients to new solutions implemented on the basis of this standard, and also to reduce the costs of participating parties by using unified models for the exchange of payment information when conducting operations.

Documentary business
VTB Group remained one of the leaders in the documentary business (ranked second) with a market share of 16.9% in terms of the volume of documentary letters of credit issued in 2019. Considerable attention has traditionally been paid to the development of technologies and processes to ensure the implementation of documentary products and services for customers using the most advanced technology platform available. In 2019, VTB Bank continued to improve its remote service system for documentary operations and played an active role in joint work with the Bank of Russia, the Ministry of Finance of the Russian Federation, the Federal Treasury of Russia, the Federal Tax Service of Russia and the banking community in terms of the digitalisation of bank guarantees. In addition, the Bank also plays a leading role in the Digital Bank Guarantee project being carried by the FinTech Association on the Masterchain blockchain platform.

In 2019, VTB Bank expanded its range of services for documentary letters of credit by offering customers a new service: early repayment on uncovered RUB letters of credit offered and executed by the Bank by means of deferred payment. The service allows sellers, pursuant to delivery contracts with deferred payment, to receive money for delivered goods before the date of deferred payment according to the letter of credit (to the extent that the Bank has accepted for the buyer). VTB Group continues to be an active participant in industry and professional associations in the documentary business, including ICC Russia, and it makes significant contributions of expertise to improving the mechanisms that have a regulatory impact on the market and the development of its infrastructure.

Transaction business outside Russia
As of the end of 2019, the transaction business of the VTB Group’s international network built its highest volumes of business with corporate clients. These results were facilitated by the launch of new transactional business products and the further improvement of existing products, and also thanks to the efforts of the Bank’s local subsidiaries to offer services for VTB subsidiaries in Belarus, Kazakhstan, Angola and Western Europe, as well as in the Bank’s branch in Shanghai.

By using VTB ecosystem to guarantee client funds: a maximum of security and thanks to the Bank’s willingness to develop individual solutions that take into account the specifics of local business, VTB was able to expand its client base and intensify cooperation with existing customers.

Comprehensive transactional solutions for the largest companies
During the reporting period VTB was actively involved in large-scale projects to control the management of cash flows, liquidity and financial risks at leading Russian corporations. In 2019, VTB introduced cutting-edge solutions for approximately 90 groups of companies that include more than 2,500 legal entities.

In 2019, VTB Bank retained its position as the main settlement bank for some of the largest companies in Russia: Russian Railways, Russian Post, Transnet, Rosneft, Rosatom and the M Video Group.

Cutting-edge solutions for transport and for cities
VTB Bank continues to develop and roll out new solutions for transport and the urban environment:

- At the St. Petersburg International Economic Forum in June 2019, the My Smart City app was officially launched, which links up VTB Bank with Moscow’s municipal services, allowing users to view event information, top up their parking account, pay utility bills and traffic fines, top up the balance of their Troika transport card and see the latest Active Citizen voting results and much more. The app was named the best technology product of the year by The Banker magazine. VTB’s solution was the winner in the Mobile Applications category at the Tech Projects Awards, beating out mobile products created by some of the world’s top banks. On the other hand, the app focuses on providing popular services for residents of Russia’s largest city. On the other hand, it offers a state-of-the-art channel for communicating with citizens. The Bank’s role is to provide convenient payment services and infrastructure for effective interaction between service providers and end users;
- A project was completed to modernise Moscow Metro turnstiles to enable payment using a bank card and other devices using contactless

1 Market share was calculated using VTB Bank’s own methodology.
technology. The contactless fare service enables users to complete a journey without having to buy a ticket at a ticket office; • Seamless transfers were made possible using contactless bank cards between different types of urban passenger transport, such as between the Moscow Metro and the Moscow Central Circle.

Custody services
VTB Group Custody is one of the largest custodians in Russia and provides a full range of custody services for all types of securities issued by Russian and foreign issuers. The majority of companies operating in the Russian market hold depository accounts with VTB Bank. The account service on Russian and foreign securities through Euroclear Bank's accounts is constantly in good demand among domestic and foreign market players. Euroclear Bank is one of the largest international settlement depository, for which VTB Bank's depository acts as an agent for depository operations in Russia.

The Bank's depository acts as a Russian sub-custodian for the BNY and Deutsche Bank Trust Company Americas, holding the underlying assets for issuing depository receipts for shares in a number of major Russian issuers.

CIB INVESTMENT BANKING
VTB Group is Russia’s leading investment banking services and one of the key players providing access to global capital markets for Russian corporate clients. Investment services are primarily sold under the VTB Capital brand. In 2019, the Group maintained its leading position in various segments of Russia’s investment banking market.

Global markets
VTB Group offers a full range of services for fixed income, equity and FX trading, as well as investment and global commodities market operations. The Group also has access to a number of foreign markets, London Stock Exchange, markets in Russia and in a number of countries as well as structured finance, structured deposits management services, including hedging solutions, The Group also provides currency and interest-rate risk management services, including hedging solutions, The Group’s trading venues – VTB Capital Trading (Zug, Switzerland) and VTB Capital Trading (Moscow) – continue to expand their range of services. Structured finance transactions (stocks and cargos in transit), advances on future deliveries (prepayment), and deliveries with delayed payments were concluded. The client base was expanded in the CIS countries and other international locations. VTB plans to enter into China offshore market through creating a legal entity on the continent territory of China in order to gain transactions at a wider scale and interact with Chinese clients.

Highlights of the commodities business in 2019 included the following:
• No. 1 in Russia in terms of gold purchases (32 % market share);
• No. 1 in the CIS countries in terms of operations with physical aluminium;
• No. 2 in terms of grain exports from Russia (as of 31 December, 9.2 % of exports in the 2019–2020 season);
• Agribusiness transitioned from structured financing operations to a strong operational player in the global market;
• A contract was signed for copper extraction at a mine in Armenia;
• A core logistics team was established with experience in the areas of steelmaking, concentrates and primary base metals.

Corporate financing
In 2019, VTB Capital was once again recognised as the leader in terms of the volume and number of M&A transactions in Russia, according to a number of independent international agencies, including Refinitiv and Mergermarket.

In 2019, VTB Capital bolstered its presence in commodities markets, including international markets. Its line of basic assets includes precious and non-ferrous metals (gold, aluminium, copper and tin), oil, petroleum products and petrochemical products, coking and power-generating coal, and agricultural products (soybeans, wheat, barley and sunflower seeds). VTB Bank continues to offer an option structure to hedge the commodity risks of Russian producers of mineral resources. The Group’s trading venues – VTB Capital Trading (Zug, Switzerland) and VTB Capital Trading (Moscow) – continue to expand their range of services. Structured finance transactions (stocks and cargos in transit), advances on future deliveries (prepayment), and deliveries with delayed payments were concluded. The client base was expanded in the CIS countries and other international locations. VTB plans to enter into China offshore market through creating a legal entity on the continent territory of China in order to gain transactions at a wider scale and interact with Chinese clients.

In 2019, VTB Capital was once again recognised as the leader in terms of the volume and number of M&A transactions in Russia, according to a number of independent international agencies, including Refinitiv and Mergermarket.
Debt capital markets
According to the independent agencies Refinitiv, Bloomberg and Dealogic, VTB Capital was once again one of the top-ranked companies in 2019 in terms of volume of transactions in the debt capital markets of Russia, the CIS and Eastern Europe. According to Dealogic, VTB Capital organised over 100 transactions in the Russian debt capital market in 2019 worth a total of USD 12 billion. The most notable deals completed during the year included participation as the lead manager of a sovereign issue of Eurobonds by the Ministry of Finance of the Russian Federation worth more than USD 6 billion, as well as the coordination of a transaction for the issue of Eurobonds by Russian Railways worth EUR 500 million, the first issue of “green” Eurobonds in Russia and the CIS.

Corporate real estate market
In 2019, VTB Capital continued to develop one of its newest lines of activity: providing consulting services concerning corporate real estate; the company has successfully completed three deals since it began offering such services.

VTB Capital Investments: management – VTB Capital Investments
VTB Capital Investments, VTB Group’s single, unified platform, is one of the largest and most successful platforms in the Russian market for the provision of comprehensive investment services for a wide range of investors.

An Investor School project was carried out with the goal of improving financial literacy among those who would like to take their first steps in working on stock exchanges – and then to become successful investors.

In 2019, VTB won the Brokerage Company of the Year Award as part of the Financial Market Elite annual competition. The winner in the Best Management Company for Retail Investors category was VTB Capital Investment Management, and the VTB Treasury Fund was the winner in the Best Bond Fund category. In addition, VTB Bank received an award from the Moscow Exchange in 2019 for its contribution to the development and promotion of individual investment accounts.

Research
VTB Capital provides its clients with high-quality investment analytics on the economy, sovereign debt and the corporate sector and is a recognised source of information on the markets of Russia, Central and Eastern Europe, the Middle East and Africa. VTB Capital analysts cover the activities of more than 110 companies, publishing over 2.7 thousand reviews every year with analysis of financial information and major events that have a direct impact on the activities and results of the companies and sectors of the economy subject to analysis. VTB Capital analysts work closely with the Equity and Fixed Income Market Operations Departments, while also providing analytical support for strategic decision-making by VTB Group management.

According to the Institutional Investor 2019 Emerging EMEA Research Team survey, VTB Capital analysts ranked sixth in the Emerging EMEA region and second in the Russia category. The VTB Capital analytics Transport sector team and the Electricity sector team were the leaders in the EMEA region. The prize-winning meta-analytics teams in the Metallurgy, Oil and Gas and Russia sectors, among others, also contributed to VTB’s high position in the rankings in the Emerging EMEA region.

In the Extel Survey 2019 ranking, the VTB Capital analytics team was the winner in terms of the total number of votes in Russia, and VTB’s analysts took first place in such categories as Macroeconomics (Russia), Analytics in the Fixed Income Instrument Market (Russia), Media and Telecommunications (Russia), Banks (Russia), Electricity (EMEA), and Transport and Engineering (EMEA), while also winning prizes in the categories of Metallurgy (Russia), Oil and Gas (Russia), Investment Strategy in the Stock Market (Russia), Country Analytics – Russia and a number of others.

NON-BANKING FINANCIAL BUSINESS

Along with providing corporate clients with banking and insurance services, VTB Group also offers clients leasing and factoring services. Synergies and cross-selling of banking and non-banking products remain one of the Group’s main development priorities.

Leasing
- No. 3 in the market in terms of portfolio size1;
- No. 3 in the market in terms of the volume of new business in 20192;
- No. 1 in terms of the volume of new business in the construction equipment segment3;
- No. 1 in terms of portfolio volume in the construction equipment segment3;
- No. 1 in terms of portfolio volume in the medical equipment segment4.

VTB Leasing is one of Russia’s leading leasing companies, with 58 offices across Russia, as well as subsidiary businesses in the CIS and Europe. VTB Leasing is one of the top three leasing companies in Russia and one of the top 20 in Europe.

VTB Leasing’s clients are large corporate clients, standard bearers in their industries, both state-owned and private. Aeroflot, Rosneft, the Federal Cargo Company, SUEK, Novotrans, Russian Post and many others. At the same time, VTB partners with more than 25,000 small and medium-sized enterprises and auto leasing. The share of transactions in rapidly expanding sectors for leasing such as automobiles, freight transport and specialised machinery continued to grow, reaching 16% of its portfolio by the end of 2019.

Factoring
- No. 1 in terms of the volume of financing receivables1;
- No. 1 in terms of the factoring portfolio size2.

VTB Factoring, the leader in the Russian factoring market, provides a full range of factoring services for working with receivables and payables. The company operates across Russia through its own network of affiliates located in 15 of the country’s largest cities and also through branches of VTB Bank.

The well-coordinated work of VTB Group’s unified team, based on an individual approach to the development of unique solutions, enabled VTB Factoring to expand its business considerably in 2019. The volume of financing receivables reached RUB 724 billion; the company’s portfolio grew to RUB 254.5 billion. As a result, VTB Factoring remained the leader for the eighth year in a row in terms of both financing receivables and its factoring portfolio, with a market share of more than 35%.

The main focal areas of VTB Factoring’s strategy are working with large companies of federal significance and their suppliers, continuing digitalisation of customers’ acquisition and services for factoring business scaling to companies of MSB and development of new areas for commercial financing.

**MEDIUM AND SMALL BUSINESS**

The Medium and Small Business (MSB) global business line specialises in serving legal entities and individual entrepreneurs with annual revenues of up to RUB 1 billion per group of companies. Moreover, the following client sub-segments can be distinguished based on client needs for banking products and service models: upper, standard and mass. The main (but not the only) criterion for this segmentation is the volume of annual revenue: the upper segment includes clients with revenue from RUB 1 billion to RUB 10 billion; the standard segment is for clients with revenue from RUB 120 million to RUB 1 billion; the mass segment is for clients with annual revenue of less than RUB 120 million.

Source: VTB Group’s IFRS consolidated financial statements for 2019.

Small and medium-sized enterprises are playing an increasingly important role in the economy of the Russian Federation; therefore, work with clients in the MSB segment is an important strategic direction for VTB Group.

**2019 SEGMENT OVERVIEW**

**Client base in Russia:**

513 thousand clients

**MSB gross loan portfolio:**

1.5 RUB trillion

**Customer deposits:**

1.6 RUB trillion

The SME segment is one of the most competitive sectors in the banking market, while the small-business market is characterised by high volatility: with a relatively steady number of customers, there are new companies in the market every year, and a significant portion of customers change banks, which further intensifies competition among banks.

Despite the high degree of regional competition in upper and standard segments of MSB banking, VTB Bank enjoys the following competitive advantages: the quality of its customer service, its offer of comprehensive pricing conditions with a selection of the best products for each client, and the speed at which VTB is able to make decisions and provide services.

**MSB LENDING AND DOCUMENTARY BUSINESS**

The main trend in 2019 in terms of lending remained the provision of concessional loans through state programmes, as well as digitalisation of the process of providing products with credit risk.

These trends were the main drivers behind the development of the Bank’s product line in 2019. The Bank began work on an integrated digital platform (environment) for communicating with counterparties concerning credit and documentary operations conducted in electronic form. The platform will help reduce costs and the time needed to process client applications, increase customer satisfaction, and develop the market for state and commercial contracts in the Russian Federation.

**State-run business support programmes**

VTB actively participates in all state support programmes for business, offering preferential financing terms under these programmes.

As of the end of 2019, VTB had 3,897 existing loan agreements for state support programmes worth a total of RUB 364 billion. As a result, the Bank’s loan portfolio for preferential programmes amounted to more than RUB 222 billion as of 1 January 2020.

As of 1 January 2020, the largest volume of loan agreements were part of the preferential programme run by the Russian Agriculture Ministry, whereby loans are provided to agricultural producers and agribusiness companies at an annual rate of not more than 5%.

The second-largest volume of loans were provided through programmes for concessional financing through the Russian Ministry of Economic Development (transactions through Programme 674 were concluded in 2017, transactions through Programme 1706 were concluded in 2018, and transactions through Programme 1706 were concluded either in 2019 or will be concluded in 2020).

In 2019, a great deal of attention was paid to supporting small and medium-sized enterprises (SME). Close cooperation with the SME Corporation continued in terms of working with existing and potential SME customers.

**In an effort to expand SMEs’ access to credit financing, VTB uses a three-level system of guarantee organisations – the National Guarantee System, which provides meaningful and effective support for SMEs through guarantees and sureties. As part of its work with the National Guarantee System, VTB supports SMEs by providing Financing for business development against guarantees provided by the SME Corporation and SME Bank, as well as guarantees from regional guarantors.**

In 2019, the Bank became one of the first to begin using escrow accounts to Finance developers pursuant to new legislation; this enables developers to obtain a leading position in the housing construction market. In addition, work continues on the implementation of projects aimed at raising the level of digitalisation of the loan process:

- **Meticulous preparations were made in order to transfer all departments lending to MSB clients to a single automated banking system that maximises functionality in terms of automating processes (with the possibility of developing them further);**
- **A pilot project was launched to automate analytics (accounting) for small-business clients that apply for loans in order to establish lending limits.**

**Documentary business**

In 2019, the main trends in the development of the MSB documentary portfolio were driven by work aimed at converting documentary processes to a digital format. For example, the range of remote channels for providing guarantees was expanded to include an express model for credit analysis, and technologies for issuing electronic guarantees for customs authorities were further developed.

A project was launched to introduce a digital guarantee conveyor, which enables customers to use paperless technology to complete every stage on the path to becoming a client, from filing an application to receiving a guarantee.

Thanks to the introduction of new technologies, as well as penetration into regional markets, the documentary portfolio of MSB clients amounted to more than RUB 300 billion as of the end of 2019, an increase of 21% from the beginning of the year.

---

1. Provision charge for credit losses on debt financial assets, credit related commitments and other debt financial assets and (provision charge) / reversal of provision for legal claims and other commitments.

2. Small and medium-sized enterprises – economic entities (legal entities and individual entrepreneurs) attributed, in accordance with conditions set by Federal law No. 209 as of 24 July 2007, to small enterprises, including microenterprises and medium enterprises, information about which is included in the unified register of small and medium-sized enterprises.
The Bank continued to develop product offerings in segments that enjoyed constant high demand. Letters of credit in Russian rubles with an option of early payment were made available to MSB clients. The availability of guarantee products for all customer segments was expanded, including through simplified and rapid decision-making procedures.

**MSB TRANSACTION BUSINESS**

In 2019, the MSB global business line more than doubled in number of new customers for settlement and cash services. In August 2019, VTB Bank launched a unified line of packages for MSB customers for settlement and cash services. As of 31 December 2019, there were more than 100 thousand clients using these new financial products; in total, the Bank is serving more than 240 thousand clients with its packages for settlement and cash services.

The new MSB line includes four packages of settlement and cash services – For Starters, Most Important of All, All-Inclusive and High Turnover – which enable entrepreneurs to choose the best option depending on the size and objectives of their business. The financial products contain a complete list of necessary banking services for clients. In addition, the All-Inclusive and High Turnover service packages can be expanded with additional options – Payments Plus, Personal Transfers, Cash Withdrawals, Cashier Plus and Foreign Economic Activities – that can be combined to suit the client’s needs.

The For Starters package is most popular among the Bank’s new clients, having been used by more than 65 thousand customers already. VTB developed its For Starters package in order to support small and medium-sized business. The package enables clients to open and maintain a current account in rubles for up to 12 months free of charge, and it also provides remote banking services, an unlimited number of intrabank transfers and up to five external payments. Not only have VTB’s clients shown appreciation for the benefits offered by the Bank’s new line of packages, but so have independent experts. According to research conducted by MarchWebb in the third and fourth quarters of 2019, VTB is the leader in terms of service advantages for micro and small enterprises in the retail and service industries.

VTB Bank regularly offers preferential terms of service to businesses. In 2019, more than 83 thousand clients took part in the ‘Let’s start!’ with the Bank campaign, whereby companies and individual entrepreneurs who opened their first settlement account with the Bank were able to do so free of charge, and they also received three months of commission-free services as part of the Most Important of All and the All-Inclusive packages.

The Bank actively continues to improve its services and processes for opening accounts in order to meet clients’ needs and expectations as much as possible. The Bank conducted large-scale studies to identify shortcomings in its procedures for opening accounts: in doing so, the Bank studied the best practices of competing banks as well as best foreign practices, while also analysing internal processes.

To optimise its processes, the following measures were implemented in 2019:

- A completely new personal account was developed for clients that allows them to reserve accounts;
- To simplify and speed up the process of opening an account, the functionalities for opening the first and subsequent accounts, updating information and other internal Bank processes were automated and centralised.

In 2019, a great deal of work was done to standardise the line and improve the functionality of the Bank’s corporate cards:

- The Bank began issuing registered and instant (unnamed) cards that use the VSIA payment system;
- Personalised, contactless corporate cards were issued;
- Technology was implemented that enables clients to make card payments via mobile devices (ApplePay, AndroidPay, GooglePay, SamsungPay).

In 2019, VTB Bank completed its acquisition of the fiscal data operator First-ODF. This acquisition is a strategic investment aimed at expanding the Group’s customer services and bolstering its data monetisation models. Based on the data received from ODF, VTB will be able to quickly monitor the Financial position of its corporate clients, improve its scoring models and increase the conversion of targeted offers.

The Bank expanded its cooperation with the Capital Repair Fund of the City of Moscow in 2019 by launching a project on banking support for the settlement of contracts concluded between the Capital Repair Fund and contractors. The successful project managed to attract a significant number of new clients.

In addition, during the reporting period a number of projects were carried out that were aimed at increasing customer loyalty and expanding the product range, in particular:

- A process was coordinated with the Deposit Insurance Agency for payments to small businesses that were clients of Zhivilokredit Bank;
- The Bank began accepting electronic charter documents for legal entities and individual entrepreneurs using an enhanced qualified electronic signature from the Federal Tax Service of Russia;
- The standardisation of typical client forms for contracts and conditions for transactional products was carried out;
- A joint offer from VTB and First-ODF was launched to provide customers with settlement and cash services and online cash registers at a discount.

**BUILDING A DIGITAL BUSINESS**

One of the key areas of the Bank’s development is the creation of a state-of-the-art digital ecosystem for clients: digital products and quality service across all channels, and the development of a leading digital business for small businesses in Russia. In 2019, over 45 thousand settlement accounts were opened through remote channels, which was three times the number opened in 2018. This is more than a quarter of all accounts opened during the year, whereas, two years ago, only 5 % of accounts were opened through remote channels.

In 2019, the Bank made a great effort to find new MSB clients through its partners. In fact, in 2019, the number of clients the Bank was able to attract through its partners increased tenfold, and more than 2.5 thousand agreements with partners were concluded. A project on cooperation between the Bank and the multifunctional My Documents centres was launched and is being further developed.

The agency channel made a significant contribution to the implementation of the Bank’s business plan for 2019 in terms of the sale of settlement accounts: the share of accounts opened through the channel accounted for 15 % of the total volume.

In 2019, the Bank made it possible for legal entities, entrepreneurs and individuals engaged in private practice to open a settlement account without visiting a Bank branch.

This service of mobile specialists enables the Bank to:

- Attract new customers – legal entities or individual entrepreneurs – for cash and settlement services outside Bank branches;
- Increase the number of current accounts by reducing the time it takes to open an account;
- Make banking services for customers affordable and convenient;
- Increase the Bank’s competitiveness through mobile customer service.

The service of mobile specialists is currently provided in 15 cities, including Moscow and St. Petersburg. In 2019, the Medium and Small Business section on the Bank’s website was updated with the introduction of a sales-oriented design, simple navigation and a clear section structure, as well as a convenient application form for opening a current account. In addition, the following steps were taken:

- A new digital communication channel (online chat) was added to the Medium and Small Business section on the Bank’s website;
- An interactive service for clients was added that enables them to select service packages;
- A series of tests were conducted to assess the convenience and effectiveness of the interface; the data from the tests will provide the basis for an updated user interface.

**Non-banking services ecosystem**

Launched in 2019, the platform for non-banking and business services allows small and medium-sized enterprises (both VTB Bank customers and non-customers) to access state-of-the-art tools for automating business processes and increasing their efficiency. The platform offers cloud solutions and services from leading Russian companies for accounting, tax reporting to the Federal Tax Service of Russia and funds, business security and settlements with counterparties, moving a business online and much more.
In 2019, pilots of two popular services for small entrepreneurs were also launched: Digital Accounting and VTB Business QR.

Digital Accounting is a mobile application that covers the tax accounting and tax payment needs of entrepreneurs who are used to working in a digital environment. In addition to direct tax accounting services, the application enables users to submit reports to the Federal Tax Service of Russia and funds, download bank statements, and get advice on doing business. During the pilot, the application was installed more than 1,300 times.

VTB Business QR is a mobile application that enables entrepreneurs to accept cashless payments through the Faster Payments System. Using the application, the seller enters the amount and purpose of the payment, after which a QR code is generated for the buyer. Individual clients of any bank connected to the Faster Payments System can use the application to pay for purchases. The app is especially convenient for individual entrepreneurs, since the revenue from sales is automatically declared to the Federal Tax Service of Russia and a receipt is generated for the buyer.

These non-financial services help small entrepreneurs operate within the law, quickly launch a new business and start accepting payments, which makes them more mobile in addressing urgent problems related to developing their business.

In 2019, the VTB Business Connect B2B platform was further developed. VTB Business Connect is an online business platform with a built-in modular e-commerce tool that enables clients to automate their sales, as well as their export- and sales-related services. The platform currently has more than 20 thousand users and over 1 million products. In 2019, the range of services available through VTB Business Connect was expanded: document management was made available with support for cloud-based qualified electronic signatures, an online export accelerator was launched based on the methodology of the Russian Export Center, a secure payment service (micro-credit in digital form) was added, a pilot analysis of government tenders was conducted on the basis of neural networks in an effort to search for new customers, and a small-scale procurement project was scaled up within VTB Bank.

Internet banking and mobile banking for business

Based on the results of market research on mobile applications for business in 2019, VTB developed a new design for its single mobile bank for MSB clients. The updated version of the application takes into account the latest design trends, ensures excellent ease of use and resolves usability issues. The new application will be piloted starting in 2020.

A new design of the web version of the VTB Business Online remote banking service was also developed. The newly designed Internet bank will be available to clients in 2020. Based on the results of an audit and tests to assess the convenience and effectiveness of the interface, conducted by MonitWeb in 2019, VTB Bank received high marks for the design concept and functionality in terms of UX/UI design.

In 2019, the system enabled the widespread use of simple electronic signatures (signing documents using an SMS code) in remote banking systems for legal entities and individual entrepreneurs. In addition, the limit for the use of a simple electronic signature was increased (up to RUB 3 million). The use of simple electronic signatures with the increased limit will be made available in the new design of the VTB Business Online banking system.

Internet banking has become even more convenient: by transferring remote banking systems for legal entities in the MSB segment to an improved, special-purpose anti-fraud system, the number of payments requiring customer confirmation has been reduced by 30%.

**MEDIUM AND SMALL BUSINESS OUTSIDE THE RUSSIAN FEDERATION**

The strategy for working with MSB clients through subsidiary banks in the CIS and Georgia focuses on creating a digital environment for clients and state-of-the-art remote service channels. These banks continue to move in the direction of cross-selling and offering comprehensive solutions, especially in terms of servicing the foreign economic activities of the Group’s clients.

In Azerbaijan, VTB’s subsidiary began cooperation with the Russian Export Center to finance the costs that Azerbaijan importers have to pay for deliveries under trade contracts. New projects were launched for the development of digital sales channels, including a digital bank (chatbot) based on Facebook messenger and the modernisation of the existing system for remote banking services for corporate clients.

Having paid a great deal of attention to improving the technological portfolio, VTB Bank (Armenia) expanded its specialised service areas for corporate clients and individual entrepreneurs in its branch network in 2019. Cooperation projects were implemented with specialised organisations in Armenia (Accountants Association, SME Investment Support Centre).

In Belarus, VTB’s subsidiary bank became the first Belarusian bank to enter into an agreement with the Belarusian Financial Support Fund for Entrepreneurs, which will enable clients to receive loans secured by the fund (up to 60% of the principal), and it launched an online service called Start Your Business Now, which is used to prepare documents for business registration.

In 2019, VTB Bank (Georgia) introduced a procedure for internal factoring operations, which doubled the bank’s factoring portfolio and expanded the list of non-banking services provided at points of sale (registration of legal entities and individual entrepreneurs). The bank regularly takes part in state programmes for financing the development of production, agribusiness and tourism.

VTB Bank (Kazakhstan) continues to cooperate with state funds to support the development of small and medium-sized businesses. In 2019, an agreement was signed with KazakhExport (Kazakh export insurance company) on pre-export financing, which made it possible to expand the range of risk insurance instruments offered to Kazakh exporters. The Agrarian Credit Corporation (KazAgro) became a new strategic partner of the bank, having provided the Bank with funds for targeted financing of projects in the agribusiness sector.
**RETAIL BUSINESS**

The Retail Business global business line specialises in banking services for individuals and also includes a line of pension products.

**RETAIL LENDING**

**Mortgage lending**

In 2019, Russia’s mortgage market fell short of growth forecasts. At the same time, VTB was one of the few banks to increase its volume of mortgage sales. VTB Group significantly increased its housing loan portfolio, which amounted to RUB 1.6 trillion as of 31 December 2019, a 12% increase in the portfolio year-on-year. Excluding a securitisation transaction to sell a portion of the mortgage portfolio, VTB’s mortgage portfolio grew 25% year-on-year.

These results were made possible thanks to a decrease in interest rates during the year, the digitalisation of the lending process, the development of state support programmes and the launch of a far-east mortgage programme.

As of the end of 2019, the Group had maintained its share of the mortgage market in Russia at 23.9%. The Bank issued 275.5 thousand mortgage loans in 2019. At the end of the year, the Bank’s mortgage portfolio included more than a million active mortgages. The total volume of mortgage loans issued amounted to RUB 712 billion, the highest ever in VTB Group’s history. As of the end of 2019, the average annual mortgage rate at VTB was 9.6% (the average market rate at the end of 2019 was 9.9%).

In 2019, one out of every four mortgages in the Russian Federation was issued by VTB, and about 1.4 million families purchased housing with our help.

VTB’s active presence in the sector of mortgage lending for housing under construction and its cooperation with the country’s largest construction companies enabled customers to purchase new housing compliant with current quality requirements under the most favourable terms, including a reduced interest rate for mortgages, and the option of purchasing housing at an earlier stage of construction.

VTB’s stable partnerships with leaders in secondary mortgage market allow our clients to select their desired property as conveniently and as quickly as possible, while also minimising transaction risks.

In 2019, the average mortgage issued by VTB Bank in Moscow and the Moscow region was valued at RUB 4.5 million, while it was RUB 2 million in other regions. Borrowers can get a mortgage through VTB with a down payment beginning at 10%, while the average down payment on mortgage loans is 30% of the cost of the housing being purchased, and the maximum loan amount is RUB 60 million.

A mortgage can be issued for a period of up to 30 years, while the information available as of the end of 2019 shows that the average mortgage contractual term is about 16.5 years, and the actual period of repayment of mortgage loans is about seven years.

In 2018, a state support programme was launched that enables families with children to get a mortgage loan at an annual interest rate of 5%. For 2019, 16 thousand loans worth RUB 44 billion were issued through the programme. VTB accounted for 33% of state-supported loans. In addition, about 2.5 thousand existing VTB mortgage loans worth RUB 8 billion were transferred to the programme.

VTB has already received more than 6.6 thousand applications (for RUB 450 thousand to pay off mortgages) as part of state support for large families.

In mid-December last year, VTB became the first market leader to start work on the Far East mortgage programme. As of 31 December 2019, the Bank had accepted more than 3 thousand applications for loans worth RUB 13 billion, and 2 thousand loans worth RUB 8 billion were approved. Ninety-five per cent of these was for the acquisition of real estate in properties under construction with an average loan amount of RUB 3.4 million.

In 2019, VTB maintained its position as a market leader in lending to military personnel participating in the accumulative mortgage system, with a market share of about 20%. Mortgage loans worth around RUB 2.5 billion were issued through this programme.

In 2019, VTB became the absolute market leader in terms of the refinancing of mortgage loans from third-party banks. Through the programme, customers were issued more than 43 thousand loans worth RUB 87.8 billion during the reporting period. For the whole of 2019, refinancing housing loans from other banks accounted for 13% of VTB’s total mortgage sales, and VTB’s share of the refinancing market was 54.5%.

The Bank is actively developing its digital technologies. On the Bank’s website, clients can receive preliminary approval for a mortgage in one minute. At the end of 2019, technology was implemented in the Moscow region to enable clients to submit mortgage applications and documents through their personal accounts. The technology will be used throughout the country starting in 2020.

More than 200 thousand people transferred their loans to VTB as part of a programme for refinancing of loans.

The Group is continuously improving its pricing system to ensure optimal results for this business line. In 2H 2019, the optimisation of product terms enabled the Bank to counterbalance the impact of changes in regulatory capital requirements and maintain an acceptable level of profitability from new loans.

The Bank continued to expand its product line in 2019. A new product called Passport Refinancing was launched for the Bank’s new payroll clients, which allows clients to refinance their external liabilities after their first wage payment at VTB. In 2019, 1.2 million credit cards were issued, exceeding the figures for previous periods.

The credit card Multicard received the Frank Multicard 101 award for 2019 as the best credit card with a loyalty programme.

The largest number of vehicles financed by VTB in 2019 were sold in Moscow (22 %), St. Petersburg (8 %), Kazan (5 %), Krasnodar (4 %) and Ufa (4 %). The Bank also expanded its product line in 2019.

In July, the Bank introduced a new product for refinancing car loans that makes it possible to refinance car loans both at third-party banks and at VTB. In December, the Bank began lending for the purchase of new used cars with no down payment. The Bank made a substantial update to its lending terms for the purchase of motorised vehicles and launched the first joint federal programme with the motorcycle manufacturer Yamaha.

The Bank continued to expand the geography of its car loan portfolio, opening four new car loan centres: in Chita, Ulan-Ude, Blagoveshchensk and Abakan.

The Bank’s issuance of loans for new cars in Russia increased by 6 % and amounted to 72.3 RUB billion.

VTB Bank’s issuance of car loans for new cars in Russia increased by 6 % and amounted to RUB 72.3 billion. The Bank was the market leader in the used-car loans segment, issuing 25.2 thousand loans worth 14.3 RUB billion.

More than 200 thousand people transferred their loans to VTB as part of a programme for refinancing of loans.

The Group is continuously improving its pricing system to ensure optimal results for this business line. In 2H 2019, the optimisation of product terms enabled the Bank to counterbalance the impact of changes in regulatory capital requirements and maintain an acceptable level of profitability from new loans.

The Bank continued to expand its product line in 2019. A new product called Passport Refinancing was launched for the Bank’s new payroll clients, which allows clients to refinance their external liabilities after their first wage payment at VTB. Lending was also launched for a new segment for the Bank, non-working pensioners.

Throughout the year, the Bank worked hard to increase the coverage of VTB’s client base in terms of pre-approved offers, to optimise its communication strategy for offers and to improve the process for obtaining loans both at the Bank branches and through remote channels. During the year, the Bank reached an all-time record high in terms of the share of pre-approved loans issued completely remotely through VTB Online, which amounted to 16 % (in terms of the number of loans).

Remote lending to the Bank’s clients without a pre-approved offer was also expanded throughout the year. VTB Online made it possible for any Bank’s client to submit a loan application and to receive a loan entirely through remote channels.

In 2019, special attention was paid to optimising the Bank’s risk procedures and its policy on limits when formulating proposals for cash loans and refinancing, which enabled the Bank to create portfolio growth in 2019 by balancing generations of loan in terms of their risk profile.

In 2019, the Bank introduced a new product for refinancing car loans that makes it possible to refinance car loans both at third-party banks and at VTB. In December, the Bank began lending for the purchase of new used cars with no down payment. The Bank made a substantial update to its lending terms for the purchase of motorised vehicles and launched the first joint federal programme with the motorcycle manufacturer Yamaha.

Partnerships with leading automakers were also developed in 2019. During the year, partnerships were established and joint lending programmes launched with manufacturers such as Honda, Changan and Yamaha.

In 2019, VTB once again took part in the First Car and the Family Car state programmes offering preferential car loans, in which borrowers received a 10 % discount for the car purchase (25 % for the regions in the Far Eastern Federal District).

As of the end of the year, the share of car loans issued through state–supported programmes amounted to 16 % of all VTB car loans (in terms of the number of loans issued).

VTB also took part in subsidy programmes together with car manufacturers. These programmes offer clients very attractive terms: in some cases, customers were offered annual rates of 2.5 %. The Bank’s key partners in this area are Jaguar, Land Rover, Subaru, Volvo, Suzuki, Lifan and Changan. Some RUB 4.7 billion in loans were issued through these programmes, an increase of 28 % compared to 2018.

A great deal of work was done on the ExTrafort programme, which focuses on VTB’s own clients, as well as clients who come to the programme through online channels. Some RUB 3.5 billion in loans were issued through the programme, which accounted for 4 % of total loans. In 2019, the Bank lowered rates by an additional 1 p.p. for its payroll clients and repeat customers.

In 2019, VTB Bank completed the transition to a new state-of-the-art front-end solution for processing and issuing car loans. The new platform enables the Bank to make decisions and process car loans quickly, and also to accept applications from partners using API technology.

Another innovation is that it allows clients using the Bank’s website to select a car online and immediately receive a preliminary decision on a loan to purchase it.
In 2019, the Bank continued to develop its Multicard product line and offers for clients:

- The Mir-Maestro co-badged card was launched, allowing card payments anywhere in the world;
- Samsung Pay, MiPay and Swatch Pay were launched;
- Top managers involved in a company’s payroll projects were given the opportunity to apply for a free Prime+ package through the payroll programme;
- A pilot was implemented to reduce the time needed to deliver cards to branches in Moscow (one day) and the Moscow region (two days);
- Interest rates on the balance in master accounts were raised in August 2019;
- Client bonus options were transferred to the unified loyalty platform (Cashback, Cos, Restaurants, Collection and Travel options). Clients can now receive simultaneous rewards for purchases in a particular category and for all purchases;
- A digital card (without a physical plastic card) was launched at VTB Online. Digital cards offer all the features of plastic Multicards;
- New services for cards were launched through VTB Online (card activation, setting up or changing the PIN code);
- A process was launched for issuing payroll cards by proxy (for enterprises located in remote locations);
- Cards were issued to juvenile clients (university students) through the payroll programme.

Acquiring projects

- A service (Cash2Card) was launched that enables cardholders with cards from any Russian banks to top them up with cash at VTB ATMs; the service includes agreements with six banks to service their customers through VTB’s ATM network free of charge (with commission paid by the issuer);
- Transfers to cards using the Chinese UnionPay payment system from Russian Visa/MasterCard/MIR cards through the Bank’s website were certified;
- Internet acquiring for UnionPay cards and American Express cards was carried out;
- Scaling of a project was completed that enables travellers to use a bank card to pay for travel in the Moscow Metro at ticket barriers. Each vestibule has at least two ticket barriers;
- Merchant acquiring projects were carried out for the following clients: the 7/31 department store, Leroy Merlin and the Azbuka Vkusa supermarket chain;
- A project was launched that involves the hook-up of an additional processing centre for Sirena Travel, a leader in terms of the distribution of aviation services in Russia;
- The Bank won S7 Airlines’ Internet acquiring tender;
- A licence was received from Visa to accept payments involving high-risk enterprises;
- Cooperation with Yandex Group was expanded and the following new services were connected: Yandex.Auto, Baza.Ru, Yandex.Affisha, Yandex.Drive, Yandex.Wealth, Yandex.Realty and Yandex.Zaproski;
- AllExpress traffic increased;
- An Internet acquiring agreement was concluded with Lomonosov Moscow State University;
- Online communication was launched between the Multicard processing centre and the Bank’s accounting system. This will enable higher-tech information transfer;
- The lines of terminal equipment purchased by the Bank were updated, and three-in-one devices (cash register, bank terminal, fiscal data recorder) were introduced;
- The terminal network was migrated to a single processing centre (Multicard). Devices and online stores that were previously connected to the processing centres of the former Bank of Moscow, the former VTB24 and the North-West Regional Centre are now operating with the same technologies.

Key loyalty programme highlights for 2019

- 5.4 million customers with active bonus accounts;
- 1.3 million purchases using bonus points in 2019;
- Clients spent 12.1 billion of bonus roubles and their own funds on goods and services through the Multibonus catalogue;
- Savings portfolio of RUB 10 billion (total for all programme currencies) as of 31 December 2019;
- Clients paid RUB 1.6 billion of their own funds.

VTB and Post Bank loyalty programmes combined

The combined Multibonus loyalty programme has been available to VTB and Post Bank clients since 1 February 2020. By using their cards to pay for everyday purchases, cardholders can collect bonus points from both banks in a single personal account and exchange them at their discretion for roubles or goods in the multibonus.ru marketplace or through the application.

This is the first and only combined loyalty programme in the Russian banking market to include a combined balance and a single platform for disposing of bonus points.

The combined Multibonus programme allows clients to receive rewards for purchases made using VTB and Post Bank cards and to use bonus points from both banks to pay for goods made by popular brands, air and train tickets, hotel reservations, car rentals, movie tickets, etc.
When a client contacts the Bank to purchase in 2019, the Bank found a way to make the processes of non-core assets through the market. The site currently brings together more functionality and a fully digital client experience. In 2019, VTB Group increased its market share for term deposits in Russia by 0.30 p. to 14.8%. As of 31 December 2019, the Group’s term deposits portfolio amounted to RUB 3.6 trillion (including foreign banks). In 2019, the Bank launched the following new product offers for deposits and savings accounts: • Time for Growth deposit promo from 7 February 2019 to 31 March 2020 (seasonal offer with a maximum rate); • The new Savings (air savings account from 1 March 2019 in the branch network and from 1 October 2019 through VTB Online (interest accrued on daily balances); • Improved terms for Savings (air savings accounts from 1 October 2019 (a higher interest rate for savings of up to RUB 1.5 million; a higher rate had previously been available on savings up to RUB 300 thousand)); • Investment deposits (deposit + mutual funds); • Special Pension deposits for military pensioners (with a higher rate for clients with a military pension certificate). By developing the products offered for savings accounts, the Bank was able to increase its savings accounts portfolio by more than 50% in 2019.

In 2019, a project offering virtual mortgages (VR mortgages) was launched. VTB became the first bank in the market to issue a mortgage loan through a VR mortgage service when a client from Krasnoyarsk completed the purchase of an apartment in St. Petersburg using the service. The VR mortgage service enables clients to use virtual reality goggles to evaluate all the features of a property, including its location on a city map, infrastructure (playgrounds and viewing decks, proximity to the metro and social amenities), layout and detailed potential room designs. During a VR session, the client is accompanied by a virtual consultant who gives the client a detailed overview of the apartment and also discusses the mortgage terms. Using VR goggles, clients can choose and purchase, with the help of a mortgage, their favourite property from accredited

**RETAIL BUSINESS DIGITAL PRODUCTS**

In 2019, a number of digital projects were launched as part of the strategic focus on digitalisation of the Retail Business:

1. **Paperless services in the retail network.** In Q4 2019, VTB Bank launched a Digital Office project, which included the launch of a technology for paperless customer service in the retail network. As of the end of 2019, 155 Bank’s offices had switched to the Digital Office format. Over the course of three months, customers completed 25 thousand transactions through the new digital offices, including applications for cash loans and credit cards, servicing debt and credit cards, as well as opening current and savings accounts.

2. **Digital mortgage.** In December 2019, a pilot project was launched enabling applications for digital mortgages: clients can apply for a mortgage, open a personal mortgage account and get approval for a mortgage loan on the website without visiting a branch office. By the end of the reporting period, more than 3 thousand people had used the service, and more than 1 thousand loans worth RUB 5 billion had been approved. An online service was launched that enables clients to order an apartment appraisal. The service, which has been used by more than 230 thousand clients, enables users to request an appraisal in just a few clicks on a mobile phone or computer and is available 24/7. A quarter of all appraisals are completed in one day.

3. **Multicard.** Since 1 February 2020, holders of Multicard, Multicard Privilege and Prime packages have been eligible to receive additional income as part of the Savings bonus option not only from balances in savings accounts but also from deposits.

### VTB ONLINE REMOTE BANKING SERVICE

**With steady growth, the number of active users of VTB Online system (available on the Bank’s website and through the mobile application) has reached 8 million.**

In 2019, 59% of deposits and 39% of savings accounts were opened through VTB Online, and 10% of loans were issued through the VTB Online system.

**The VTB Online mobile application now has 6.3 million users.**

Card-to-card cash transfer

1. Pursuant to the agreements signed by the banks, the Russian Agricultural Bank’s non-core assets are presented in the marketplace, and users can get advice regarding such assets and make a purchase.
VTB developers in Moscow, St. Petersburg, Sochi, Krasnodar and Kaliningrad. The project presents about 100 of the Bank’s flagship card products, the Multicard. A digital card can be issued within seconds and is ready for use immediately. This is a new, fast and convenient way for VTB’s clients to receive a card. For the Bank, this is an important step towards a fully digital experience in applying for, receiving and using card products. The digital Multicard is a full-fledged debit card in an online format that can be issued in any of three currencies: RUB, USD or EUR. Cardholders can set their PIN code, decide on how they want to be notified about transactions and also choose an option for the bonus programme. In December, more than 15 thousand digital cards were issued.

4. **Digital loans.** In 2019, the volume of digital loans issued increased by 2,70 % to RUB 64.6 billion. This accounted for 10 % of digital sales compared with 2 % in 2018. The increase in the share of digital sales among total sales was facilitated by:

- Automation of the process of issuing pre-approved loans through VTB Online;
- Reduction of the time needed to issue pre-approved loans;
- Launch of online loans: clients can now apply for a loan and receive money without visiting a branch (through VTB Online).

5. **Payment for services using a QR code.** At the end of 2019, the VTB Online system made it possible to pay for regular purchases using a QR code; more than 10 % of the Bank clients used this option to pay bills in December 2019. The ability to pay using a QR code through the Bank of Russia’s Faster Payments System was also added. Now, the Bank’s customers can pay for purchases in stores connected to the Faster Payments System using the VTB Online mobile application.

6. **Biometrics.** In November 2019, VTB launched its own biometrics platform and began getting consent from clients for the use of biometrics and collecting voice samples from clients through the contact centre. Over a month and a half, more than 12 thousand clients gave consent, and more than 7 thousand samples of voice biometrics were collected. The use of this technology will improve customer security and reduce the risks posed by social engineering.

7. **Transfers.** Advances in transfers by a telephone number or card number facilitated a 49 % increase in the portfolio of active users of P2P transfers. A number of factors contributed to the development of P2P interfaces; joining the Faster Payments System, which was used by no fewer than 45 banks as of the end of 2019; and the ability to make transfers by a telephone number between holders of Visa and MasterCard bank cards.

8. **VTB Mobile.** On 25 September 2019, the Bank launched its virtual mobile operator, VTB Mobile, which uses Telco’s radio access network and infrastructure. Sales of VTB Mobile SIM cards were launched at several branches in Moscow in September 2019 and in St. Petersburg in October 2019. The process of issuing a SIM card takes no more than five minutes thanks to the close integration between the back end and the telecoms IT platforms, while the vast majority of subscribers use the VTB Mobile application. Thanks to VTB Mobile, the Bank was able to attract new clients and reactivate existing Bank clients.

SERVICES FOR HIGH-NETWORTH CLIENTS

In 2019, VTB Group continued working hard to attract high-net-worth customers. During the reporting period, emphasis was placed on diversification of the portfolio under management. The number of high-net-worth individuals who are clients of the Bank reached an all-time high in 2019, exceeding 500 thousand customers. During the year, the client base increased by 75 thousand to 553.6 thousand people. At the same time, the average client balance increased from RUB 3 million to RUB 3.2 million.

**Faster Payments**

In December 2019, more than 15 thousand digital bank cards through VTB Online were issued. Now clients can receive a digital debit card and use it without the need for a plastic card, while retaining all the advantages of the Bank’s flagship card product, the Multicard. A digital card can be issued within seconds and is ready for use immediately. This is a new, fast and convenient way for VTB’s clients to receive a card. For the Bank, this is an important step towards a fully digital experience in applying for, receiving and using card products. The digital Multicard is a full-fledged debit card in an online format that can be issued in any of three currencies: RUB, USD or EUR. Cardholders can set their PIN code, decide on how they want to be notified about transactions and also choose an option for the bonus programme. In December, more than 15 thousand digital cards were issued.

**VTB’s Family Office**

In 2019, VTB’s Family Office was recognised as the best in Russia at the ninth Moscow Forum of Family Offices organised by Hansa Fincon for HNWI clients and key players in the private wealth management market. As of the end of 2019, investment products accounted for more than half of new funds under management. The portfolio of investment products managed by VTB Private Banking increased by 50 % in 2019 to RUB 656 billion. The share of premium clients with investment and insurance products increased from 41 % to 50 %.

Premium clients also purchased VTB bonds, which are a good alternative to deposits, as they offer higher yields. In 2019, VTB’s portfolio of VTB bonds among premium clients increased by 130 % to RUB 89 billion.

VTB Private Banking is in constant contact with its customers, having conducted around 40 customer events and various forums in 2019, which made it possible to promptly respond to all customer inquiries.

An updated Prime package was launched in 2019, which was developed on the basis of the Multicard product. The number of clients holding a Prime package increased by 25 % to 15,389 clients.

The main drivers for the development of VTB Private Banking segment in 2019 were synergy with the corporate division, a new model for the sale of investment products and the fact that VTB formed a professional team that is able to give VTB Private Banking customers a level of investment expertise previously available only to large institutional investors.

One of the fastest-growing areas of VTB Private Banking in 2019 was the Family Office. The number of VTB Family Office customers increased by 40 % during the year.

In 2019, VTB’s Family Office was recognised as the best in Russia at the ninth Moscow Forum of Family Offices organised by Hansa Fincon for HNWI clients and key players in the private wealth management market.

VTB Private Banking won the prominent Euromoney Private Banking and Wealth Management Survey on investments and service for business owners.
INVESTMENT SERVICES FOR RETAIL CUSTOMER

2019 was a record-setting year for the Bank in terms of sales of investment insurance products. In terms of sales of mutual funds, the Bank became the absolute leader by increasing its portfolio by RUB 56 billion, which accounted for about half the growth of the pooled investment market in the country.

Amid stagnation in the market for investment life insurance (LI), the Bank increased its sales of LI by 16 % year-on-year to RUB 17.9 billion.

VTB had a banner year in terms of attracting customers investing in the stock market, with clients opening 565 thousand new brokerage accounts (3.33 thousand new clients and 231 thousand new personal investment accounts). This was the result of the new sales model introduced across the board in 2Q 2019 and the inclusion of mass retail clients in the process.

An Investment Advisor service was launched for VTB clients: this was the first software algorithm certified by the Bank of Russia in accordance with the requirements of Federal Law No. 397-FZ. Investment Advisor is a service that recommends an investment portfolio through a brokerage account in accordance with the client’s risk profile. The service involves not only the initial composition of the portfolio but also further monitoring and review of the portfolio, if necessary. The service is provided free of charge for the Bank’s clients.

During the reporting period, VTB Bank organised, for the first time, the placement of structured bonds with a coupon payout that depends on the performance of the underlying assets and that provide an opportunity for higher returns for investors. One must typically be a qualified investor to invest in such products, which are placed in large lots in the OTC market. Structured bonds with a minimum lot of RUB 50,000 and no qualification requirements enable every retail client of the Bank to access this type of product.

As part of efforts to improve the services available through the VTB My Investments application, fees were changed, and a new currency exchange functionality was launched. Bank clients can now exchange as little as one unit of a particular currency at market rates.

SOCIAL PROJECTS AND WORK WITH SPECIAL SEGMENTS

In 2019, a comprehensive product offer was made available to pensioners and military pensioners (the current customer portfolio includes 15.7 thousand pensioners):

• Deposits for military pensioners (+0.1 % above the standard deposit rate);
• Lending at a preferential rate for non-working pensioners, including military personnel;
• The possibility of changing one’s pension provider through bank branches even if the client has a crisis (the existence of a verified account on the State Services portal is a prerequisite).

The large-scale issue of campus salary cards for higher education institutions based on the Multicard product began, enabling the Bank to increase its portfolio of salary cards in the education sector by more than 100 thousand cards and to increase customer interest in using the card not only as a financial instrument but also for other non-financial services (transport, entry pass, access to electronic document management systems, etc.). The Bank provided support for universities in installing infrastructure (transport, entry pass, access to electronic document management systems, etc.). The Bank provided support for universities in installing infrastructure for serving campus cards.

In 2019, VTB began implementation of its Resident Card project on the basis of its Multicard flagship card product. The Resident Card is a registered multifunctional plastic card offering banking functions and additional non-financial services, such as a travel card, a compulsory medical insurance policy and an individual insurance number, an entry pass for work and educational institutions, an electronic signature and others. The Resident Card is issued jointly with the relevant regional administration and makes possible, among other things, targeted provision and registration of benefits for certain categories of citizens, forecasting and planning regional development, etc.

Resident Card projects include the St. Petersburg Universal Resident Card, which was launched in May. By the end of the year, the Bank had issued 5.4 thousand cards.

In addition, the Muscovite Card was issued based on the Multicard, which enabled the launch of campus projects involving the Moscow Institute of Physics and Technology and the Moscow State Institute of International Relations of the Russian Ministry of Foreign Affairs, with 2,700 cards issued to students enrolled at these universities. A trial issue of the Muscovite Card was launched for various categories of individuals without privileges within salary organisations and at VTB points of sale.

At the end of 2019, pilot sales projects were launched for the issue of the Social Care Card for the Vologda region and the Bank Transport Card for the Nizhny Novgorod region as the first stage of a Resident Card project. Issues related to the Bank’s participation in the issue of Resident Cards were addressed more than 20 regions.

SPECIAL OFFERS FOR VTB BANK SHAREHOLDERS

In 2017, VTB Bank developed a special programme for the Bank’s shareholders that included a comprehensive offer of financial services on preferential terms. The go-ahead for the shareholder benefit programme was given at VTB Bank’s Annual General Meeting of Shareholders on 26 April 2017. On that same day, special service conditions were made available at VTB’s retail branches. The first contribution was processed on the day the launch of the programme was announced. Special service conditions for shareholders became available in all regions where VTB Bank operates since 2018 after merger of VTB and VTB24 Banks.

Preferential terms and conditions for VTB shareholders apply to the Multicard, Privilege and Prime service packages, custody and brokerage services and insurance. Shareholders also have access to reduced rates on cash loans, mortgages and car loans, including when refinancing existing loans from other banks.

In 2019, as part of the Bank’s relations with shareholders:

• Cards were given out to congratulation shareholders who survived the siege of Leningrad;
• A promotion was launched called ‘Welcome bonus points for VTB Shareholders with a St. Petersburg University Resident Card’ (from 2 September 2019 to 30 June 2020);
• Meetings were held with current and potential shareholders of the Bank in the regions where the Bank operates.

The possibility of accessing special conditions for certain products depends on the size of the individual shareholder’s stake in VTB Bank. At the same time, shareholders are not required to provide documents confirming their ownership of shares. The register of shareholders is checked automatically as of its last closing date whenever any branch in VTB’s retail network is contacted.

New functionality – the ability for non-Bank customers to open a brokerage account remotely – was added to the VTB My Investments mobile application. Now, anyone can become a client of the Bank, by downloading the application. Now, anyone can become a client of the Bank, by downloading the application. Now, anyone can become a client of the Bank, by downloading the application. This was a result of the large-scale issue of campus salary cards for higher education institutions based on the Multicard project on the basis of its Multicard flagship card product. The Universal Resident Card was launched for various categories of citizens, forecasting and planning regional development, etc.

In 2019, VTB Bank began operating its single regional network, which consists of 66 regional operational offices, 24 business groups in Moscow and the Moscow region and six business groups in St. Petersburg and the Leningrad region. Branches began operating as operational support centres for the purpose of centralising and optimising a number of business support functions.

A regional network management system was established, and a single administration was established for the combined regional operational offices and business groups. The managers of the regional divisions of the integrated network, who were competitively selected, have broad powers and are responsible for results-oriented business operations in their respective regions.
As of the end of 2019, the regional network had 1,519 offices in 77 regions and 440 cities of Russia, which included:

- A network of sales offices: 688 universal offices (serving individuals and legal entities), 715 retail offices (serving only individuals), 72 corporate offices (serving only legal entities) and four operational cash offices outside the teller network;
- A network of support offices: 23 branches (9 base branches and 13 auxiliary branches, VIP-branches 7,777) and 7 cash offices outside the teller network.

As of the end of 2019, the network development and optimisation plan was fully implemented. In order to make banking services available to more people, 55 new offices were opened during the year, 24 of which are in new cities. In 2019, 23 projects to optimise the infrastructure of the existing network were implemented, and 16 inefficient offices were closed, which enabled the bank to get rid of excess space and reduce costs.

In order to universalise offices a project was implemented in 2019 to unify offices situated in one location – 115 points of sale in Moscow. A service support model for the regional network through support units was developed and approved.

The Development Strategy for the integrated network to 2022 was adopted. In accordance with the Development Strategy, new technological office formats will appear in the regional network, the network will be more efficient, and network costs will be reduced.

NON-BANKING FINANCIAL BUSINESS OF RETAIL BUSINESS GLOBAL BUSINESS LINE

VTB’s non-state pension fund

Non-state Pension Fund VTB Pension Fund (hereinafter, “the Fund”), a fast-growing non-state pension fund in Russia and one of the leading players in the Russian market, provides a full range of services for compulsory pension insurance (service individuals and legal entities), 715 retail offices (serving only individuals), 72 corporate offices (serving only legal entities) and four operational cash offices outside the teller network;

As of the end of 2019, the Fund was managing more than RUB 257 billion, up 30 % from 2018. The amount of pension savings (compulsory pension insurance) totalled RUB 245.4 billion (29 % growth), while the amount of pension reserves under non-state coverage totalled RUB 7.1 billion (65 % growth).

The Fund pursues a balanced investment policy that offers an optimal combination of high return and maximum investment security, ensuring the preservation and accrual of customer funds. In 2019, the yield on pension savings allocated to the Fund’s customer accounts reached 8.66 %. Thus, the accumulated yield amounted to 51.26 %, and the average annual yield for five years was 8.63 %.

The yield on pension reserves as part of the programme for non-state pensions amounted to 8.16 % through a balanced investment portfolio and 5.54 % through a conservative investment portfolio.

Since 2015 (over five years), the yield for participants in non-state pension programmes has increased 49.56 % through investment income accrued by the Fund through a balanced pension portfolio and 42.80 % through a conservative pension portfolio, which corresponds to average annual returns of 8.16 % and 7.39 % per year, respectively.

As of the end of the reporting period, the Fund was serving about 2.7 million customers. In 2019, the Fund was Russia’s fifth-largest by pension assets under management.

In March 2019, the Expert RA ratings confirmed the Fund’s rating of ruAAA (the highest level of creditworthiness/financial reliability/financial stability), with a stable outlook. Thus, the Fund has had the highest possible financial reliability rating for seven consecutive years.

The Fund is working on the introduction of digital technologies. A new website for the Fund was developed and launched, the Personal Account service was updated, functionality was added to enable the Fund’s clients to calculate social tax refunds, and functionality was added making it possible to submit applications for private pension payments online. Further upgrading of the service is under way for accepting contributions for non-state pension programmes within the framework of the VTB Multibonus programme (a format unique to Russia).

The Fund successfully implemented a project on the provision of non-state pensions for high-net-worth clients through VTB Bank’s retail network. In 2019, the Mergot non-state pension fund was acquired for the purposes of further consolidation. Including Mergot, the fund’s assets amounted to more than RUB 274 billion, and the fund serves a total of 2,958 thousand clients.

The Financial Elite of Russia awards jury named the Fund the winner of the 2019 Financial Elite of Russia award in two categories: Reliability and Best Customer Service.

POST BANK JOINT VENTURE

In September 2018, VTB Group and Russian Post signed additional to the shareholder agreement regarding Post Bank, which resulted in Post Bank becoming a joint venture for the Group. VTB Group treats its investment in Post Bank as an investment in a joint venture that is accounted for using the equity method. VTB Group maintains close cooperation with Post Bank. As a shareholder, VTB Bank receives profit insofar as Post Bank continues its successful growth.

As of the end of 2019, Post Bank’s gross loan portfolio had increased by 35 % before provisions to RUB 411 billion. Post Bank’s cash loan portfolio increased by 35 % and to RUB 344 billion, its RDS loan portfolio increased by 24 % to RUB 46 billion, and its credit card portfolio increased by 42 % to RUB 21 billion.

Post Bank’s retail customer deposits and accounts increased by 24 % to RUB 391 billion, while its volume of term deposits increased by 10 % to RUB 249 billion. Customer deposits in savings and current accounts increased by 61 % to RUB 142 billion.

In 2019, Post Bank’s client base increased to 13.4 million customers (an increase of 3.5 million people). The number of pensioners receiving a pension through Post Bank showed impressive growth, increasing by 54 %. As of 31 December 2019, the Bank was providing pension services to a total of 1,844 thousand pensioners (up from 869 thousand as of the beginning of 2019).

During the reporting period, Post Bank’s regional network maintained its position in terms of the number of points of presence (more than 19 thousand), while, at the same time, expanding its geography of operations. As of the end of 2019, Post Bank was operating in 8,136 communities (up from 6,075 communities at the beginning of the year).

Post Bank expanded its geography of operations by connecting Russian Post’s offices in rural areas to an agency network.

Post Bank’s ATM network included 4,805 devices as of 31 December 2019. As part of the development of Russian Post’s acquiring project, Post Bank installed 56 thousand payment terminals at Russian Post offices that make it possible to pay for postal services, as well as withdraw and deposit funds onto Post Bank cards at post office cash counters.

Rapid growth in remote banking channels was observed during the reporting period. The number of active users of remote banking services increased by 31 % to nearly 5 million people.

In June 2019, VTB Capital Investments and Post Bank signed an agreement to provide brokerage services to Post Bank’s customers through VTB Bank. The partnership has been effective in attracting customers and expanding the range of banking products available.
RISK MANAGEMENT

POLICY, ORGANISATION AND STRUCTURE OF RISK MANAGEMENT

VTB GROUP-LEVEL RISK MANAGEMENT

The main risks that VTB Group is exposed to are credit risk, market risks (including risks associated with changes in the market prices of financial instruments, interest rates and foreign exchange rates), liquidity risk and operational risks (including legal risks), as well as individual sub-types of concentration risk (risk of credit concentration within a group of borrowers, risk of credit concentration in the hypothetical event of unexpected losses as a result of risks taken), market risks (including risks associated with changes in the market prices of financial instruments, interest rates and foreign exchange rates), liquidity risk and operational risks (including legal risks), as well as individual sub-types of concentration risk (risk of credit concentration within a group of borrowers, risk of credit concentration in the hypothetical event of unexpected losses as a result of risks taken), and operational risks (including regulatory risks). Risk appetite is determined in accordance with regulatory requirements and international practice. One of VTB Group’s key principles of risk management is to take the Group’s risk appetite into account when managing its activities. Risk appetite is determined in accordance with regulatory requirements and international practice. This approach involves the identification and oversight of the Group’s overall target risk level and risk profile in accordance with its strategic objectives and the integration of risk appetite into business planning and risk management procedures.

A high-level risk appetite for the Group includes the following key provisions:

• The size of potential losses on risks accepted by the Group should not reach a level that would lead to the cessation of the Group’s operations, including under stress conditions;
• Group’s companies must have enough capital to secure the interests of creditors in the hypothetical (extremely unlikely) event of unexpected losses as a result of risks taken;
• The structure of the Group’s operational cash flow and liquidity reserves should ensure the timely fulfilment of obligations to clients in the short and long term;
• The structure of assets and liabilities must ensure the efficient use of resources and comply with the Group’s business model;
• The level of risk involved in the decision-making process must be assessed and monitored on an ongoing basis, and the impact of activities must also be assessed on an ongoing basis while taking risks into account;
• As part of its operations, the Group must try to avoid a high degree of concentration of credit risk in counterparties, industries and countries / regions with a high level of risk;
• Sustainable development and economic efficiency in the long term;
• Compliance with the regulatory requirements of the Bank of Russia, the recommendations of international bodies, as well as the requirements of local (foreign subsidiaries) or industry regulators;
• Maintaining an impeccable reputation, avoiding actions that could result in harm to the Group’s reputation;
• Maintaining and improving credit ratings granted by international rating agencies (without state support);
• Transparency of risk-associated activities for shareholders, investors and other interested parties (primarily by disclosing the relevant information as required), taking into account their interests;
• Analysing and managing risks on a consolidated basis, covering all of the Group’s Russian and foreign banks, as well as its key financial companies;
• Optimal distribution of risks within the Group, minimising exposure and potential losses from risks in markets where the Group operates;
• Developing a risk management culture within the Group’s companies, including improving employees’ skills in terms of identifying and preventing possible risks and losses in their areas of responsibility;
• Providing the risk management function with sufficient resources, introducing modern methods for assessing and monitoring risks and automated risk management systems based on industry best practices.

The Group’s risk management system has a multilayered structure, which includes consolidated (Group-level) and local-level risk management, with a high degree of centralisation of the Group’s risk management function. The risk management system is built around the Group’s global business lines (Corporate-Investment Business, Medium and Small Business, Retail Business) and is based on the harmonisation of approaches to managing risk, including through the coordination of competencies exercised by the Group’s specialised risk divisions.
The standard organisational structure of the Group’s banks and financial companies includes an independent risk assessment and control division that corresponds to the appropriate risk profile, specific features and scale of the business, as well as a senior manager responsible for comprehensive risk management.

The organisational structure of risk management within VTB Group includes the following:

- Collective bodies responsible for coordination within the Group;
- Collective bodies within VTB Bank as the parent bank of the banking group (since the fourth quarter of 2019);
- Headquarters (the Group’s chief risk manager and the Group’s specialised risk divisions);
- Management bodies at the local level, collective working bodies (committees), structural divisions/authorised officers within Group companies.

Control over the organisation of risk management and the risk management policy within the Group’s companies is carried out on a systematic basis, primarily through corporate governance (including through the representation of VTB Bank on subsidiaries’ supervisory councils/boards of directors), as well as through the Group’s specialised risk divisions. Key internal regulations of subsidiaries related to risk management are approved by governing bodies, taking into account the contribution of the specialised risk divisions.

During the year, the Group continued implementation of the development strategy of its risk management system for 2017–2019, as well as work on the long-term development programme for the Bank for 2014–2019, which was approved by the Bank’s Supervisory Council on 11 November 2019.

The main strategic objective in risk management is to minimise potential financial losses from exposure to the risks faced by the Bank’s operations; ensuring financial strength and long-term sustainable growth for the Bank in accordance with the strategic objectives specified by the Supervisory Council.

VTB Bank’s Development Strategy aims to create an integrated risk management system that corresponds to the nature and scale of the Bank’s operations and risk profile, and that enables further business development in line with economic conditions and the Bank’s needs.

The Bank’s risk management is developed and improved in accordance with legal regulations and recommendations of the Bank of Russia, as well as generally accepted international standards and banking best practices.
VTB Bank’s risk management system comprises the Supervisory Council and the Bank’s executive bodies, credit committees, the Retail Risk Committee, the Financially-motivated, the Credit and Market Risk Management Committee and other special committees and structural units involved in risk management processes.

The main divisions responsible for developing the risk management system and controlling significant risks assumed by VTB Bank and VTB Group are VTB Bank’s Corporate Credit Risk Department, Integrated Risk Management Department and Retail Credit Risk Department.

**ORGANISATIONAL AND FUNCTIONAL STRUCTURE OF RISKS GLOBAL FUNCTIONAL LINE**

The risks global functional line departments ensure the effective functioning and development of the management system.

Consolidated risks’ analysis and management system

**RISK MANAGEMENT DIVISIONS OF THE GROUP COMPANIES**

Risk management system at local level of the Group companies

- Risks global functional line interaction with global business lines
  - Retail Business global business line
  - Medium and Small Business global business line
  - Corporate-Investment Business global business line

---

**CREDIT RISK**

Credit risk is the risk of incurring losses should a debtor fail to discharge its financial obligations to the Bank in accordance with the terms of their agreement.

**VTB GROUP-LEVEL CREDIT RISK MANAGEMENT**

Credit risk at VTB Group is managed simultaneously at the local level with VTB Group companies and at the Group (consolidated) level.

Within the framework of the local credit risk management system, VTB Group companies assume and manage credit risks independently (including through insurance and hedging of risks), within the scope of their authority and limits with regard to risk indicators, and in accordance with national regulations. VTB Group’s companies are responsible for the results of their lending activities and the quality of their loan portfolios and also for monitoring and controlling the credit risks associated with their portfolios.

The key elements of the Group’s consolidated credit risk management are as follows:

- Harmonisation of credit policies (credit risk management policies) of the Group’s companies;
- Development and adoption of common standards concerning credit procedures, decision-making processes, models and methods for managing credit risk to be used throughout the entire Group (including the methodology for assessing counterparties, pricing credit operations, collateral, monitoring, backup and stress testing);
- Establishing consolidated limits and other restrictions within the Group (including limits on counterparties/groups of related counterparties, large transactions, countries, industry sectors);
- Assessing the capital necessary to cover the Group’s credit risks;
- Maintaining a centralised database of the Group’s borrowers, including those requiring particular attention;
- Preparing regular consolidated Financial statements regarding the Group’s credit risk and submitting them to the Group’s governing bodies for review.

Consolidated risk management covers all essential assets and off-balance-sheet operations of the Group’s companies that bear credit risk and that require control over their concentration within the Group as a whole. Within the context of consolidated control and reporting, the scope and range of such operations is determined by the Group’s coordinating bodies.

In 2019, specialised units within VTB Bank, including the Non-Core and Bad Assets Department and the Retail Debt Collection Department, dealt with identifying, monitoring and resolving issues of bad debt at the Group level.

In 2019, the corporate credit risks of subsidiary banks were managed by the Corporate Credit Risk Department. At the Group’s specialised risk division for corporate credit risks, the Corporate Credit Risk Department is responsible for developing common approaches and methods for managing corporate credit risks, for evaluating them on a centralised and systematic basis and for developing the optimal structure of corporate credit risk accepted by the Group, including its compliance with the Group’s risk appetite.

In 2019, the centralised management of retail risks at VTB Bank’s subsidiary banks was carried out by the Retail Credit Risk Department. As the Group’s specialised risk division dealing with credit risks, the Retail Credit Risk Department is responsible for developing common approaches and methods for managing retail risks, for evaluating them on a centralised and systematic basis and for developing the optimal structure of retail risk accepted by the Group, including its compliance with the Group’s risk appetite.

**VTB BANK-LEVEL CREDIT RISK MANAGEMENT**

VTB Bank manages credit risk by:

- Restricting credit risk through the Bank’s existing system of limits, which comply with the Bank of Russia’s mandatory regulations and other requirements. They are reviewed regularly by the Corporate Credit Risk Department and the Integrated Risk Management Department and approved by the authorised collective body;
- Accepting collateral and insurance to cover credit risks, charging adequate fees for the credit risk and establishing provisions for possible loan losses;
- Assessing the level of credit risk assumed by the Bank for each counterparty, as well as regularly monitoring the credit portfolio, individual customers, transactions and collateral (including by ranking borrowers);
• Minimising credit risk at the loan application review stage and taking prompt measures as soon as credit risk factors have been identified through monitoring.

The Bank applies the following main methods of credit risk assessment:
• Determining a customer’s level of creditworthiness by analysing financial and non-financial indicators and conducting an expert assessment (in compliance with the Bank’s internal procedures for ranking), the level at which a customer (or a group of related customers) is ranked is taken into account when determining the cost levels of loan transactions; assessing retail credit risks by means of scoring models and automated credit-related decision-making procedures, as well as verifying/assessing client data (the client’s financial position, social variables, credit history);
• Analysing the level of concentration of the Bank’s credit risk for individual borrowers (or a group of related borrowers), industries, countries, customer segments, types of credit products;
• Estimating possible losses from credit risk in the process of calculating and creating provisions for possible losses (in compliance with the requirements of the Bank of Russia and IRBA);
• Assessing capital adequacy and the scale of credit risk when calculating the required ratios established by the Bank of Russia;
• Determining internal capital needs (capital calculation) for credit risk, taking into account the actual quality of the loan portfolio (as required by the Bank of Russia and the standards set by the Basel Committee on Banking Supervision);
• Conducting stress testing of loan portfolio losses, taking into account different macroeconomic scenarios.

The main tool for credit risk monitoring and mitigation is the system of established credit limits.

The key types of credit risk limits are:
• Limits on the aggregate level of credit risk for the loan portfolio overall and for individual segments of the loan portfolio;
• Limits restricting the level of risk for a particular customer (or a group of related customers).

These limits include limits for operations with a customer (or a group of related customers), including sub-limits for various types of operations with a credit risk / designated purpose (credit limits, documentary limits, limits on trading activities, limits on transactions with debt securities, etc.);
• Limits on the concentration of credit risk (by industry, country, credit products);
• Credit and deposit limits are established for credit organisations (including overdraft sub-limits, nostro accounts, provision of funds), limits on trading operations, limits on transactions with debt securities, and limits on contingent liabilities;
• Limits in accordance with the requirements (mandatory regulations) of the Bank of Russia.

The Bank employs collateral to reduce credit risk.

LIQUIDITY RISK

Liquidity risk means the risk that the Group or a Group company will be unable to finance its activities, i.e., to ensure asset growth and settle liabilities as they become due without incurring losses in an amount that would threaten the financial stability of the Group and/or a Group company.

VTB GROUP-LEVEL LIQUIDITY RISK MANAGEMENT

Liquidity risk management involves a set of measures used to manage the Group’s assets and liabilities with the aim of maintaining the Group’s ability to meet its obligations while ensuring an optimal balance between the level of liquidity risk and profitability of the Group’s operations.

The VTB Group Management Committee and Assets and Liabilities Management Committee (until 4Q 2019) / VTB Bank’s Finance Committee (since 4Q 2019), and VTB Bank’s Treasury Department and the Market Risk Division of the Integrated Risk Management Department all play a role in the Group’s liquidity risk management process.

The VTB Group Management Committee determines the Group’s general policy in the area of liquidity risk management, sets limits and triggers for VTB Group’s liquidity risk appetite, and also reviews reports on the status of VTB Group’s liquidity risk as part of reports on Group’s risks.

The Group Assets and Liabilities Management Committee (until 4Q 2019) / VTB Bank’s Finance Committee (since 4Q 2019) approves the Regulation on the Procedure for Managing Liquidity Risk in the Group, approves the Group’s liquidity risk assessment methodology, monitors the Group’s liquidity, and makes decisions on measures related to the management of the Group’s assets and liabilities with the aim of ensuring the required level of liquidity and growth of the Group’s assets.

Liquidity management is applied at the Group level based on bylaws approved by the Group’s Management Committee. Within the Group, liquidity management is based on the following principles:
• Each bank/company within the Group manages its own liquidity on a separate basis to meet its obligations and comply with the requirements of the national regulator and the recommendations of VTB Bank;
• VTB Bank manages the Group’s liquidity by centrally controlling and managing the key measures taken by the Group.

Methods for controlling and reducing the Group’s liquidity risk include monitoring compliance with the established appetite for liquidity risk and with the regulatory limit and the net stable funding ratio set by the Bank of Russia for the short-term liquidity of a banking group, as well as calculating the amount of capital needed to cover liquidity risk.

VTB BANK-LEVEL LIQUIDITY RISK MANAGEMENT

Liquidity risk management involves a set of measures used to manage the Bank’s assets and liabilities with the aim of maintaining the Bank’s ability to meet its obligations while ensuring an optimal balance between the level of liquidity risk and profitability of the Bank’s operations.

The Bank has current and forecast liquidity risk management in place. Managing current liquidity entails short-term forecasting and management of cash flows in respect of currencies and terms (time frames) so that the Bank can ensure that it will meet its obligations, complete settlements on behalf of its customers and fund ongoing operations.

Current liquidity management is carried out by the Treasury Department based on a real-time (intraday) determination of the Bank’s current payment position and forecast future payment position, taking into account the payments schedule and other scenarios.

The objective in forecast liquidity management is to develop and implement instruments to manage assets and liabilities to support the Bank’s instant funding capability, and to plan increases in its asset portfolio by optimising the ratio of liquid assets and profitability.

The Bank achieves this by making long-term liquidity forecasts and by adhering to internal liquidity standards (standards for liquid assets and the liquidity standard for the treasury securities portfolio), as formulated by the Assets and Liabilities Management Committee. The liquidity accounting standards of the Bank of Russia are also applied when carrying out forecast liquidity management.

Each forecast includes receivables and payments according to the contractual terms for operations, while also taking into account planned transactions, possible extension of clients’ funds (deposits and promissory notes) and possible outflows of untradeable “on-demand” capital (clients’ settlement and current accounts, as well as loan accounts).

In addition, the Integrated Risk Management Department conducts stress testing to assess risk factors that can have an impact on the Bank’s liquidity forecast. Liquidity gaps are closed through new borrowings and the renewal of existing deposits. The Group’s medium-term liquidity is managed by attracting interbank loans and customer deposits, repo transactions and secured loans from the Bank of Russia. The currency structure of liquidity is managed by conducting “conversion swap” transactions.

A significant proportion of VTB Group’s liabilities is represented by customer deposits (deposits, promissory notes, current accounts of corporate and retail customers), resources from the Bank of Russia and interbank deposits.

Although a considerable portion of customer liabilities are short-term deposits and “on-demand” accounts, the diversification of these liabilities and VTB’s past experience indicate that these liabilities are consistently refinanced by customers, and they are, for the most part, a stable source of funding. The stable element of short-term customer liabilities is determined for various currencies using a statistical trend analysis of the cumulative balances of these accounts over time.
Money-market instruments (interbank loans and deposits, repurchase agreements) are used to control short-term liquidity and are not considered as a source of funding for long-term assets.

Methods for controlling and reducing liquidity risk include:

• Monitoring compliance with established internal limits and regulations, including appetite for liquidity risk;
• Analysing liquidity risk using a set of quantitative and qualitative indicators;
• Implementing forecasting, situational modelling and scenario analysis of the Bank’s liquidity;
• Calculating the amount of capital needed to cover liquidity risk;
• Monitoring calculated gaps taking into account the scenario analysis of the Bank’s liquidity for various time periods to identify disparities between receivables and payables;
• Identifying and analysing the impact of internal and external factors on the Bank’s liquidity, and the forecast for changes;
• Adopting and implementing solutions for management of the Bank’s assets and/or liabilities to maintain liquidity risk at a level that complies with internal and regulatory liquidity ratios;
• Developing a detailed plan of action for mobilisation of liquid assets by the Bank in the event of insufficient liquidity;
• Ensuring compliance with the Bank of Russia’s mandatory liquidity ratios by monitoring actual and forecast values of intra-bank maximum permissible indicators for mandatory ratios.

MARKET RISKS

Market risk is the risk of downward pressure on the Group’s financial results or its capital base due to adverse changes in the value of the Group’s assets/liabilities (claims/obligations) as a result of market conditions, i.e., risk factors. VTB Group has a standing collective body within the Group Management Committee as part of its system for managing the Group’s consolidated assets and liabilities: the Assets and Liabilities Management Committee. The main objectives of the Committee are to address the following issues:

• Management of VTB Group’s assets and liabilities;
• Management of VTB Group’s treasury risks;
• Determining the principles for internal and external pricing within VTB Group;
• Determining approaches to capital allocation within VTB Group according to different types of risks;
• Determining approaches to the redistribution of capital among VTB Group companies.

The main objectives of the Finance Committee in terms of managing the Group’s risks are as follows:

• Improving the risk and capital management system;
• Capital management;
• Managing the currency risk of a structurally open currency position, the interest-rate risk of the bank book, the market risk of the treasury debt securities portfolio, and liquidity risk (including the risk of liquidity sources concentration);
• Determining policies in terms of internal and external pricing and establishing principles for the system for funding operations.

The main objectives of the Credit and Market Risk Management Committee in terms of the Group’s risk management are:

• Improving the system for managing core risks;
• Managing the market risk of the trading book;
• Managing credit risk;
• Managing model risk in terms of credit risks and market risks of the trading book;
• Managing concentration risks (excluding the risk of the concentration of sources of liquidity).

The Regulation on the Procedure for Managing Market Risks (approved by VTB Group’s Market Risk Management Committee, Minutes No 31 of 7 December 2018) in VTB Group establishes procedures for identifying and monitoring market risks, the structure and hierarchy of market risk limits from the level of VTB Group to the level of Group companies and individual divisions, procedures for monitoring compliance with limits and restrictions and for responding in case they are exceeded, and it also specifies the procedure for preparing reports on the Group’s market risk.

According to this Regulation, market risk is assessed and managed in the context of the following types of books:

• A trading book consisting of operations carried out in order to extract profits through their revaluation or hedging of other elements of the trading book;
• A portfolio of treasury debt securities consisting of transactions conducted by the Treasury Department and revalued at fair value;
• A bank book consisting of interest-sensitive instruments that are revalued at amortised cost or instruments used to hedge elements of the bank book. Loans that do not pass the VPI test are counted in the bank book.

Based on an analysis of VTB Group’s portfolio, the following areas of market risk can be identified:

• Interest rate risk of the bank book;
• Currency risk of the bank book and the treasury debt securities portfolio;
• Depending on the nature of the operations bearing currency risk, the Group’s entire currency position is attributed to either the trading book or the bank book;
• Market risk for the trading book and the treasury debt securities portfolio.

INTEREST RATE RISK OF THE BANK BOOK

Interest rate risk management is based on VTB Group’s bylaws and includes:

• Setting standard interest rates for deposits and internal rates for Financing, taking into account current market conditions;
• Calculating interest-rate risk indicators;
• Setting capital limits for covering the interest rate risk for the Group and individual banks;
• Establishing an indicator for the bank book’s appetite for interest rate risk – the indicative value of the sensitivity of net interest income to a change in interest rates.

The main parameters used to assess interest rate risk are:

• the sensitivity of the Group’s interest position to a change in interest rates, measured in terms of the size of the reduction in the net present value of the interest position and the net interest income under an unfavourable change in interest rates, as well as a parallel movement of the yield curves by 100 and 400 basis points; and
• the capital to cover interest rate risk, measured by assessing reductions in the net current value of the Bank’s interest-rate position in the event of likely unfavourable interest-rate movements.

CURRENCY RISK OF A STRUCTURAL OPEN CURRENCY POSITION

The Group uses internal regulations adopted by the Group’s Management Committee to manage its currency risk. It also ensures that the currency of its assets matches that of its liabilities and maintains an open currency position (OCP) in each of the Group’s banks within established limits, including internal OCP limits and the capital limit to cover the currency risk of structural OCP, as well as regulatory OCP limits.

Approved stress scenarios are used to calculate the capital required to cover VTB Bank’s currency risk stemming from structural OCP.

The following are the main parameters for assessing the currency risk of the Group’s structural OCP:

• Calculation of open currency positions in the context of individual currencies and VTB Group companies;
• Calculation of the OCP sensitivity to changes in foreign currency exchange rates of 1 RUB and by 1 %;
• Capital to cover the currency risk of structural OCP.

MARKET RISK OF TRADING OPERATIONS

VTB Group is exposed to market risk through its trading book and its treasury debt securities portfolio associated with a negative revaluation of instruments due to changes in the values of various risk factors, including bond prices, stocks, commodity instruments, exchange rates, interest rates, credit spreads, risk volatility factors and correlations between them.

Although the treasury bond portfolio is separate from the trading book due to the different objectives in conducting transactions involving these portfolios, market risk management for treasury debt instruments is managed in the same way as for the trading book.
To limit market risk within VTB Group, a set of limits is used. All limits can be divided into the following two groups: portfolio limits (VaR limits, stop-loss limits and stress limits) and operational limits that limit the concentration of individual indicators or types of assets in the portfolio.

The Integrated Risk Management Department performs the following market risk management functions for trading operations:

- Evaluate and report on the Group’s market risk profile, reviews the structure of limits and prepares proposals for reducing and managing market risk for the trading book and the treasury debt securities portfolio;
- Monitor a daily basis compliance with the Group’s market risk limits; local market risk limits are monitored by the risk divisions of subsidiary banks also on a daily basis;
- Inform business units on a daily basis about compliance with the Group’s limit discipline.

The results of stress testing are used to assess the market risk of the trading book and the treasury securities portfolio. The methodology used to assess these risk metrics is submitted to the Credit and Market Risk Management Committee for consideration and communicated to VTB Group companies.

Stress testing

The result of the evaluation of the Group’s trading book and treasury debt securities portfolio is modelled on the basis of historical changes in risk factor values (observed under conditions of significant changes in macroeconomic indicators), as well as hypothetical changes in risk factors.

A scenario analysis showed that, in 2019, the greatest impact on market risk would have corresponded with a significant increase in risk-free, rouble-denominated interest rates, corresponding with a significant increase in risk-free, rouble-denominated interest rates, corresponded with a significant increase in risk-free, rouble-denominated interest rates, corresponded with a significant increase in risk-free, rouble-denominated interest rates, corresponded with a significant increase in risk-free, rouble-denominated interest rates.

The Bank uses the following methods to respond to operational risks:

- Minimising risk: developing and implementing the necessary corrective measures to reduce identified risks;
- Taking risk: questions related to whether or not to take a certain risk are subject to approval by the authorized bodies/individuals within the Bank in the event that measures aimed at minimising the risk are not economically feasible;
- Avoiding risk: refusal to carry out a business operation subject to an identified risk if the potential losses as a result of the risk would be critical for the Bank and/or if carrying out the operation in question could jeopardise the economic feasibility of the activity associated with the risk, and if measures aimed at minimising the risk are not economically feasible;
- Transferring risk (risk insurance): risk insurance involves those operational risks that the Bank is unable to manage and that exceed the Bank’s direct control (including the risk of the loss of collateral pledged to the Bank to secure credit, the risks associated with the transportation and storage of valuables and cash, property risks, etc.).

The Bank uses the following key methods to reduce and limit its operational risk:

- Maintaining an integrated system of ongoing and follow-up internal controls that cover all of the Bank’s divisions and operations;
- Regulations all key operations using internal standards and codes of practice;
- Registering and documenting banking operations and transactions, and maintaining consistent control over primary documents and operating accounts;
- Applying the principles of dividing and limiting employees’ functions, authority and responsibilities; implementing dual controls; collective decision-making; setting limits on the terms and scale of operations;
- Automation banking operations using high-performance IT systems that are constantly monitored and repaired promptly in case of breakdown;
- Operating a well-managed HR policy, good staff training and education;
- Taking preventive steps to ensure the continuity and recovery of activities related to banking operations and transactions by setting up alternative communications channels; geographically distributed server rooms; independent sources of power, heat and water supply; and by taking fire protection measures.

The insurance programmes covering risks related to the Bank’s professional activities in 2019 were provided by insurance against crime under the Financial Institution’s Blanket bond scheme (including electronic and computer crimes), liability insurance for directors and officers of the Group’s companies, insurance for funds and valuables while in storage and during transit, and ATM insurance. VTB Bank also insures against risks related to business activities (including buildings, equipment, and vehicles).

In 2019, the Group took the following steps to develop its system for managing operational risk:

- Development of mechanisms to monitor the level of operational risk at the level of the Bank and the Group’s companies as part of the management of risk appetite;
- Unification of methodological approaches to the operational risk management at the Group level, including risk management of risks related to fraud, IT and information security;
- Further development of the methodology for a unified system of tools to be used for operational risk management at the VTB Group level (collection of data on the occurrence of operational risks and related consequences, self-assessment, key risk indicators, corrective action plans to reduce risks and the consequences thereof, scenario analysis);
- Improving regular reporting on the Group’s operational risks.

Operational risk did not have a significant impact on the Bank’s performance in 2019.
DIGITAL TRANSFORMATION

In 2019, the importance of digitalisation and the introduction of new technologies were highlighted at the national level, with the Government of Russia creating several national projects aimed at introducing state-of-the-art technologies to encourage economic growth and development. The increasing number of citizens who have begun using remote services were the driving force behind this decision. At 78%, Russia has a high degree of Internet penetration — some 95.8 million Russians are using internet on regular basis. For the banking business, this is resulting in the dynamic development of digital services.

The Bank of Russia continues to be an active driver in the development of digital technologies. In addition to launching its National Payment Card System, Russia’s banking regulator invested heavily in the development of a unified biometric system and the Faster Payments System in 2019.

KEY HIGHLIGHTS AND IT ACHIEVEMENTS

<table>
<thead>
<tr>
<th>Highlights</th>
<th>Results</th>
</tr>
</thead>
<tbody>
<tr>
<td>Successfully handled the high season</td>
<td>Demands on IT systems increased by 50% during the high season, with zero downtime</td>
</tr>
<tr>
<td>Advancing IT competencies and creating new ones</td>
<td>Number of developers increased by 131%</td>
</tr>
<tr>
<td>Focus on reliability issues</td>
<td>The reliability indicator as of the end of 4Q 2019 was 99.98%, excluding maintenance windows, while the target is 99.99% by 2022</td>
</tr>
<tr>
<td>All key decisions related to IT architecture were adopted</td>
<td>100% future-oriented technologies; zero obsolete solutions in the Bank’s IT architecture</td>
</tr>
<tr>
<td>Launched and began replicating a new business process</td>
<td>277 Agile/Scrum teams formed (cross-functional teams)</td>
</tr>
</tbody>
</table>

All the above-mentioned factors are reflected in the results of VTB’s work in the areas of digitalisation and technological development. The total number of changes in VTB’s banking information systems increased by 31% in 2019 year-on-year. Most of the changes (more than 9.3 thousand) were made to retail systems.

NUMBER OF CHANGES IN IT SYSTEMS BY GLOBAL BUSINESS LINES

</tbody>
</table>

To improve the stability and reliability of retail systems, a set of measures was developed that is aimed at upgrading server hardware, improving the stability and reliability of systems in the event of a catastrophic incident, and improving the quality of software programming and testing. As a result of these efforts, VTB successfully made it through the high season, the period from October to November, which is traditionally marked by increased customer activity. Despite a significant increase in demand on key systems (considerably greater than expected in some cases), we handled the season successfully.

CORPORATE-INVESTMENT BUSINESS

In 2019, a number of key digital projects were launched as part of the strategic focus on the digitalisation of the Retail Business:

- **Connection to the Faster Payments System for individual transfers using a phone number as the identifier;**

- **Launch of a biometric platform that makes it possible to identify the Bank customers by their face and voice;**

- **Implementation of the Digital mortgage project:** customers no longer need to visit a Bank branch to apply for a mortgage; they can submit an application, provide all the necessary documentation and get a decision remotely through the VTB mobile application;

- **Car marketplace launched:** customers can choose a new car right on the Bank’s website, where they can also receive a car loan;

- **Introduction of chatbots for automated processing of customer requests;**

- **Launch of a robot collector:** reducing personnel costs for initial calls to debtors. The robot is constantly learning, its work is reviewed just like the work of human operators, which enables us to make ongoing changes to scripts.

RETAIL BUSINESS

In 2019, a number of key digital projects were launched as part of the strategic focus on the digitalisation of the Retail Business:

- **Development of digital channels for investments:** VTB Capital Investments and the RBC media holding launched an investment site at [https://quote.rbc.ru/](https://quote.rbc.ru/). The project enables customers to open investment accounts and conclude transactions on the Moscow and St. Petersburg Exchanges. The acquiring service is backed by VTB Bank together with its technology partner, Paymo. The platform is based on an Open API (application programming interface) technology. Using this concept, the VTB platform will be able to create a variety of channels offering broader opportunities to an unlimited number of partners.

- **The Transport Processing system** (used in the Moscow Metro), with its integrated payment aggregation mechanism, made it easier and faster to connect with new carriers. The average number of metro journeys using bank cards increased from 1.7 thousand per day in 2018 to 231 thousand per day in 2019.

- **The introduction of contactless payment for travel using bank cards:** on all Mosgortrans routes led to a rapid increase in the average number of ground transport journeys using bank cards from 1.2 thousand per day at the beginning of the year to 47.4 thousand per day at the end of 2019.

- **Digital tariff management:** The process of managing the Bank’s tariff policy has been completely digitised: revenue from the acceleration of processes and the flexibility of the tariff policy for customers of the Corporate-Investment Business and Medium and Small Business global business lines is expected to amount to RUB 300 million through 2022; automation will optimise the labour costs of operational support units for servicing tariff decisions.

- **Remote banking:** VTB continues to develop the functionality of remote banking services for legal entities as part of the RBS 2.0 project. The number of functionalities implemented during the year as part of RBS 2.0 increased from 13 % to 60 %.

The total number of customers reached 78 thousand, while the average time for processing accounts decreased by 72%. With the introduction of new functionalities, measures to ensure the reliability of the system were improved; as a result, the number of incidents decreased by 60%.
As of the end of 2019, the accelerator portfolio included 29 pilot projects involving technological start-ups in the following areas:
• Voice assistants to reduce call centre costs;
• Tools to personalise client communications;
• Voice-analytics to improve the quality of service at bank offices;
• Geomarketing tools for branch network optimisation;

DEVELOPMENT AND INTRODUCTION OF INNOVATIONS

In 2019, intensive work continued on the testing and implementation of innovative technologies and products in the framework of priority development projects (foresight projects):
• A patent was obtained for a blockchain technology to create multi-issue settlement and payment systems (Digital Settlement Service), and pilots were carried out for a system of cross-border transfers, multiple-currency settlements, and instant payments. This was the first time the Bank has patented intellectual property developed in house. The technology will enable VTB to create digital products, services and payment instruments that provide a solution for the problem of accounting for reciprocal payments between an almost unlimited number of participants. These services include Faster Payments System, cross-border settlements, loyalty programmes, etc. Potential users include both individuals and legal entities, including other banks. A multi-issuer system has the potential to reduce costs and increase the efficiency of business processes for all participants.
• A prototype of the Bank’s mobile application was created for the Russian SailFish OS RUS mobile operating system. The application enables users of devices based on SailFish OS RUS to access all of VTB’s main banking services.
• A Digital User Profile project and a module for integrating big data into user profiles were implemented.
• A pilot was launched to expand the customer base of the VTB My Investments service, and the First mortgage loan was issued using virtual reality (VR) technology.
• Integration tools were implemented with external partners via Open API interfaces, including the launch of the RBC Quote project in tandem with the RBC media holding.

VTB corporate accelerator underwent intense development. The project was launched in 2018 as a tool for quickly piloting innovations within the Bank. The goal of the accelerator is to select projects that have promise for VTB’s business and to develop them to a level that would make it easy to integrate their innovative ideas into the Bank’s business.

HOW THE STARTUP ACCELERATOR WORKS AT VTB BANK:

1. A search is conducted for ready-made, innovative startup solutions that can reduce the Bank’s costs or generate additional profit by creating new products and services
2. Quick (up to three months) and low-cost (up to RUB 1.5 million) pilot projects are carried out at the request of functional and business units to assess their potential business impact and technological feasibility
3. Innovative solutions are quickly integrated into the Bank’s existing products and services
Corporate Governance

OVERVIEW OF THE CORPORATE GOVERNANCE SYSTEM

VTB GROUP CORPORATE GOVERNANCE

VTB Group is structured as a strategic holding. This model entails a common single growth strategy for all Group companies, as well as a single brand, centralised management of financial performance and risk, and unified control systems.

Under its current management model, the Group is governed along two key lines:

- **Administrative management** – executing the rights of the parent bank as the main shareholder by allowing its representatives to participate in the management bodies of subsidiary companies;
- **Functional management** – managing the Group’s business, support and control lines within VTB Group as a whole. Functional coordination is a supplementary governance mechanism that provides early-stage expert review of management decisions.

To achieve key strategic objectives, the following business lines have been established within the Group: Corporate-Investment Business, Medium and Small Business, Retail Business (for more information on the global business lines and their performance, see Results overview).

The Group’s Corporate Centre sets the Group’s overall strategic direction and promotes best practices within the Group.

The management system established by the Group enables the Bank to develop a global mechanism for client service, to closely coordinate the work of every business line in all of the Bank’s regions of operation, to increase profitability through synergies between business lines and best practices, and to reduce costs by sharing infrastructure and resources more extensively among the Group companies. Furthermore, this management model is a platform for the effective integration of assets acquired by VTB Group.

VTB Group pays a great deal of attention to improving its governance system, which is designed to comply fully with corporate and antimonopoly legislation in countries where the Group operates.

VTB BANK’S CORPORATE GOVERNANCE SYSTEM

Corporate governance at VTB Bank is a system of interactions between executive bodies, the Supervisory Council, shareholders and other stakeholders aimed at protecting the rights of shareholders and investors, improving the Bank’s investment attractiveness and the transparency of its operations, creating effective risk assessment mechanisms that can have an influence on the Bank’s value, and ensuring the effective use of funds provided by shareholders (investors).

The Bank’s corporate governance system is based on the principle of unconditional compliance with legislative requirements and the requirements of stock exchange operators in Russia and abroad. It is also focused on the recommendations of the Corporate Governance Code (the Code) approved by the Bank of Russia’s Board of Directors on the 21st of March 2014, the recommendations of the Basel Committee on Banking Supervision and of the Financial Stability Board that are applicable to financial institutions, as well as international best practices and standards of corporate governance.

The principles and procedures of the Bank’s corporate governance are enshrined in bylaws, the most important of which is the Bank’s Corporate Governance Code (approved by the Bank’s Supervisory Council in 2015, minutes No. 27 of 11 December 2015).
The Bank’s corporate governance system is based on the following principles:

- Equal and fair treatment of all shareholders, providing shareholders with opportunities to exercise their rights and protect their legitimate interests;
- Professionalism and accountability of the Supervisory Council, active participation on the part of independent directors as well as members of the Supervisory Council nominated by the Bank’s minority shareholders in the management of the Bank;
- Implementation of strategic management of the Bank by the Supervisory Council and its effective oversight of the activities of executive bodies and of the functioning of the risk management system and internal control;
- Reasonable, conscientious and effective management of the Bank’s ongoing operations by executive bodies and key executives;
- Compliance with the laws of the Russian Federation and the national laws of the countries where the Group’s companies are located;
- Corporate social responsibility;
- A highly ethical approach to business and zero tolerance for corruption;
- Complete, transparent, reliable and timely disclosure of information;
- Equal and fair treatment of all shareholders, including issues related to strategy development and implementation, as well as improving corporate governance practices.

The Bank and its minority shareholders created a Shareholders Consultative Council, an independent expert consultative and advisory body consisting of minority shareholders whose meetings are also attended by members of the Bank’s Supervisory Council and executive bodies. Members of the Shareholders Consultative Council play an active part in VTB Bank’s activities, discussing with the Group’s top management the most pressing issues concerning the interests of shareholders, including issues related to strategy development and implementation, as well as improving corporate governance practices.

VTB adheres to a policy of full and timely disclosure of reliable information, giving shareholders, investors and counterparties the opportunity to make properly informed decisions. Information is disclosed in compliance with Russian legislation and the requirements of the UK financial regulator, the Financial Conduct Authority. The Bank’s Supervisory Council has approved the VTB Bank Regulation on Information Policy (Minutes No 18 as of 1 December 2017), which is posted on the Bank’s website and specifies the ways in which information may be disclosed, as well as the time frame for such disclosure and the forms such disclosure may take; it provides a list of information that the Bank has taken on a duty to disclose, as well as measures to ensure compliance with the Bank’s Information Policy.

The Bank regularly publishes its financial results in accordance with both Russian and international standards and provides for all stakeholders to obtain the most up-to-date information on VTB Group’s activities as quickly as possible, the Bank publishes information from its IFRS management reporting on a monthly basis in addition to quarterly and annual reports.

### DEVELOPMENT OF CORPORATE GOVERNANCE IN 2019

The Bank views improving its corporate governance system as an integral part of its work to improve the efficiency and the results of its activities; the corporate governance system is also subject to constant monitoring by the Bank’s Supervisory Council and executive bodies.

VTB Bank closely monitors the development of corporate legislation and practices and carries out continuous work to improve the corporate governance system within the Bank and the Group companies by applying international standards and the best Russian and international practices.

The Bank and its minority shareholders were also elected a new Statutory Audit Commission, which retained a place for a representative of minority shareholders.

In 2019, the Bank continued to implement the Action on the Implementation of Provisions of the Corporate Governance Code (approved by VTB Bank Supervisory Council, Minutes No 4 as of 27 May 2015), which is the main source of guidance for improving the Bank’s corporate governance system.

During the reporting period, in accordance with a decision (recommendation) of the Bank’s Supervisory Council Staff and Remuneration Committee (approved by VTB Bank Supervisory Council Committee, Minutes No 79 as of 30 September 2015), an external assessment of the work of the Supervisory Council was conducted for the first time. The assessment also evaluated the work of the Supervisory Council committees, the Chairman of the Supervisory Council and the Bank’s Corporate Secretary. The Russian Institute of Directors (RID) was hired to conduct the assessment. The RID is recognised for its expertise in the field of corporate governance and for its assessment of the performance of boards of directors in Russian companies.

During the assessment, the members of the Supervisory Council were interviewed and completed questionnaires. The assessment also involved an analysis of the Bank’s by-laws, which enabled the RID to maximise the objectivity of its assessment of every essential aspect of the activities of the Supervisory Council in such key areas as strategy development and monitoring strategy implementation, performance in relation to internal control and risk management systems, oversight of the activities of executive bodies and the establishment of an effective incentive system.

According to the assessment, the work of the Supervisory Council was praised by both the members of the Supervisory Council themselves and by RID experts. The assessment concluded that the Supervisory Council was highly engaged in decision-making on key issues concerning...
the Bank’s operations while maintaining its focus on strategic management. In addition, the Bank’s use of advanced tools for organizing the work of the Supervisory Council, the high-profile role of the Chairman of the Supervisory Council in improving the Council’s performance, and the high level of information and organisational support for the activities of the Supervisory Council provided by the Bank’s Corporate Secretary noted as strengths.

At the same time, the assessment highlighted areas in which the activities of the Supervisory Council and its committees can be improved. These include issues related to updating the current implementation system of the Council’s members, expanding the Supervisory Council to include candidates with competencies in the areas of digitalisation and information technology, issues related to the establishment of programmes and the organisation of training for members of the Supervisory Council, and increasing the number of in-person meetings of the Staff and Remuneration Committee and of the Strategy and Corporate Governance Committee. The report on the assessment of VTB Supervisory Council will be reviewed by VTB Supervisory Council at the in-person meeting in the third quarter of 2020.

During the reporting year, the Bank also conducted benchmarking (comparative analysis) of corporate governance practices in order to establish an objective understanding of the Bank’s current level of corporate governance in comparison with Russian companies that are recognised as leaders in this area. The results of this comparative analysis made it possible to identify the strengths and weaknesses of the Bank’s corporate governance system and to identify areas for further improvement.

As part of the work that the Bank carried out to improve the corporate governance system in its subsidiary companies during the reporting year, corporate governance was assessed in its major subsidiaries, including those outside the Russian Federation. The assessments were carried out through questionnaires developed in accordance with the Group-wide corporate governance standards, the Bank of Russia Code of Corporate Governance (approved by the Bank of Russia’s Board of Directors on 21st of March 2014), and the OECD Principles of Corporate Governance.

The assessments found that the corporate governance system in Group companies as a whole complies with generally recognised best practices of corporate governance, while the most important areas of activity, such as the internal control system, the risk management system and information disclosure, are regulated in accordance with the Group standards. At the same time, areas were identified for improving corporate governance practices both in individual companies and those requiring improvements at the level of the Group standards. Based on the assessments, a list of recommendations was compiled, and road maps were drawn up for improving corporate governance in the respective subsidiaries.

The Bank’s performance in the area of corporate governance enabled it to maintain a high position in the National Corporate Governance Rating, where it was accorded a score of 7++, corresponding to “well-developed corporate governance practice”. The RID provides the annual rankings, which are based on an independent review. A rating of 7++ is assigned to companies that comply with the requirements of Russian legislation in the field of corporate governance, and it denotes fairly low risk to shareholders of losses associated with corporate governance.

The decision to convene a General Meeting of Shareholders is taken by the Supervisory Council. In accordance with applicable Russian law, and the Bank’s Charter, information about the date and venue of the General Meeting of Shareholders, as well as the record date for shareholders eligible to participate, is published on VTB’s website and also distributed through the VTB Shareholder application. During the time frame specified by law, shareholders can review materials for the General Meeting of Shareholders on the Bank’s website or at Shareholder Liaison Centres in Moscow, St. Petersburg and Yekaterinburg. When voting electronically, the materials for meetings are also available through the mobile application and in each user’s personal account on VTB Registrar’s website.

Two General Meetings of Shareholders were convened in 2019.

The General Meeting of Shareholders is the supreme governing body of VTB Bank. Any holder of ordinary shares may exercise the right to participate directly in the management of the Bank by voting on the agenda of the General Meeting of Shareholders. Preference shares carry voting rights only in special cases, as stipulated by the law.

Shareholders may take part in a meeting in person or through absentee voting. All shareholders of VTB Bank have access to the e-voting system developed by the Bank’s registrar, VTB Registrar.

Shareholders’ growing interest in annual meetings can be seen not only in the increase in the number of shareholders who personally attended the meeting but also in the nearly twofold increase in the number of shareholders who participated absentee (the number of online views (2,028) increased by 44 % compared with the 2018 AGM).

Shareholders who had previously submitted biometric data were able to register to take part in the meeting by using special self-service terminals. For the purposes of self-registration, a VTB Registrar technology was used to authenticate participants’ identity based on their face and by using a card with an NFC module (RF-face service).

During the meeting, the Bank’s shareholders were able to familiarize themselves with materials for the meeting and obtain information about products and services offered by VTB Group. Meeting materials were made available on tablets in the consultation area in addition to being available in hard copy and on memory cards.

The 2019 AGM gave shareholders an opportunity, for the first time, to submit questions to the presidium electronically via the VTB Shareholder mobile application or through special terminals.

**GENERAL MEETING OF SHAREHOLDERS**

The Annual General Meeting of Shareholders (AGM) of VTB Bank was held on 5 June 2019 at the Oktyabrsky Grand Concert Hall in St. Petersburg. The meeting was attended by 740 shareholders and their representatives (compared with 646 in 2018). In total, 2,348 shareholders took part, including through absentee voting, which accounted for 11,313,519,082,384 votes, or 85.1163 % of the total votes.

**2019 ANNUAL GENERAL MEETING OF SHAREHOLDERS**

**NUMBER OF PARTICIPANTS AT THE AGM, shareholders**

<table>
<thead>
<tr>
<th>Number of participants who voted absentee</th>

<td>1,083</td>
</tr>
<tr>
<td>1,083</td>
<td>2,348</td>
</tr>
</tbody>
</table>

**E-voting is possible online at vtbreg.com, as well as through the VTB Shareholder application (available in Russian language only).**
The e-voting system was widely available during the AGM, which meant that any shareholder could take part in the meeting regardless of where they were living or located, which greatly increased the total number of shareholders participating. Some 1,937 shareholders voted through the e-voting system. It is important to note that the e-voting system used biometrics and NFC technology, including voice recognition, which made the voting process much easier for shareholders with a visual impairment. Most of the participants in the AGM praised the quality of e-services available and the opportunities they provided.

Fourteen agenda items were considered at the meeting:

1. Approval of VTB Bank’s Annual Report;
2. Approval of VTB Bank’s annual financial statements;
3. Approval of VTB Bank’s profit allocation for 2018;
4. The amount, terms and form of the 2018 dividend payment and the record date to determine eligibility to receive dividends;
5. The remuneration of Supervisory Council members who are not state employees, in accordance with VTB Bank’s bylaws;
6. The remuneration of Statutory Audit Commission members who are not state employees, in accordance with VTB Bank’s bylaws;
7. The number of VTB Bank Supervisory Council members;
8. The election of VTB Bank Supervisory Council members;
9. The number of VTB Bank Statutory Audit Commission members;
10. The election of VTB Bank Statutory Audit Commission members;
11. Approval of the VTB Bank auditor;
12. Approval of a new edition of VTB Bank’s Charter;
13. Approval of a new edition of the Regulation on the Procedure for Preparing, Convening and Holding General Meetings of Shareholders of VTB Bank;

Meeting participants supported the proposed draft decisions on all 14 agenda items.

In addition, shareholders agreed to the following distribution of the Bank’s profits from 2018 in accordance with the recommendations of the Bank’s Supervisory Council:

- Net profit to be allocated:
  - RUB 230,906,903,335.16
- Allocations to the Reserve Fund:
  - RUB 11,545,345,166.76
- Dividend payment allocations on ordinary shares:
  - RUB 14,239,456,640.85
- Dividend payment allocations on Type 1 registered preference shares:
  - RUB 5,164,109,976.47
- Dividend payment allocations on Type 2 registered preference shares:
  - RUB 7,416,433,382.68
- Retained net profit:
  - RUB 192,541,558,168.40

Shareholders approved a dividend payment of 0.00109867761463259 RUB per ordinary share.

The Bank’s retained net profit, which amounted to RUB 192.5 billion as of the end of 2018, is used to ensure business growth and to maintain the Bank’s capital adequacy in accordance with the requirements of the Bank of Russia.

**EXTRAORDINARY GENERAL MEETING OF SHAREHOLDERS IN 2019**

On 1 November 2019, an Extraordinary General Meeting of Shareholders of VTB Bank was held in the form of absentee voting.

The agenda included three items:

1. The payment (declaration) of dividends for Type 1 preference shares, the amount, terms and form of the dividend payment; and the establishment of the record date to determine eligibility to receive dividends;
2. Approval of Amendment No. 1 to the Charter of VTB Bank;
3. Approval of a new edition of the Regulation on VTB Bank’s Management Board;

The shareholders supported draft decisions on all agenda items at the Extraordinary General Meeting of Shareholders. A total of 2,759 shareholders attended the meeting, 94 % of whom used the e-voting system. The largest number of shareholder votes came through the VTB Shareholder mobile application.

The Extraordinary General Meeting of Shareholders adopted a decision to pay interim dividends on Type 1 preference shares from retained profit of previous years.
SCOPE OF RESPONSIBILITIES

The Supervisory Council is one of the most important elements of VTB Bank’s corporate governance system. In its activities, the Supervisory Council is guided by the interests of shareholders and the Bank. Acting in the interests of shareholders and in accordance with Russian legislation, the Bank’s Charter, the Regulation on the Supervisory Council and the Corporate Governance Code, it provides general oversight of the Bank’s operations.

The Supervisory Council’s main tasks are the elaboration and adoption of the Bank’s Development Strategy, as well as the formation of the Bank’s executive bodies and oversight of their activities, organising assessments of the performance of the internal control and risk management system, determining the Bank’s personnel policy, including remuneration of executive bodies and Bank management, and participation in decision-making on issues pertaining to Bank management.

The Supervisory Council determines the rules for the functioning of the Bank’s corporate governance system through the adoption of bylaws that regulate the principles and procedures of its individual elements and oversight over the effectiveness of the corporate governance system as a whole.

The Supervisory Council is entrusted with the function of managing conflicts of interest between the Bank’s management bodies, shareholders and employees.

The Supervisory Council is guided by the interests of shareholders and employees and investors’ trust in the Bank and ensures a high level of transparency for its governance system and the objectivity of the Supervisory Council’s decision-making. The independent directors play an active role in Supervisory Council discussions and the decision-making process. Together, they monitor the Bank’s performance and its competitive position, analyse the performance of the management team, assess mechanisms and systems of internal control and risk management, and settle corporate conflicts.

According to the Bank’s Corporate Governance Code, the Supervisory Council should include at least three directors who meet the independence criteria established by the listing rules of the exchange whose quotation list includes the Bank’s securities. The independent members of the Supervisory Council must not have any relationship with the Bank that would prevent them from fairly and impartially making decisions with regard to VTB’s Development Strategy and ongoing activities. In determining the independence criteria for the members of the Supervisory Council, VTB Bank is guided by the requirements of applicable legislation, the listing rules of the stock exchange whose quotation list includes the Bank’s securities and the Bank’s Charter.

REMIT OF THE SUPERVISING COUNCIL

The Supervisory Council provides strategic direction; determines VTB Bank’s long-term priorities; approves its Development Strategy and long-term development programme; determines the key principles and overall approach to risk management and internal control, regulation on remuneration and compensation paid to executive bodies and other key executives; and exercises oversight over the activities of executive bodies and other key executives. The Supervisory Council plays a key role in the Bank’s main corporate activities.

CHAIRMAN OF THE SUPERVISING COUNCIL

The Chairman of the Supervisory Council is elected by majority vote of the members of the Supervisory Council. The Supervisory Council has the right to re-elect its Chairman at any time by majority vote.

The Chairman is not permitted to combine this role with the position of President and Chairman of the Management Board. The Chairman of the Supervisory Council may not also be a member of VTB Bank’s Management Board, nor may he or she have any type of employment related with the Bank.

The Chairman organizes the work of the Council, convenes and chairs its meetings, ensures that minutes are kept and presides over General Meetings of Shareholders. In the absence of the Chairman, his or her duties are assumed by a Supervisory Council member as decided by the Supervisory Council.

Anton Siluanov has been the Chairman of VTB’s Supervisory Council since 28 April 2017.

On 5 June 2019, the AGM elected Oksana Tarasenko to the Supervisory Council for the first time. Mukhadin Eskindarov left the Supervisory Council.

Corporate governance in partially state-owned companies differs as a result of the special status of their major shareholder, the Russian Federation. VTB Bank’s Supervisory Council includes state officials: the civil servants Anton Siluanov and Oksana Tarasenko, as well as the representatives of state interests Sergey Dubinin, Matthias Warnig, Andrey Kostin and Vladimir Chistyukhin.

In carrying out their functions on the Supervisory Council, the representatives of state interests must take into account the position of the shareholder and vote on certain issues as directed by the shareholder on the basis of the directives of the Russian Federation.

The Supervisory Council includes representatives of institutional/minority shareholders (professional directors): Mikhail Zadornov, Alexander Sokolov, Shahmar Movsumov (independent director), Igor Repin (independent director) and Yves-Thibault de Silguy (senior independent director).

Anton Siluanov
Chairman of the Supervisory Council

Civil servant

Born in 1963

Education:

- Doctor of Economic Sciences, 1985 – Moscow Financial Institute, specialisation in finance and credit;

Class 1 Full State Councillor of the Russian Federation

Professional activities:

- Since January 2020 Minister of Finance of the Russian Federation;
- 2018–2020 First Deputy Minister of the Russian Federation, Minister of Finance of the Russian Federation;
- 1992–2018 Deputy Head of Section, Deputy Department Manager – Headquarters, Deputy Department Manager, Deputy Department Head, Head of Department, Department Manager, Deputy Minister, Director of Department, Deputy Minister, acting Minister of Finance of the Russian Federation, Minister of Finance of the Russian Federation

Positions in other organisations:

- Chairman of the Supervisory Council of Alrosa

In accordance with the Regulation on the Bank’s Supervisory Council, a senior independent director has been elected since 2015 from among the members of the Council serving as independent directors. The senior independent director acts as an adviser to the Chairman of the Supervisory Council and coordinates interactions between the independent directors. The senior independent director also interacts with the Bank’s shareholders. If a dispute arises, the senior independent director should undertake measures to resolve the dispute through cooperation with the Supervisory Council Chairman, the other members of the Supervisory Council and the Bank’s shareholders to ensure the smooth operation of the Supervisory Council.

Yves-Thibault de Silguy has been the senior independent director since 28 April 2017. It should be noted that, in October 2019, Mr. de Silguy won a Russian Reputation award in the category of Best Financial Market Independent Director.

The Supervisory Council Staff and Remuneration Committee regularly assesses the independence of candidates for the Supervisory Council and considers issues related to the independence of independent directors.

In 2019, no transactions were made involving the acquisition or disposal of the Bank shares by members of the Supervisory Council.

LIABILITY INSURANCE FOR SUPERVISORY COUNCIL MEMBERS

Supervisory Council members are insured under the director’s liability insurance programme (Director’s and Officer’s Liability, D&O). In accordance with the D&O insurance programme, compensable losses (including legal expenses) incurred due to unintentional wrongful acts, negligence or omission on the part of members of the Supervisory Council related to the Bank’s financial operations are reimbursed in relation to claims filed during the insurance period by investors, shareholders or government bodies. The grounds for a claim may be the personal responsibility of members of the Supervisory Council for mistakes made during the decision-making process, shortfalls in financial control and risk management leading to losses, a reduction in share price or asset value or damages caused to third parties.

In 2019, a contract for directors’ liability insurance was signed for a new term. The feasibility of the extension was approved by VTB Bank’s Operational and Regulatory (Compliance) Risks Committee as well as by VTB Group’s Risk Management Committee.

An induction programme for first-time members of the Supervisory Council of VTB Bank was introduced in order to ensure the efficient operation of the Supervisory Council. It will also improve the Bank’s corporate governance practices in accordance with the best international corporate governance principles, including those provided by the Corporate Governance Code approved by the Board of Directors of the Bank of Russia, the Regulation on the Staff and Remuneration Committee of the Bank’s Supervisory Council and the Bank’s Corporate Governance Code.

The induction programme was created by decision of the Staff and Remuneration Committee of the Bank’s Supervisory Council on 7 October 2016 (minutes No. 48, hereinafter the Programme).

As part of the Programme in 2019, the Supervisory Council’s newest member, Oksana Tarasenko, met for the first time with members of VTB Bank’s Management Board and with the Corporate Secretary. During these meetings, she was provided with information on the Bank’s Development Strategy for 2019–2022, the corporate governance system and the risk management and internal control system. In addition, she was given an introduction to the Bank’s bylaws and other information necessary for members of the Supervisory Council to perform their duties effectively.

In accordance with the Regulation on the Bank’s Supervisory Council, a senior independent director has been elected since 2015 from among the members of the Council serving as independent directors. The senior independent director acts as an adviser to the Chairman of the Supervisory Council and coordinates interactions between the independent directors. The senior independent director also interacts with the Bank’s shareholders. If a dispute arises, the senior independent director should undertake measures to resolve the dispute through cooperation with the Supervisory Council Chairman, the other members of the Supervisory Council and the Bank’s shareholders to ensure the smooth operation of the Supervisory Council.

Yves-Thibault de Silguy has been the senior independent director since 28 April 2017. It should be noted that, in October 2019, Mr. de Silguy won a Russian Reputation award in the category of Best Financial Market Independent Director.

The Supervisory Council Staff and Remuneration Committee regularly assesses the independence of candidates for the Supervisory Council and considers issues related to the independence of independent directors.

In 2019, no transactions were made involving the acquisition or disposal of the Bank shares by members of the Supervisory Council.

LIABILITY INSURANCE FOR SUPERVISORY COUNCIL MEMBERS

Supervisory Council members are insured under the director’s liability insurance programme (Director’s and Officer’s Liability, D&O). In accordance with the D&O insurance programme, compensable losses (including legal expenses) incurred due to unintentional wrongful acts, negligence or omission on the part of members of the Supervisory Council related to the Bank’s financial operations are reimbursed in relation to claims filed during the insurance period by investors, shareholders or government bodies. The grounds for a claim may be the personal responsibility of members of the Supervisory Council for mistakes made during the decision-making process, shortfalls in financial control and risk management leading to losses, a reduction in share price or asset value or damages caused to third parties.

In 2019, a contract for directors’ liability insurance was signed for a new term. The feasibility of the extension was approved by VTB Bank’s Operational and Regulatory (Compliance) Risks Committee as well as by VTB Group’s Risk Management Committee.

An induction programme for first-time members of the Supervisory Council of VTB Bank was introduced in order to ensure the efficient operation of the Supervisory Council. It will also improve the Bank’s corporate governance practices in accordance with the best international corporate governance principles, including those provided by the Corporate Governance Code approved by the Board of Directors of the Bank of Russia, the Regulation on the Staff and Remuneration Committee of the Bank’s Supervisory Council and the Bank’s Corporate Governance Code.

The induction programme was created by decision of the Staff and Remuneration Committee of the Bank’s Supervisory Council on 7 October 2016 (minutes No. 48, hereinafter the Programme).

As part of the Programme in 2019, the Supervisory Council’s newest member, Oksana Tarasenko, met for the first time with members of VTB Bank’s Management Board and with the Corporate Secretary. During these meetings, she was provided with information on the Bank’s Development Strategy for 2019–2022, the corporate governance system and the risk management and internal control system. In addition, she was given an introduction to the Bank’s bylaws and other information necessary for members of the Supervisory Council to perform their duties effectively.
THE INDUCTION PROGRAMME CONSISTS OF THE FOLLOWING ACTIVITIES

- Holding meetings with the managers of the Bank’s key structural divisions, as well as with members of the Bank’s executive bodies
- Consultations with the Bank’s Corporate Secretary on issues related to the organisation of the work of the Bank’s Supervisory Council
- Familiarisation with Bank documents governing the activities of the Bank’s governing bodies

REPORT ON THE ACTIVITIES OF THE SUPERVISORY COUNCIL

Meetings of the Supervisory Council are convened at the initiative of its Chairman or at the request of a Council member, the Statutory Audit Commission, the Auditor, the Management Board, the President and Chairman of the Management Board or the Head of the Department, which conducts the internal audit. A quorum is formed by the attendance of half of the elected members.

Decisions are taken by a majority vote of participating members unless otherwise provided in the Charter or the Regulation on the Supervisory Council. Decisions taken by a majority vote of participating members are scheduled in advance based on the Bank’s business cycle and may be held in person or through absentee voting. Any member unable to attend in-person meetings may, in the opinion of a member of the Supervisory Council, lead to such a conflict of interest that may, in the opinion of a member (and, if necessary, do not take part in discussions of the issue) that may, in the opinion of a member of the Supervisory Council, lead to such a conflict of interest that may, in the opinion of a member (and, if necessary, do not take part in discussions of the issue).

Meetings of the Supervisory Council are held on a scheduled basis, although, if necessary, they may be held outside of the schedule by means of absentee voting. The format of each Supervisory Council is defined in accordance with the Bank’s Charter and based on the importance of its agenda. The most significant matters are brought before in-person meetings.

At every Supervisory Council meeting, a report is provided to update members on the implementation of decisions, assignments and programmes approved by the Supervisory Council. Members are able to review materials for meetings in advance, in addition to the recommendations and conclusions of the Supervisory Council’s committees on each agenda point. The Supervisory Council’s schedule is compiled for the period between AGMs and is approved by the Council. Meetings are scheduled in advance based on the Bank’s business cycle and may be held in person or through absentee voting. Any member unable to attend a meeting can still participate via video conference (including voting on agenda items); they can also submit a written opinion on agenda items.

Issues considered by the Supervisory Council in 2019

- Priority areas of the Bank’s operations
- Corporate governance and procedural issues
- Review of reports and plans
- Risks, internal control
- Staff issues and the incentive system

The Bank’s Supervisory Council considered a total of 142 issues in 2019, and the Supervisory Council committees prepared recommendations on 45 of these issues.

Yves-Thibault de Silguy, the Supervisory Council’s senior independent director, and Igor Repin, an independent director, took part in meetings with minority shareholders and also in meetings of the Bank’s Shareholders Consultative Council.

KEY ISSUES CONSIDERED BY THE SUPERVISORY COUNCIL IN 2019

The Bank’s Supervisory Council considered a total of 142 issues in 2019, and the Supervisory Council committees prepared recommendations on 45 of these issues.

Issues considered by the Supervisory Council in 2019

- Attendance at in-person meetings
- Presented written opinion at an in-person meeting
- Participation in absentee voting
- Did not take part in absentee voting on agenda items in which there was a conflict of interest
- Meeting held before Oksana Tarsanenko’s election to the Supervisory Council

Depending on the results of in-person meetings or absentee ballots, minutes are drawn up reflecting the position of each member of the Supervisory Council based on their vote on the agenda items.

The Supervisory Council actively engaged with the Bank’s minority shareholders and also considered the Report on Cooperation with the Bank’s Shareholders and a plan of action for working with shareholders in the upcoming calendar year.
PRIORITY AREAS OF THE BANK’S OPERATIONS:
• Approval of VTB Bank’s business plan and financial plan (budget) for 2019;
• Approval of VTB Bank’s business plan and financial plan (budget) for 2020;
• Approval of VTB Bank’s Development Strategy for 2019–2022;
• Approval of VTB Bank’s Investment Programme for 2019; approval of a programme to improve VTB Bank’s operational efficiency and reduce expenses for 2019;
• Approval of a plan to restore VTB Bank’s financial stability;
• Participation of VTB Bank in Business Finance and VTB Capital Holding, as well as the establishment of VTB UK Holding;
• Approval of an action plan for the sale of Bank’s non-core assets (annually) and for (quarterly) registration of the Bank’s non-core assets;
• VTB Bank’s placement of T2-1, T2-2, T2-3 and T2-4 series bonds;
• Restructuring of the Bank’s corporate branch network.

CORPORATE GOVERNANCE AND PROCEDURAL ISSUES:
• Calling and determining the agendas of the General Meeting of Shareholders, and the Statutory Audit Commission, and other issues related to the preparation and holding of the General Meeting of Shareholders;
• Recommendations on the distribution of profits and the amount of dividends on Bank shares;
• Preliminary approval of the Bank’s Annual Report;
• Proposals of candidates for the Bank’s auditor;
• Review of the results of the evaluation of the corporate governance system for 2018;
• Approval of new versions of the Regulations on the Supervisory Council Committee;
• Approval of the Regulation on the Procedure for Carrying out Sponsorship Activities within the Bank, the Regulation on the Procedure for Carrying out Charitable Activities within the Bank and the Regulation on the Bank’s Procurement of Goods, Works and Services.

STAFF ISSUES:
• Election of the Chairman of the Supervisory Council (Anton Silanov);
• Election of the senior independent director (Yee-Thibaut de Silguy);
• Approval of the Supervisory Council to allow the President and Chairman of the Management Board and members of the Management Board to hold management positions in other organisations;
• Election of a Deputy President and Chairman of the Management Board of VTB Bank ( Vadim Kulik) and establishing his remuneration and compensation;
• Payment to the President and Chairman of the Management Board and members of the Management Board of VTB Bank of bonuses based on 2018 results and of the share of the deferred bonuses based on 2017 results;
• New version of the Regulation on Remuneration and Key Performance Indicators for the Executive Bodies of VTB Bank and the List of Key Performance Indicators for Evaluating the Activities of Members of the Management Board of VTB Bank were approved.

RISKS AND INTERNAL CONTROL:
• New editions were approved of the Bank’s Risk and Capital Management Strategy and the Procedure for Managing the Most Significant Risks;
• Review of the reports on the activities of the Internal Audit Department for 2H 2018 and 1H 2019, and approval of its work plan for 2020;
• Review of a report on the results of the implementation in 2018 of the Rules on Internal Monitoring in Respect of the Prevention of Money Laundering and Terrorist Financing (AML / CFT) and recommended measures to improve the AML / CFT system;
• Quarterly reports by inspectors of the Bank’s professional activities in the securities market were reviewed;
• Review of quarterly reports on significant risks and on VTB Bank’s capital adequacy, as well as on the results of stress testing at VTB Bank; approved/amended key parameters of quantitative indicators of the risk appetite of VTB Bank and of VTB Group.

REVIEW OF REPORTS AND PLANS:
• Reports on the activities of the Supervisory Council’s committees;
• Report on the Bank’s sponsorship and charitable activities for 2018; the plan for VTB Bank’s expenses for sponsorship and charitable activities in 2020;
• Report on the work of the Bank’s Corporate Secretary in 2018;
• Report on interaction between VTB Bank and shareholders in 2018 and plans to work with shareholders in 2019;
• Report on the financial results and performance of VTB Group companies (quarterly);
• Progress report on the implementation of the Bank’s Programme for the Investment of Non-core Assets (quarterly).

INFORMATION TECHNOLOGY IN THE WORK OF THE SUPERVISORY COUNCIL
Since 2018, members of the Supervisory Council have been able to use a mobile electronic office that gives them access to materials from current and past meetings of the Supervisory Council and its committees, as well as information about decisions adopted, participants and other information required for the members of the Bank’s Supervisory Council to perform their duties effectively, including financial statements, press reviews, Bank bylaws, etc.

In 2019, the Bank continued to streamline the activities of the Supervisory Council and to update the information and communication system by introducing new, expanded functionality to make it even easier and more convenient for members of the Supervisory Council to use the system.

EVALUATION OF THE WORK OF THE SUPERVISORY COUNCIL
According to the recognised best Russian and foreign practices of corporate governance, since 2012, VTB Bank has conducted an annual assessment of its corporate governance system. The assessment also includes a self-evaluation of the activities of the Supervisory Council based on a questionnaire completed by the members of the Council on the ground of the Methodology of the Bank’s corporate governance system assessment approved by the Supervisory Council’s Strategy and Corporate Governance Committee (as of 2 September 2011, hereinafter the Methodology).

In accordance with the Methodology the Bank’s corporate governance system is assessed with respect to nine components:
• The division of powers between management bodies;
• Organisation of the activities of the Supervisory Council;
• Approval of the Bank’s Development Strategy and oversight over its implementation;
• Coordination of risk management;
• Prevention of conflicts of interest on the part of shareholders, members of the Supervisory Council, the Bank’s executive bodies and its employees;
• Relations with affiliated parties;
• Determination of rules and procedures ensuring compliance with the principles of professional ethics;
• Coordination of the disclosure of information about the Bank;
• Monitoring the internal control system.

Based on the results of the corporate governance assessment conducted in 2019, the members of the Supervisory Council give it a high rating. The average score of the corporate-governance assessment hasn’t been changed in comparison with 2018 and was 3.91 points (97.8 % of the maximum value). Four components received the maximum score of 4 points: relations with affiliated parties; monitoring the internal control system; coordination of risk management; and prevention of conflicts of interest among shareholders, members of the Supervisory Council, the Bank’s executive bodies and its employees. At the same time, the other assessed components of the Bank’s corporate governance were also highly rated, receiving 3.7–3.9 points.
Based on the results of the assessment, the Bank prepared a report on the results of its assessment of the corporate governance system, including, among other things, the Bank’s planned measures to improve its corporate governance system. The report was provisionally reviewed by the Supervisory Council’s Strategy and Corporate Governance Committee, after which it was taken under advisement by the Supervisory Council.

**COMPENSATION PAID TO MEMBERS OF THE SUPERVISORY COUNCIL**

The amount of remuneration and compensation paid to the members of the Supervisory Council and the procedure for determining the amount thereof is defined in accordance with the Regulation on Remuneration and Compensation Paid to the Members of the Supervisory Council of VTB Bank, approved pursuant to the recommendation of the Supervisory Council’s Staff and Remuneration Committee at the Bank’s AGM (minutes No. 47 of 24 June 2016) and posted in the Charter and bylaws section on the Bank’s website.

The amount of remuneration paid to members of the Bank’s Supervisory Council for the corporate year has not changed since 2012 and amounts to 1 RUB thousand.

In accordance with a resolution of the General Meeting of Shareholders, the members of VTB Bank’s Supervisory Council may receive remuneration and compensation for expenses incurred in the course of their duties during their term in office depending on their actual involvement in the work of the Supervisory Council and Supervisory Council committees.

In case of early termination, as well as the re-election of members of the Supervisory Council at an Extraordinary General Meeting of Shareholders, the remuneration of a newly elected or former member of the Supervisory Council is determined proportionate to the time spent as a member of the Supervisory Council, as Chairman of the Supervisory Council, as a member of a Supervisory Council committee or as the Chairman of a Supervisory Council committee during the corporate year.

The decision on the payment of remuneration to members of the Supervisory Council based on 2018 results was taken at VTB Bank’s Annual General Meeting of Shareholders on 5 June 2019.

The decision on the payment of remuneration to members of the Supervisory Council based on 2019 results will be made at VTB Bank’s Annual General Meeting of Shareholders in 2020.

In accordance with applicable Russian legislation, members of the Supervisory Council who are state employees do not receive any remuneration.

Remuneration is paid by the Bank through bank transfers; no other forms of remuneration are stipulated.

Supervisory Council members who are not state employees are compensated for expenses incurred while carrying out their duties (including accommodation, food, travel expenses (including VIP lounge services), other duties and fees for air and rail transport).

**COMMITTEES OF THE SUPERVISORY COUNCIL**

The Supervisory Council has standing committees that support the effective implementation of the Council’s managerial and supervisory functions and that provide preliminary detailed analysis and recommendations regarding the issues that the Council deems most important.

At the end of 2019, the Supervisory Council had the following committees:

- Strategy and Corporate Governance Committee;
- Audit Committee;
- Staff and Remuneration Committee.

The amount of remuneration paid to members of the Bank’s Supervisory Council for the corporate year has not changed since 2012 and amounts to 1 RUB thousand.

Payment conditions: attendance in person or participation via video conferencing in at least half of the meetings held, as well as participation in at least half of absentee votes held by the Bank’s Supervisory Council or a Supervisory Council committee.
Andrey Kostin
Committee Chairman

"In 2019, the Strategy and Corporate Governance Committee submitted recommendations to the Supervisory Council on key issues of strategic and business planning, including the Committee’s recommendation that the Bank’s Development Strategy for 2019–2022 be approved. The Committee paid special attention to digital technologies introduced into the Bank’s operations."

MAIN TASKS:
• Determining the Bank’s strategic goals and development priorities for the short, medium and long term, and monitoring of the achievement thereof;
• Supporting and improving the Bank’s corporate governance system;
• Improving the strategic management of the Bank’s capital.

KEY AREAS OF WORK IN 2019
Strategic objectives and priorities:
• New versions of VTB’s business and financial plans (budget) for 2019;
• VTB Bank’s business and financial plans (budget) for 2020;
• VTB Bank’s Development Strategy for 2019–2022;
• VTB’s Bank Long-Term Development Programme for 2019–2023;
• Report on the implementation of VTB Bank’s Long-Term Development Programme for 2014–2019 based on the results of 2018;
• Report on the implementation of the IT strategy for 2017–2019;
• VTB Bank’s Operational Efficiency and Cost Reduction Programme for 2019;
• VTB Bank’s Investment Programme for 2019;
• Establishment of VTB UK Holding;
• VTB Bank’s financial stability recovery plan;
• Termination of the Bank’s participation in Banco VTB Afrika, S.A.;
• Termination of VTB Bank’s participation in Ryabinovaya.

Capital management:
• Distribution of profits for 2018 and determination of the amount of dividends to be paid out;
• VTB Bank’s risk and capital management strategy;
• Increasing/decreasing the capital of subsidiaries.

Corporate governance:
• Results of the assessment of VTB Bank’s corporate governance system;
• The Bank’s accession to the Association of Big Data Market Participants;
• Procedures for managing VTB Bank’s most significant risks.

Vladimir Chistyukhin

Annual Report / 2019
"The work of the Audit Committee throughout 2019 helped the Supervisory Council conduct regular in-depth reviews of VTB Bank’s financial statements and its performance. Thanks to the transparent actions of the Bank and its compliance with the strictest international reporting standards, shareholders and regulators were presented with a very reliable and objective picture of the Bank’s financial situation."

MAIN TASKS:
- Ensuring the completeness, accuracy and reliability of the Bank’s financial statements;
- Ensuring the reliability and performance of the risk management and internal control system;
- Ensuring the independence and objectivity of the internal and external audit functions.

KEY AREAS OF WORK IN 2019:
- Discussion of strategic issues related to the Bank and the Group’s development and risk management, including qualitative changes in the corporate and retail loan portfolios and the results of compliance risk management;
- Dialogue with the Bank’s management concerning corporate and social responsibility within VTB Group;
- Discussion of plans on the integration of the banking business of new members of VTB Group;
- Analysis of VTB’s share price;
- Analysis of initiatives implemented by VTB aimed at maintaining the effectiveness of the internal control system in combating money laundering and the financing of terrorism;
- Oversight of the annual open tender for the selection of an external auditor, including the recommendation of candidates to the Supervisory Council;
- Coordinating with the external auditor, assessment of the external auditor’s report and recommendations provided as part of the audit process and of the review of the Bank and Group’s interim and annual RAS and IFRS financial statements.

STATISTICS ON THE PARTICIPATION IN MEETINGS/ABSENTEE VOTING OF THE MEMBERS OF THE AUDIT COMMITTEE

- Yves-Thibault de Silguy: 6 meetings, 1 absentee vote
- Shahmar Movsumov: 5 meetings, 1 absentee vote
- Igor Repin: 5 meetings, 2 absentee votes

ISSUES CONSIDERED BY THE AUDIT COMMITTEE

- 35 issues were considered by the Audit Committee in 2019
- Recommendations submitted to the Supervisory Council
- Issues within the exclusive remit of the committee

- Regular review of the consolidated financial statements of VTB Bank in compliance with IFRS and quarterly monitoring of the financial results of VTB Group;
- Preliminary review of matters related to the Bank’s Internal Audit Department: analysis of the schedule for internal auditing, discussion of reports of the Internal Audit Department on significant violations and shortcomings discovered at VTB Bank and its subsidiaries, recommendations by internal audit and external supervisory bodies to further improve the procedures involved in internal and external auditing;
- Discussion of issues related to the development of internal auditing, including consideration of the results of an external assessment of the activities of the Internal Audit Department by PwC, which confirmed that VTB’s internal auditing was in compliance with all auditing standards; the assessment also confirmed that the function had reached a high level of maturity;
- Review of other matters related to the Bank’s activities, including pursuant to particular assignments from the Supervisory Council.

AUDIT COMMITTEE MEMBERS

Shahmar Movsumov (Independent director)
Igor Repin (Independent director)
STAFF AND REMUNERATION COMMITTEE

“With the direct participation of the Staff and Remuneration Committee, the Bank approved new versions of its Regulations on Remuneration and Compensation of Executive Bodies that guarantee that executive bonuses are directly tied to the performance of executive duties. In addition, a decision was made to have an independent consultant conduct an assessment of the performance of the Supervisory Council, and the corresponding criteria were approved.”

Sergey Dubinin
Committee Chairman

STAFF AND REMUNERATION COMMITTEE MEMBERS

Shahmar Movsumov
(Independent director)

Igor Repin
(Independent director)

MAIN TASKS:
• Ensuring continuity in the activities of the Bank’s executive bodies and the Statutory Audit Commission;
• Arranging a performance assessment of the Bank’s executive bodies and the Statutory Audit Commission;
• Review of the Bank’s HR policy, including in terms of remuneration and oversight of its implementation;
• Assistance in ensuring compliance with the legal requirements governing the activities of members of the Bank’s executive bodies and the Statutory Audit Commission.

KEY AREAS OF WORK IN 2019:
• Formation of the Supervisory Council and the Statutory Audit Commission;
• Consideration of the status of independent members of the Supervisory Council;
• Determination of the amount of remuneration for work on the Supervisory Council and the Statutory Audit Commission;
• Determination of the members of VTB Bank’s Management Board and remuneration for their work;
• Approval of new version of the Regulation on Remuneration and Compensation of the Executive Bodies of VTB Bank and key performance indicators for their work;
• Conducting an external assessment of the work of the Bank’s Supervisory Council;
• Assessment of the compliance of the members of VTB Bank’s Supervisory Council with the independence criteria for members of an issuer’s Board of Directors (Supervisory Council) as provided for by the Moscow Exchange Listing Rules;
• Other issues within the remit of the committee.

17 issues were considered by the Staff and Remuneration Committee in 2019

Recommendations submitted to the Supervisory Council
Issues within the exclusive remit of the committee
CORPORATE SECRETARY

VTB Bank established the position of Corporate Secretary in 2011 while introducing measures to improve its corporate governance system. The Corporate Secretary is a Bank official who oversees compliance on the part of the Bank’s management and employees with applicable legislation, the Charter and bylaws guaranteeing shareholders’ interests and their ability to exercise their legal rights. The Corporate Secretary also provides a liaison between the Bank and its shareholders, promotes the development of corporate governance practices and supports the smooth operation of the Bank’s Supervisory Council. Functionally, the Corporate Secretary is elected by, and reports to, the Supervisory Council and, administratively, to the President and Chairman of the Bank’s Management Board. The Corporate Secretary is subordinate to the Supervisory Council and is appointed and dismissed by decision of the Supervisory Council. The report on the work of the Corporate Secretary is reviewed and approved on an annual basis by the Bank’s Supervisory Council. The report on work for 2018 was approved by the Supervisory Council on 6 March 2019. The administration of the Supervisory Council operates under the guidance of the Corporate Secretary. The Corporate Secretary is secretary to the Supervisory Council and also serves as secretary for the General Meeting of Shareholders. The Staff and Remuneration Committee reviews candidates for the position and provides recommendations to the Supervisory Council. The Corporate Secretary acts on the basis of the Regulation on the Corporate Secretary of VTB Bank, approved by the Bank’s Supervisory Council (minutes No. 22 of 7 September 2015), which takes into account the requirements of the Listing Rules of Moscow Exchange, the recommendation of the Corporate Governance Code approved by the Board of Directors of the Bank of Russia and the guidelines of the Federal Agency for State Property Management.

Yevgeny Ignatiev
Chief of the Supervisory Council
and Corporate Secretary

Born in 1981

CONTROL AND AUDIT

INTERNAL CONTROL AND AUDIT

VTB Group’s internal control and audit functions operate in compliance with international best practices and applicable legislation in the countries where the Group operates. The system is guaranteed the necessary independence by the way its parts function together and by its reporting structure.

VTB GROUP’S INTERNAL CONTROL SYSTEM ENSURES:

- Efficiency of VTB Group’s and VTB Bank’s activities
- Effective management of assets and liabilities (including asset integrity) and risks
- Reliable, complete and timely financial and management information and reporting
- Information security
- Compliance with legislation, regulations, rules and standards
- No involvement on the part of the Group and its employees in unlawful activities

The VTB Group Management Committee established an Internal Audit Coordination Committee, as well as a Coordination Committee for Compliance and Internal Control aimed at preventing money laundering and the financing of terrorism.

THE MAIN OBJECTIVES OF VTB GROUP’S INTERNAL CONTROL FUNCTIONS INCLUDE:

- To independently assess the effectiveness of the internal control and risk management systems, accounting reports, business processes and the activities of departments and individual employees, and also to assess the economic expediency and effectiveness of operations and transactions;
- To verify the reliability of internal control over automated information systems, and also to verify the methods used to secure property;
- To monitor key risk areas and risk control mechanisms, with a view to identifying shortcomings in the internal control system and emerging risks, and to create mechanisms to prevent these risks;
- To develop recommendations to improve the efficiency of systems, procedures, transactions and activities by the Group’s structural units and employees;
- To communicate with external regulatory bodies and external auditors.

VTB BANK’S INTERNAL CONTROL SYSTEM

GOVERNING BODIES

(General Meeting of Shareholders, Supervisory Council, Management Board, President and Chairman of the Management Board)

STATUTORY AUDIT COMMISSION

CHIEF ACCOUNTANT
(and his or her deputies)

BRANCH MANAGERS
(and their deputies)

BRANCH CHIEF ACCOUNTANTS
(and their deputies)

BANK’S STRUCTURAL UNITS

(responsible manager)

in charge of internal control

Monitoring of the internal control system is carried out on an ongoing basis by management and employees of the Bank’s structural units, as well as by the Internal Audit Department.

Audit Committee. The Audit Committee operates as part of the structure of the Supervisory Council in order to facilitate the effective performance of the functions of the Supervisory Council in the area of control over the Bank’s financial and economic activities. More detailed information on the composition and activity of the Audit Committee can be found in the section Corporate Governance / Supervisory Council / Supervisory Council Committees.

Internal Audit Department. The Internal Audit Department provides direct support to the Bank’s governing bodies to ensure that VTB Group works efficiently and effectively. The Internal Audit Department monitors internal control systems, conducts audits and provides impartial recommendations for improving banking operations and control procedures.

The Internal Audit Department is an independent structural unit of VTB Bank and operates under the direct supervision of the Supervisory Council. The Supervisory Council approves the Internal Audit Department’s work plans and monitors their implementation, reviews the Internal Audit Department’s reports on the results of audits and on monitoring of the internal control system, as well as reports on the implementation of the Internal Audit Department’s recommendations to address previously identified issues.

Taking into account the strategic goals of VTB Bank and VTB Group regarding the transformation and digitalisation of business processes, the fit-for-purpose functional model for internal audit was changed in 2019, and the Internal Audit Department was reorganised. The main objectives of the reorganisation are:

- To develop remote, digital audit methods to considerably expand the number of transactions, deals and procedures that are audited;
- To strengthen the focus of auditing on the performance and competitiveness of business processes, the transition from the discrete auditing of facilities to the continuous auditing of processes;
• To ensure a close link between auditing and the Bank’s technological transformation, including in the banking sphere;
• To develop new audit formats: remote and thematic in terms of individual processes;
• To ensure that the internal audit methodology and personnel are up to the task in terms of new technological and organisational challenges.

The Internal Audit Department’s organisational structure comprises a number of units responsible for auditing the lending process, non-credit business processes, regional divisions, digital auditing of processes and information technologies, as well as auditing within the Group. To improve the effectiveness of the monitoring of the internal control system in the Bank’s regional branches, the structure of the Internal Audit Department includes dedicated internal control teams at the branch level.

In 2019, the Internal Audit Department conducted 36 scheduled audits and control measures, including 17 audits of various activities within the parent company and 19 audits of operations in the Bank branches. In addition, as part of its ongoing monitoring, Internal Audit Department staff members conducted 869 thematic audits at the branch level.

In addition to conducting audits and monitoring the Bank’s internal control system, the Internal Audit Department’s priority is operational oversight as well as the coordination and maintenance of the same level of practice and competencies in terms of internal audit within subsidiaries. In 2019, the Department carried out 20 control measures related to the Group’s subsidiary companies and banks. The Internal Audit Department also regularly analyses reports on the work of Group companies’ internal audit services. To enhance the level of professionalism and improve the exchange of experiences, on-the-job training is provided for staff from the internal audit services within Group companies, including the involvement of VTB Group functional coordinators.

The Internal Audit Department liaises with the Audit Committee and independent auditors, providing information on the internal control system and reporting any shortcomings during the audit period.

In 2019, PwC conducted an external independent assessment of the internal audit function in terms of its compliance with international professional standards in the context of oversight recommendations and the requirements of the Bank of Russia and the Federal Agency for State Property Management. The assessment concluded that VTB’s internal audit function is fully compliant with international standards and with the Internal audit code of ethics. The high level of maturity of the Internal Audit Department was noted in terms of its objectivity, professionalism and use of advanced approaches and technologies.

COMPLIANCE CONTROL

The Compliance Control and Financial Monitoring Department assists the Bank’s governing bodies with the effective management of regulatory (compliance) risks (risks resulting in losses due to non-compliance with the legislation of the country of registration, the Bank’s regulations, standards for self-regulatory organisations, as well as the risk of losses resulting from the application of sanctions and/or the impact of other measures on the part of the supervisory authorities).

Regulatory risks also include the risks of money laundering and the financing of terrorism (AML / CFT), as well as Financing the spread of weapons of mass destruction (WMD).

The Compliance Control and Financial Monitoring Department:  
• Ensures a unified approach to internal (compliance) control, AML / CFT and preventing the spread of WMD within VTB Group’s credit and non-credit financial organisations;
• Carries out the functional coordination of the activities of credit and non-credit financial institutions that are part of VTB Group in fulfilling their requirements in terms of internal (compliance) control, compliance with international sanctions concerning AML / CFT and the spread of WMD in accordance with the basic principles of managing VTB Group and taking into account the legislative provisions in the country of registration / location of the relevant VTB Group credit or non-credit financial institution.

MAIN TASKS IN TERMS OF INTERNAL (COMPLIANCE) CONTROL

• Ensuring that the activities of VTB Group credit and non-credit financial institutions are in compliance with the legislation of the country of registration, internal regulations, standards of self-regulatory organisations and common business practices;
• Ensuring effective management and minimisation of regulatory (compliance) risk and monitoring the performance of the regulatory (compliance) risk management;
• Coordinating and participating in the development of a set of measures aimed at reducing the level of regulatory (compliance) risk;
• Creating and maintaining an effective system of governance information and reporting;
• Coordinating activities undertaken to meet the requirements of the United States Foreign Account Tax Compliance Act (FATCA) and Common Reporting Standard (CRS);
• Preventing the involvement of VTB Group companies or employees in unlawful activities (including corruption, improper use of insider information, market manipulation, etc.).

MAIN TASKS IN TERMS OF INTERNAL CONTROL FOR THE PURPOSES OF AML / CFT AND PREVENTING THE SPREAD OF WMD

• Ensuring compliance with legislation in the area of AML / CFT and in terms of preventing the spread of WMD;
• Organising an effective internal control system for AML / CFT and for preventing the spread of WMD that is aimed at strengthening VTB Group’s position in financial markets, expanding the scale of its business, and improving the performance of operations and the quality of customer service;
• Minimising the risk of customer transactions involving money laundering or terrorist financing, as well as the risk of non-compliance with international sanctions;
• Avoiding involving VTB Group employees in money laundering, the financing of terrorism and the financing of the spread of weapons of mass destruction.

In the context of measures aimed at the effective development of the systems of internal (compliance) control and AML / CFT and preventing the spread of WMD within VTB Group, the Compliance Control and Financial Monitoring Department interacts with the Coordination Commission on Compliance and Internal Control for the Purpose of Preventing Money Laundering and the Financing of Terrorism (under the VTB Group Management Committee), which includes the following tasks:

• Developing common principles and standards;
• Introducing best practices within VTB Group;
• Sharing information among VTB Group companies and coordinating those companies;
• Improving the general professional capacity of experts.
The biographies and positions of the members of the Statutory Audit Commission are as of 31 December 2019.

Zahar Sabantsev
Chairman of the Statutory Audit Commission; Head of the Division for Financial Sector Monitoring, Organisational Support and Consolidated Work of the Financial Policy Department of the Ministry of Finance of the Russian Federation; member of the Statutory Audit Commission of Rosneft; member of the Statutory Audit Commission of Rosseti.

Alexander Vasilchenko
Head of the Department for Relations with Government Agencies of Russian Post; member of the Board of Directors of Obronsprom iskopl, the Centre for Shipbuilding and Ship Repair Technology, and Roskartography; and member of the Statutory Audit Commission of Alrosa.

Mikhail Krasnov
Member of the Statutory Audit Commission of Rostelecom.

Anastasia Olshanova
Head of the Corporate Relations Department at DOM RF; member of the Board of Directors at Sakhalin Energy Company.

Vadim Soskov
Deputy CEO of Gazprombank Asset Management; member of the VTB Shareholders Consultative Council.

In 2019, the Statutory Audit Commission held three in-person meetings at which the following issues were considered: verifying implementation of the Bank’s budget for management expenses, analysing the Bank’s operating and non-operating expenses, reviewing information on the implementation of the Bank’s investment programme, analysing reports from the Internal Control Department, analysing the Bank’s bylaws governing the activities of the Statutory Audit Commission, electing the Chairman of the Statutory Audit Commission, approving the work plan for the Statutory Audit Commission for the 2019–2020 business year, approving a programme for auditing the Bank’s financial and economic activities for the 2019–2020 business year, and approving a programme for the Statutory Audit Commission’s analysis of the Bank’s bylaws.

In 2019, the Statutory Audit Commission elected by the AGM on 23 May 2018, in accordance with the Work Plan for VTB Bank’s Statutory Audit Commission for 2018, audited VTB Bank’s financial and economic activities for 2018–2019, as a result of which the Statutory Audit Commission reached the following conclusions:

- No violations of legal acts of the Russian Federation on accounting and reporting procedures or violations of legal acts of the Russian Federation in conducting financial and economic activities were found that could have had a significant impact on the Bank’s financial results for 2018;
- VTB Bank’s annual accounting records and financial statements for 2018 as well as other financial documents are accurate and provide an objective picture of the Bank’s financial position as of 1 January 2019;
- VTB Bank’s 2018 annual report was prepared in accordance with the applicable legislation of the Russian Federation;
- The information contained in the report on interested-party transactions completed by the Bank in 2018 is accurate;
- The Bank complies with the statutory requirements established by the Bank of Russia;
- The Bank’s systems of corporate governance, risk management and internal control meet the requirements established by the laws of the Russian Federation and regulations of the Bank of Russia and are in accordance with the nature and scale of the Bank’s operations.

In 2019, the Statutory Audit Commission provided the members of the Statutory Audit Commission with information necessary to monitor the Bank’s financial and economic activities on a regular basis, including information concerning indicators related to financial statements prepared in accordance with RAS and consolidated financial statements prepared in accordance with IFRS, as well as information on the Bank’s implementation of directives issued by the government of the Russian Federation, as well as the Bank’s Long-term Development Programme and its Programme for the Sale of Non-core Assets.

Since June 2016, the Regulation on Remuneration and Compensation Paid to the Members of the Statutory Audit Commission has been in force at the Bank. The Regulation was approved in accordance with the recommendations of the Bank’s Supervisory Council Staff and Remuneration Committee at the Annual General Meeting of Shareholders (minutes No. 47 of 24 June 2016).

According to this document, the basic part of the remuneration paid to members of the Statutory Audit Commission is 20 % of the average remuneration paid to a member of the Supervisory Council who is an independent director or representative of the state.

The actual amount of remuneration paid to a member of the Statutory Audit Commission during the reporting period is determined based on the number of days in the corporate year during which said member of the Statutory Audit Commission carried out their duties.

For channelling the Statutory Audit Commission, the Regulation on Remuneration and Compensation Paid to the Members of the Statutory Audit Commission establishes a bonus of 10 % of the basic remuneration for members of the Bank’s Statutory Audit Commission. Remuneration is paid by the Bank through bank transfers; no other forms of remuneration are stipulated.

Members of the Statutory Audit Commission who miss more than half of the meetings of the Statutory Audit Commission during the time in which they are members of the Commission are not paid any remuneration, nor are members of the Statutory Audit Commission who are civil servants.

1 The biographies and positions of the members of the Statutory Audit Commission are as of 31 December 2019.
At VTB Bank’s AGM on 5 June 2019, on the matter of the payment of remuneration to members of the Statutory Audit Commission who are not civil servants in the amount established by the bylaws of VTB Bank, it was decided:

- To pay remuneration to members of the Statutory Audit Commission of VTB Bank who are not civil servants:
  - For work as part of the Statutory Audit Commission of VTB Bank: RUB 916,690 each;
  - For chairing the Statutory Audit Commission of VTB Bank: RUB 275,007;

EXTERNAL AUDITOR

In order to audit and confirm the veracity of its annual financial statements, VTB Bank engages an independent, professional external auditor. In accordance with the legislation of the Russian Federation, the external auditor is approved on the basis of an open tender to conduct the Bank’s obligatory annual audit.

In March 2015, the Bank held an open tender to select an auditor to carry out its obligatory annual audit for the subsequent five years. The tender procedure was governed by Federal Law No. 44-FZ of 5 April 2013 on the Contractual System for the Procurement of Goods, Works and Services for State and Municipal Needs.

- To compensate members of the Statutory Audit Commission of VTB Bank who are not civil servants, during the performance of their duties, for all expenses associated with the performance of their duties as members of the Statutory Audit Commission of VTB Bank, namely: accommodations, travel and other fees and charges for various types of transport.

The tender procedure was governed by Federal Law and was awarded the most points in the selection conditions for fulfilling the terms of the contract as the winner, as it offered the best qualifications of each bidder. The tender commission evaluated and compared the bids based on the following criteria:

- Contract price;
- The qualifications of each bidder.

The selection of an auditor was carried out by a tender procedure. Three auditors submitted tender bids: Ernst & Young, KPMG and Pricewaterhouse Coopers. The selection of an auditor was carried out by a tender commission consisting of competent Bank employees, as well as a representative of the Federal Agency for State Property Management. The tender commission evaluated and compared the bids based on the following criteria:

- Contract price;
- The qualifications of each bidder.

The tender commission reviewed the bids and selected Ernst & Young as the winner, as it offered the best conditions for fulfilling the terms of the contract and was awarded the most points in the selection procedure.

INCREASE IN THE NUMBER OF SHAREHOLDERS IN 2019
INVESTOR RELATIONS

Developing relations and supporting a constructive dialogue with shareholders and representatives of the investment community have traditionally been a high priority for VTB Group and extend beyond required corporate procedures. VTB has been recognised as one of the leaders in Russia in this area, which has allowed the Bank to maintain a consistently high national corporate governance rating of 7 ++.

VTB senior management and authorised units engage with investors on an ongoing basis. The Investor Relations Department is responsible for communications with institutional investors, and its Shareholder Relations Service is responsible for communications with individual shareholders.

In 2019, the Bank continued implementing its Plan (road map) to improve the perception of VTB among minority shareholders. The number of VTB shareholders increased by more than a third compared to the previous year and was about 160 thousand people as of December 2019.

IN 2019, THE KEY INVESTOR RELATIONS EVENTS WERE:

- The Annual General Meeting of Shareholders and an Extraordinary General Meeting of Shareholders;
- Corporate actions related to the acquisition, consolidation and merger of credit organisations with the Bank;
- Shareholder participation in the formation of a new Development Strategy for 2019–2022;
- Development of a programme of special offers and products for shareholders, the introduction of new products under special conditions;
- The development of the Bank’s electronic communication channels;
- The introduction of an e-voting system at General Meetings of Shareholders with the use of biometrics and new VR and NFC technologies;
- Expanded functionality of the VTB Shareholder mobile application, creating a seamless transition to the trading section (VTB My Investments).

An important area in which the system of relations with minority shareholders is being improved is the development of digital communication channels. Given that more and more young people are becoming shareholders, the demand for electronic forms of communication is constantly growing. For example, the VTB Shareholder mobile application is very popular.

Users of the application have access to recommendations from leading analysts in VTB Group, real-time information on stock prices, the ability to maintain records of their investment portfolio and to stay up to date on important news and events for shareholders. The application enables users to see all existing privileges for VTB Bank shareholders. In addition, clients can use the feature of filtering the available privileges. To do this, a user only needs to specify the number of shares they own. For all investors, a function was added that allows investors to connect to the trading system in the VTB My Investments application.

Starting in 2019, specially for large events, such as the General Meeting of Shareholders and Investor Days, a section has been available in the VTB Shareholder mobile application where users can find detailed programmes and information about participants, download interactive maps, ask questions and learn about special offers for VTB shareholders.

Through the mobile application, any shareholder, regardless of where they live or are currently located, has access to news about the activities of the Bank and VTB Group as a whole, and can take part in the management of the Bank by voting at general meetings, receive announcements about events for shareholders and investors and register to participate in them.

The VTB Shareholders Consultative Council now has Facebook and Twitter accounts for VTB shareholders. The number of followers of these accounts increased by 20 % during the year. Social networks make it possible to quickly convey important information to shareholders, to use a format that is convenient for a young audience, and to continue developing electronic communication channels. In addition, social networks make it possible to host a wide range of additional media materials, such as videos and interviews, photo reports and live broadcasts.

MEETINGS WITH SHAREHOLDERS AND INVESTORS

One of the key elements of the road map to improve the Bank’s image is meetings with shareholders and other interested parties (stakeholders).

Any person interested in the activities of VTB Group can take part in events, including current and potential shareholders, customers and employees of VTB Group, representatives of the media and investment companies, professional investors and students. In 2019, there was a marked increase in interest in events organised by VTB for its shareholders and stakeholders, which led to a significant increase in the number of participants.

In total, 62 events of various formats were held in 2019.

In particular, in 2019, the Bank prepared and held three Investor Days; eight Open Doors Days; 14 stock market seminars; a webinar of the AGM and a round table with large private investors.

All these events aroused a great deal of interest among the Bank’s current and potential shareholders. The programme was updated to meet participants’ information needs and expectations; speakers from the Moscow Exchange and the National Settlement Depository, analysts and stock market experts from Bank’s subsidiaries were invited, as were members of VTB Bank’s Supervisory Council and the Statutory Audit Commission.

There was a significant increase in the number of participants taking part in events for shareholders in 2019. In total, 2,844 people (up 27 % from 2018) took part in such events, not including those who took part in General Meetings, webcasts and events for other stakeholder groups. The biggest events in 2019 were the Investor Days in Moscow (19 October 2019) and St. Petersburg (7 December 2019). In total, 1,426 people attended these events. The Investor Day event in Moscow received 829 visitors, an all-time record.
The Shareholders Consultative Council (SCC) is an independent advisory body that represents the interests of minority shareholders of VTB Bank. All SCC members are minority shareholders. In Russian practice, such shareholder councils are very rare. At the same time, the Bank of Russia, as the regulator, notes that this practice is an effective way to increase the activity and involvement of shareholders. For eleven years, the SCC has been representing minority shareholders, protecting their interests and playing an active role in the development of VTB Group.

As part of a programme to improve the financial literacy of existing and potential individual shareholders and also to develop business cooperation between Bank branches and regional universities, VTB has been organising workshops for students majoring in finance and economics at leading Russian universities since 2013. In 2019, similar events were held in Irkutsk, Novosibirsk, Moscow, Tomsk, Rostov-on-Don and Nizhny Novgorod. The workshops were attended by more than 700 students, who together with experts studied how to form and keep a personal financial plan, trade on exchange, assess qualitative assets’ investment attractiveness. The workshops participants appreciated quality, programme and organisation of the events.

In addition, in 2019, the Bank held more than 300 meetings with institutional investors in Russia, Europe and the United States, while also participating in 18 international investment conferences. The number of investors who attended meetings with VTB Bank doubled compared to 2018. As part of the disclosure of the Group’s IFRS financial results, four online audio conferences and question and answer sessions were held for investors and analysts. In May 2019, as part of the announcement of VTB Group’s new Development Strategy for 2019–2022, a strategic session was held for analysts from leading international investment banks with the participation of VTB Group’s executives. Twenty-six analysts from major Russian and foreign brokerage companies attended the event.

At the AGM in 2019, shareholders once again elected representatives of the Shareholders Consultative Council to the Bank’s management and oversight bodies. Igor Repin Chairman of the Bank’s Shareholders Consultative Council was re-elected as a member of the Bank’s Supervisory Council. Vadim Sapozhkov was re-elected as a member of the Bank’s Statutory Audit Commission.

In 2019, five meetings of the SCC were held. During Council meetings, members of the SCC meet with representatives of the Bank’s top management who oversee various areas of activity. In 2019, meetings were held with the managers of the Finance Department, the Brokerage Services Department, the Strategy and Corporate Development Department, the Integrated Risk Management Department and the Human Resources Department. In addition, several members of the Bank’s Management Board and the Supervisory Council also took part in the meetings.

The Shareholders Consultative Council plays an increasingly important role in the work of the Group’s subsidiaries. In January 2019, for example, three members of the SCC became independent members of the Board of Directors of Vostrozhdenie Bank.

SCC members play an active role in communication with shareholders, including at the AGM, Investor Days, seminars and online through electronic channels. Information and suggestions received are reflected in the SCC’s proposals for VTB management. In 2019, SCC members presented at all key events for shareholders, including Investor Days in Moscow and St. Petersburg.
## DISCLOSURE POLICY

Information disclosure is one of the most important tools for the Bank’s interaction with shareholders, investors, customers and other interested parties, contributing to the formation of long-term, transparent and trust-based relationships with all stakeholders, while also improving the Bank’s investment case.

Throughout 2019, the Bank’s Supervisory Council monitored compliance on the part of the Bank and its employees with the requirements of the legislation of the Russian Federation on the securities market, on the protection of the rights and legitimate interests of investors in the securities market and on advertising; the regulations of the Bank of Russia concerning financial markets; and the requirements and standards of self-regulatory organisations of professional securities market participants that the Bank is a member of; as well as the Bank’s internal regulations, including the Regulation on the Information Policy approved by the Bank’s Supervisory Council on 1 December 2017 (minutes No. 18) (hereinafter, the “Information Policy”).

When disclosing information, VTB Bank is guided by the applicable legislation of the Russian Federation, the requirements of Moscow Exchange and the London Stock Exchange, the Regulation on the Bank’s Information Policy and its Corporate Governance Code, as well as other requirements and regulations.

## INFORMATION DISSEMINATED ABOUT THE BANK’S ACTIVITIES CAN BE DIVIDED INTO THREE GROUPS

1. Information that must be disclosed in the prescribed manner and by the means specified in regulatory documents and by regulatory authorities
2. Information disclosed by the Bank on a voluntary basis by any means chosen by the Bank
3. Publicly available information that is freely provided at the request of stakeholders for informational purposes

---

### 2019 SHAREHOLDERS CONSULTATIVE COUNCIL RESULTS

#### Shareholders’ rights

1. High evaluation of the Bank’s work with shareholders and SCC by the professional community
2. Monitoring of profit target execution
3. Development of proposals to the Bank’s dividend policy
4. Examination of global experience of interaction with shareholders

• 13 statements

Informational seminars, conferences, press conferences, meetings, forums and other meetings with persons concerned:

• 4 conference calls following the disclosure of IFRS statements
  (338 participants)
• 14 meetings with private shareholders (782 participants)
• 3 Investor Days for private shareholders (1,744 participants)
• 8 Open Doors Days (82 participants)
Sustainable Development

In the context of current global challenges the concept of sustainable development becomes even more important. All over the world new approaches of business to management resources, risks and all types of influence on economy, society and ecology are being formed. Corporate strategy is being actively formed in Russia; it combines goals on achieving economic efficiency, social equity and environmental safety.

VTB Bank, among other companies with best Russian business practices, established and extends effective practices in the field of corporate ecological and social responsibility, system charity and volunteering and other.

In 2019, VTB Bank’s Supervisory Council adopted a new Development Strategy for 2019–2020, including renewed mission, vision and values. After adoption of the new business strategy VTB Bank came close to a complex introduction of sustainable development elements in its activity.

Since 2008, VTB annually releases non-financial reports devoted to different aspects of corporate social responsibility. Selected indicators in the field of sustainable development, published in the social reports for 2012–2018, were independently audited.

In the Sustainability Report for 2018 VTB Group declared its commitment to the UN Formulated strategy to meet 17 Sustainable Development Goals (SDGs) – and the increase visual public awareness about sustainable development and its goals. Hereinafter UN SDGs’ icons are used.

82,250 employees work at VTB Group
59,602 employees work at VTB Bank

As of 31 December 2019, VTB Bank employed 59.6 thousand people (compared with 58.2 thousand as of 31 December 2018), while VTB Group employed 82.3 thousand people (compared with 77.2 thousand of 31 December 2018). The main drivers behind the increase in the Group’s headcount were the takeover of two new banks – Sarovbusinessbank and West Siberian Commercial Bank – and the increase in the number of IT staff at VTB Bank.

CORPORATE CULTURE

Achieving the ambitious goals of VTB Group’s new Development Strategy is largely dependent on developing a corporate culture aimed at increasing client-centricity, improving cross-functional interaction and holding individuals more accountable for achieving results. That is why the Group’s management considered it necessary to update VTB’s mission, vision and values.

In 2019, work continued on improving the remuneration system. In particular, the Bank implemented a project to develop and introduce a grade system, the main purpose of which is to make the remuneration system more competitive externally and more fair internally. The grade system will enable the Group to respond to market changes faster and in a more flexible manner in the course of its regular monitoring of the labour market and to take a more balanced approach to establishing competitive wages, while taking into account the Bank’s Financial position.

The top management of VTB Group played an active role in determining the priorities for the development of corporate culture. Employees were given an opportunity to express their opinions through a survey about VTB’s mission that was conducted in February 2019, which gathered the opinions of more than 17 thousand people. As a result of the survey, VTB Group developed and adopted an updated mission and vision and renewed values.

During the year, a large-scale information campaign was conducted for Group employees in various regions of the Russian Federation about the new Development Strategy and updated values. Considerable attention was also paid to strengthening and developing internal communication channels in 2019. For example, an updated intranet portal was launched, a survey was carried out on the engagement of personnel in Russia and abroad, which was conducted for the first time using a single methodology for all Group companies participating in the survey.

The Group employee engagement index was 83 %, which, according to the research methodology, indicates that employees understand the strategic goals, mission, vision and values of VTB Group, are ready to undertake additional efforts to achieve these goals and have the necessary resources to do so. The results of the survey also revealed strengths and areas for improvement, an analysis of which will provide a road map for suitable initiatives.

PERSONNEL ASSESSMENT AND STAFF RESERVE

According to the Bank’s performance management procedure, employees set, at the beginning of the year, individual goals for their activities and goals for the development of their behavioural competencies for the year. Then, at the end of the year, managers evaluate how well they have achieved their goals and the degree to which their behavioural competences have developed.

The performance management procedure helps employees, in a dialogue with their supervisors, identify priority areas for improving their performance and, in general, develop high-quality teams.

As of 31 December 2019, VTB Group employs 82.3 thousand people.

82,250 employees work at VTB Group
59,602 employees work at VTB Bank

As of 31 December 2019, VTB Bank employed 59.6 thousand people (compared with 58.2 thousand as of 31 December 2018), while VTB Group employed 82.3 thousand people (compared with 77.2 thousand of 31 December 2018). The main drivers behind the increase in the Group’s headcount were the takeover of two new banks – Sarovbusinessbank and West Siberian Commercial Bank – and the increase in the number of IT staff at VTB Bank.
In light of the merger of the Bank’s retail and corporate networks, work with the network’s staff reserve entered a new stage of development. A large-scale project was launched in the development of a staff reserve for managers for the integrated network.

TRAINING AND DEVELOPMENT

The priorities for the development of professional and behavioural competencies among the Bank’s employees in 2019 were determined by the objectives established by the Board of Directors of the VTB Group strategy building a culture of leadership and performance with a balance of team and individual success and meeting the highest standards in terms of service quality for external and internal clients. Training programmes for managers were aimed at improving managerial skills, developing client-centrivity and managing service quality. Work continued with international business schools and foreign professors. More than 200 managers took part in training programmes run by the INSEAD and IMD business schools.

A variety of formats were used to develop the functional skills of employees, from classical modular training programmes to professional coaching (for teams working on the flexible development of IT solutions), international internships to study best practices (corporate accelerator), the development of expert communities and short-duration development formats such as technology breakfasts, in which more than 5,000 employees and invited experts from other high-tech companies took part.

Within the framework of the special-purpose model for the development of Agile teams, the range of training courses and other training formats was considerably expanded.

The training of employees from popular specialties was carried out both in person and through digital content delivery channels, which made it possible for employees in all regions to develop behavioural competencies and to maintain and improve their professional skills. On average, more than 10 development events in various formats were carried out for each Bank employee in 2019.

WORK WITH YOUNG SPECIALISTS

In 2019, the second season of the Jazz and Professional Career for Russian students took place within the framework of Russia – Land of Opportunity platform. VTB Bank once again acted as the main organisating partner for the competition. As part of the project, winter schools were held in two fields: finance and credit and business informatics. The schools involved presentations by speakers that included top managers from the Bank and leading instructors from Higher School of Economics, as well as practical workshops, business games and business simulations. The winners of the competition were offered an opportunity to undertake an internship at the Bank.

Work with young specialists continued in the framework of the Bank’s Junior and Growth programmes. The Junior programme was launched in 2018 to include the Bank’s integrated regional network. All training and development programmes for young professionals include a variety of formats: face-to-face and distance courses, as well as training sessions.

In addition, internships for young IT specialists were offered for the first time in 2019: IT Junior and Java and JavaScript development schools.

RESPONSIBLE RESOURCE MANAGEMENT

One of VTB Group’s main priorities is taking a responsible approach to the consumption of natural resources, with considerable attention paid to improving systems for managing the Group’s own resource and power consumption.

In 2019, the Group continued to implement its Energy Conservation and Energy-Efficiency Programme. VTB Group companies adhere to a policy of renovating existing properties, which is aimed at, among other things, increasing the resource and energy efficiency of the facilities, complying with high environmental standards and minimising the negative impact on the environment.

As part of efforts to improve the resource and energy efficiency of VTB Group properties, numerous energy-saving technologies are being introduced everywhere, and utility systems are being replaced or upgraded, which is having an impact on resource consumption and energy efficiency. The resource- and energy-saving technologies used by VTB Group companies have a twofold impact by reducing harmful effects on the environment and the generation of hazardous waste.

In addition to the use of resource- and energy-saving technologies aimed at reducing environmental impact, VTB Group companies are constantly reducing their own fleet and freight traffic and are optimising routes for automobile traffic. In 2019, the number of vehicles operated by VTB Group’s parent company was reduced by 43 %, while the number used in the regional network was reduced by 45 %. In addition, a portion of VTB’s Euro 4–rated vehicles were replaced by Euro 5–rated vehicles.

The process of reducing office printing and the transition to paperless document management is still ongoing. Used batteries are constantly being collected, and paper waste is recycled. VTB Group employees also take part in voluntary environmental activities.

The following were VTB Bank’s main achievements in terms of resource management in 2019:

- Implementation of the energy-saving programme, including the following energy-saving steps taken during the year:
  - Conversion to LED lights;
  - Deployment of smart meters;
  - Replacement of all halogen lights with LED;
  - Conversion to LED lights;
  - Reduction of waste collection costs by selling electronic waste;
  - Collection and transfer of hazardous waste for processing/disposal;
  - Recycling of paper waste;
  - The volume of paper recycled increased by 5 % year-on-year.

Goals for the period till 2022 in terms of resource consumption and waste management:

- Conversion to LED lights;
- Introduction of an automated electricity metering system;
- Dispatching for engineering systems;
- Maximization of the volume of waste recycled.

1 Data on the resource consumption of the following VTB Group’s companies: VTB Bank, Holding VTB Capital, VTB Mortgage and Loan Bank, VTB Investment Bank, VTB Capital, VTB Development Bank, VTB European Development Bank, VTB Leasing, VTB Life Insurance, VTB Factoring, VTB Leasing, VTB Energy Development, VTB Private Bank, VTB Bank (Kazakhstan), VTB Bank (Kyrgyzstan), VTB Bank (Armenia), VTB Bank (Belarus), VTB Bank (Azerbaijan), VTB Bank (Georgia), VTB Bank (Uzbekistan), VTB Bank (Europe).
As part of its sponsorship and charitable activities, VTB continues to implement the following six large-scale target programmes:

- A Sporting Country;
- An Educated Country;
- Patriotism and a Country of Traditions;
- A Cultural Country;
- A Country for Business;
- A Healthy Country.

Financing these programmes enables the Bank to share its core values and social mission with society. The programmes are mixed in nature and include both sponsorship and charity projects.

During the reporting period, the Bank financed 562 projects, 50.3% of which were charity projects (RUB 8.2 billion). The Bank also contributed to the development of infrastructure for the supported sports and pays special attention to fulfilling strategic objectives in terms of the development of Russian sport to 2024.

In 2019, VTB implemented 32 major sports projects. The most notable of these were the Formula 1 VTB Russian Grand Prix, the VTB Kremlin Cup and the VTB United Basketball League. VTB also supported the Russian Volleyball Federation and the KAMAZ-master rally team.

**Patriotism and a Country of Traditions**

The main goals of this programme are to build a sense of patriotism and pride in the country. The programme includes unique projects aimed at reviving national and spiritual values and preserving historical heritage sites. The Bank provides support for public-interest foundations and provides charitable assistance to people in emergency situations and facing hardships in life.
In 2019, VTB Bank implemented 151 projects in this area: support was provided to 17 veterans’ foundations, as well as the Vaiula and New Jerusalem monasteries; the feature film Ley Yashin: The Dream GoalKeeper and the television series Godunov: The Continuation were produced with VTB’s support.

**A CULTURAL COUNTRY**

1,378 RUB million

Through this programme, the Bank supports projects related to Russian cultural institutions; national heritage sites (major museums, significant exhibitions); national-level creative unions, troupes and performers (theatres, tours, performances); as well as the primary channels for cultural dissemination (film production, television). Priority projects include those that contribute to the implementation of the strategic objectives for the development of the Russian Federation to 2024 in the framework of the Culture national project.

Some 77 cultural events took place in 2019 with VTB’s support, including notable exhibitions such as those dedicated to the 175th anniversary of the birth of Ilya Repin at the Tretyakov Gallery and the State Russian Museum, the premiere of the ballet ThePygmalion Effect at the Bolshoi Ballet Theatre and the premiere of the opera Monon Lecout at the Balshoi Theatre and many others.

**A COUNTRY FOR BUSINESS**

383 RUB million

VTB sponsors and organises business events at the national and international levels. The largest industry events related to technology and strategically important areas of VTB Bank’s activities are held with the support of Group companies. Support is provided for projects aimed at the development of state-of-the-art technologies in the banking and other sectors of the country’s economy, including those contributing to the fulfillment of the strategic objectives for the development of the Russian Federation to 2024 within the framework of the Digital Economy national project.

In order to develop the business community and strengthen its reputation in 2019, the Bank supported no fewer than 40 events, including nine major international forums (St. Petersburg International Economic Forum, World Economic Forum, Russian Internet Forum, Russia Calling forum, etc.) and industry conferences.

**AN EDUCATED COUNTRY**

3,800 RUB million

In accordance with the objectives of the Education and Science national projects, VTB Bank provides long-term financial support to leading universities in the country in order to ensure that their educational and scientific programmes are aligned with the current needs of society and the long-term objectives for the development of the Russian economy (including in the area of finance). This programme also includes projects to improve financial literacy, support for startups, identifying talented students through professional contests, grants and scholarship programmes.

In 2019, 142 projects received financial support, including the J Am Pro Professional Russian national competition, the Chonggeli Cup IT 2019, the What? Where? When? programme, and the Kidburg vocational centres for children.

**A HEALTHY COUNTRY**

551 RUB million

This programme provides funding in the framework of the Health and Environment national projects. Charitable support is provided to healthcare institutions and for projects related to the development of advanced medical technologies. For over a decade, VTB Bank has been operating its nationwide corporate charity programme A World Without Tears, which provides equipment for children’s hospitals. The Bank helps protect the country’s environment by supporting projects aimed at increasing the population of rare animal species in Russia’s ecosystems and by participating in the work of the Arctic Council.

In 2019, 77 projects were implemented, including support for 59 healthcare institutions and seven charitable foundations, as well as projects related to biodiversity conservation. Twenty-six events took place through the A World Without Tears programme: 4 in Moscow and 22 in regional cities.

**SPONSORSHIP AND CHARITY ACTIVITIES OF OTHER VTB GROUP COMPANIES**

VTB companies and subsidiaries conduct sponsorship activities on the basis of their own annual sponsorship plans. Group members make their own independent decisions on charitable activities in line with their forecast limit for the year and in accordance with a decision by their management or their own charity committees.

In addition to VTB Bank, the following members of VTB Group conducted regular activities related to social projects in 2019:

- VTB Bank (Kazakhstan)
- VTB Bank (Europe)
- Voronezhdenie Bank
- West Siberian Commercial Bank
- Sarovbusinessbank
- VTB Leasing
- VTB Capital Holding

Russian members of VTB Group spent a total of RUB 1,416 million, while members of VTB Bank spending outside the Russian Federation spent USD 1.3 million. In total, support was provided for 361 projects, including 149 sponsorship and 212 charitable projects.

VTB Bank subsidiaries support projects and programmes that are in line with the areas of social investments that VTB Bank has identified as corporate priorities.
Financial Statements

RESPONSIBILITY STATEMENT
VTB management is responsible for preparing VTB Bank’s Annual Report and consolidated financial statements in accordance with applicable laws.

SHARE CAPITAL

In 2019, the structure of VTB Bank’s share capital did not undergo significant changes. There was also no change in the amount of the Bank’s charter capital, remaining at RUB 651,033,883,623.38, which is divided into ordinary and preference shares.

In accordance with its Charter, the Bank has the right to issue a maximum number of 14,000,000,000 ordinary shares with a par value of RUB 0.01 each. The state registration number of ordinary shares is 20401000B. The record date for the state registration of the Bank’s issue of ordinary shares is 29 September 2006.

The state registration number of the Bank’s Type 1 preference shares is 20301000B. The record date for the state registration of the issue is 13 December 2016. All shares of this type are placed at the disposal of a sole purchaser, the Russian Federation, as represented by the Ministry of Finance of the Russian Federation.

The state registration number of the Bank’s Type 2 preference shares is 20401000B. The record date for the state registration of the issue is 13 December 2016. All shares of this type are placed at the disposal of a sole purchaser, the State Corporation Deposit Insurance Agency (hereinafter, the “Deposit Insurance Agency”).

VTB Bank’s ordinary shares trade on Moscow Exchange and on the London Stock Exchange in the form of global depository receipts (GDRs). Moscow Exchange has included VTB Bank’s shares in its Tier 1 list. One lot is 10,000 shares.

VTB Bank Type 1 and Type 2 preference shares are not traded on exchanges and do not offer a fixed dividend for the year. The amount of the dividend is subject to approval at the Annual General Meeting of Shareholders.

In addition, the Bank’s Charter provides for the possibility of paying out interim dividends.

The total number of shareholders of the Bank as of 31 December 2019 amounted to 160 thousand, including 159 thousand individuals. In 2019, the number of shareholders of the Bank increased by 31 %, or by 35 thousand individuals.

The Bank’s largest shareholders are the Federal Agency for State Property Management (12.13 % of the charter capital), as well as the Federal Agency for State Property Management (32.88 % of the charter capital), and the Ministry of Finance of the Russian Federation (47.22 % of the charter capital).

The Bank’s Charter also provides for the possibility of the payment of interim dividends for the first three, six and nine months of the reporting year to holders of issued preference shares.

The record date for persons entitled to a share of the Bank’s net profit in the form of dividend payments. Dividend payments are approved by the AGM, following recommendations made by the Supervisory Council. In determining the recommended dividend amount, the Supervisory Council is guided by the amount of the Bank’s net profit and by the Dividend Policy (approved by VTB Bank Supervisory Council, Minutes No 2 as of 29 January 2011).

The Bank’s Charter also provides for the possibility of the payment of interim dividends for the first three, six and nine months of the reporting year to holders of issued preference shares.

The record date for persons entitled to a share of the Bank’s net profit is determined at the General Meeting of Shareholders, but can be no earlier than 10 days before the date when the decision to pay dividends is due to be made, and no later than 20 days following such a decision. The time period for the payment of dividends depends on the type of registered shareholder.

Dividend payments to nominal shareholders and trustees listed on the shareholder register must be made within 20 working days, while dividend payments to other registered shareholders must be made within 25 working days of the date when the list of persons entitled to dividends is compiled.

DIVIDENDS

One of the main rights of shareholders is the right to receive a share of the Bank’s net profit in the form of dividend payments. Dividend payments are approved by the AGM, following recommendations made by the Supervisory Council. In determining the recommended dividend amount, the Supervisory Council is guided by the amount of the Bank’s net profit and by the Dividend Policy (approved by VTB Bank Supervisory Council, Minutes No 2 as of 29 January 2011).

The Bank’s Charter also provides for the possibility of the payment of interim dividends for the first three, six and nine months of the reporting year to holders of issued preference shares.

The record date for persons entitled to a share of the Bank’s net profit is determined at the General Meeting of Shareholders, but can be no earlier than 10 days before the date when the decision to pay dividends is due to be made, and no later than 20 days following such a decision. The time period for the payment of dividends depends on the type of registered shareholder.

Dividend payments to nominal shareholders and trustees listed on the shareholder register must be made within 20 working days, while dividend payments to other registered shareholders must be made within 25 working days of the date when the list of persons entitled to dividends is compiled.

Shareholders appearing on the register receive dividends by bank transfer to their accounts (if bank details are provided) or by postal order. Shareholders whose rights are registered via nominal shareholders receive dividends in monetary form in accordance with the procedure stipulated in Russian laws on securities. The applicable law does not provide for dividend payments in cash.

Any dividends accrued but unclaimed by shareholders within a period of three calendar years are subject to allocation back to the profit of the Bank. Therefore, if a shareholder does not claim his or her accrued dividends within three years, he or she loses the right to receive them. If dividends are transferred to a shareholder’s bank account, they are considered paid.

</tbody>
</table>

Funds were sent by bank transfer to the accounts provided to the registrar by registered shareholders and nominal shareholders. In cases where bank details were not provided to the registrar, dividends were sent by postal order.

DIVIDEND TAXATION

When calculating dividends for the year, a tax agent calculates and withholds tax from the amount of dividends accrued. Since 1 January 2014, when income is distributed in the form of dividends on shares issued by a Russian organisation, not only may the issuer of these shares be considered a tax agent, but, in cases stipulated by law, so may trustees, depositaries and so on. Taking into account that the income tax is calculated and withheld by a tax agent, mutual funds, foreign institutional investors and individual investors can apply for a tax exemption or a reduced tax rate on dividends received by submitting documents that demonstrate that they have the right to preferential tax treatment to the Bank’s registrar, VTB Registrar, or to the depositary where their shares are registered. In the case of share transfer to beneficial ownership, documents should be submitted to a trust manager.

The tax rate on dividends for both individuals and legal entities that are residents of the Russian Federation is 13 %, and it is 15 % for non-residents. This rate applies to the total dividend sum, which can be less than the total volume of payments based on the income received by VTB Bank as dividends from participating in other companies, as tax has already been paid on these amounts. If a double taxation agreement applies, tax payments are made in accordance with the rate specified in the agreement, taking into account Russian legislation.

At the Annual General Meeting of Shareholders on 5 June 2019, a decision was made on the payment of dividends based on 2018 results, and the record date for persons entitled to receive a dividend was set at 24 June 2019.

1 Taking into account interim dividends on Type 2 preference shares for 3M 2016 paid in December 2016.
2 In accordance with the decision of the Extraordinary General Meeting of Shareholders of VTB Bank on 8 December 2016, Type 1 and Type 2 preference shares were placed by converting preference shares and Type A registered preference shares.
**REPORT ON COMPLIANCE WITH THE PRINCIPLES AND RECOMMENDATIONS OF THE CORPORATE GOVERNANCE CODE**

Report on compliance with the principles and recommendations of the corporate governance code, which is an integral part of VTB Group’s annual report, will be reviewed by VTB Supervisory Council in the third quarter of 2020.

<td>1.1.6</td>
<td>The procedure established by the company for conducting General Meetings provides an equal opportunity to all individuals present at a meeting to express their opinions and ask questions.</td>
<td>No. 1. When conducting General Meetings of Shareholders during the reporting period in the form of a meeting (with the joint presence of shareholders), sufficient time was provided for reports on agenda items, as well as time to discuss those items. 2. Candidates for the company's management and oversight bodies were available to answer questions from shareholders at the meeting at which their nominations were put to a vote. 3. When making decisions related to the preparation and holding of General Meetings of Shareholders, the Board of Directors considered the use of telecommunications facilities to provide remote access to shareholders to participate in General Meetings during the reporting period.</td>
<td>Compliance</td>
<td></td>
</tr>
<tr>
<td>1.2 Shareholders are given equal and fair opportunities to participate in the profits of the company by receiving dividends.</td>
<td>1. The company has developed a dividend policy that has been approved by the Board of Directors and that has been disclosed. 2. If the company's Dividend Policy uses the company's reporting indicators to determine the amount of the dividend, then the relevant provisions of the Dividend Policy are taken into account by the Group's consolidated financial statements.</td>
<td>Compliance</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.2.2</td>
<td>The company does not take a decision on the payment of dividends if such a decision, while not formally in violation of legal restrictions, is unjustified from an economic point of view and could lead to the formation of misconceptions about the company's activities.</td>
<td>The company's Dividend Policy provides clear guidance on the financial/economic circumstances under which the company should not pay dividends.</td>
<td>Compliance</td>
<td></td>
</tr>
</tbody>
</table>

1.2.3 The company does not permit any diminution of the dividend rights of existing shareholders. During the reporting period, the company did not take any actions that led to the diminution of the dividend rights of existing shareholders.

1.2.4 The company is committed to preventing shareholders from using other means of earning a profit (income) at the company's expense beyond dividends and liquidation value. In order to prevent shareholders from using other means of earning a profit (income) at the company's expense beyond dividends and liquidation value, the company's bylaws have established monitoring mechanisms that ensure the timely discovery of, and a procedure for, the approval of transactions with persons affiliated (associated) with major shareholders (those with the right to make use of the votes stemming from voting shares) in cases where the law does not formally recognise such transactions as related-party transactions.

1.3 The corporate governance system and practices shall ensure equal terms and conditions for all shareholders owning shares of the same class (category), including minority and foreign shareholders, as well as their equal treatment by the company.

1.3.1 The company has created the conditions for the fair treatment of each shareholder by the company's management and oversight bodies, including conditions ensuring the inadmissibility of abuse by major shareholders in relation to minority shareholders. During the reporting period, the procedures for managing potential conflicts of interest involving major shareholders were effective, and conflicts between shareholders, if any, were given due attention by the Board of Directors.
### 1.3.2 The company does not undertake actions that lead or may lead to the artificial redistribution of corporate control.

- **Criteria for assessing compliance with the relevant principle of corporate governance:**
  - There were no quasi-treasury shares, or they did not vote during the reporting period.

- **Status of compliance with the principle of corporate governance:**
  - Compliance
  - Partial compliance
  - Non-compliance

- **Comments/explanation of deviation from compliance with the principle of corporate governance:**

### 1.4 Shareholders must be provided with reliable and effective ways to register their rights to their shares, as well as the possibility to dispose of their shares freely and easily.

#### 1.4.1 Shareholders

- **Criteria for assessing compliance with the relevant principle of corporate governance:**
  - The quality and reliability of the activities performed by the company's registrar to maintain the register of securities holders meet the needs of the company and its shareholders.

- **Status of compliance with the principle of corporate governance:**
  - Compliance
  - Partial compliance
  - Non-compliance

- **Comments/explanation of deviation from compliance with the principle of corporate governance:**

#### 2.1 The Board of Directors carries out strategic management within the company, defines the basic principles and approaches to organising a risk management and internal control system within the company, supervises the activity of executive bodies and also performs other key functions.

- **Criteria for assessing compliance with the relevant principle of corporate governance:**

  1. The Board of Directors has determined the company's strategy and business plans.
  2. The Board of Directors assessed the company's risk management and internal control system during the reporting period.
  3. The Board of Directors has approved the company's financial statements and updated the company's strategy, related to progress on implementation of the Board of Directors addressed issues during the reporting period.

- **Status of compliance with the principle of corporate governance:**
  - Compliance
  - Partial compliance
  - Non-compliance

- **Comments/explanation of deviation from compliance with the principle of corporate governance:**
## The Board of Directors

### The Board of Directors plays a key role in ensuring the transparency of the company, the timeliness and completeness of the company's disclosure of information, and shareholders' unhindered access to company documents.

1. The Board of Directors approved the Regulation on Information Policy.
2. The company has appointed responsible officials for implementation of its Information Policy.

### The Board of Directors oversees the corporate governance practices within the company and plays a key role in material corporate events.

During the reporting period, the Board of Directors considered the issue of the company's corporate governance practices.

### The Board of Directors is accountable to the company's shareholders.

The composition of the Board of Directors shall be balanced, including in terms of the qualifications of its members, their experience, knowledge and business qualities, and it shall enjoy the confidence of the shareholders.

<td>2.3.4</td>
<td>The quantitative composition of the Board of Directors makes it possible to organise the activities of the Board of Directors in the most efficient manner possible, including the possibility of the formation of the Board committees. It shall also provide the company’s significant minority shareholders with an opportunity to elect to the Board of Directors a candidate of their choice.</td>
<td>As part of the procedures for assessing the work of the Board of Directors carried out during the reporting period, the Board of Directors considered the issue of the compliance of the quantitative composition of the Board of Directors with the company’s requirements and the interests of shareholders.</td>
<td>Compliance</td>
<td>Non-compliance</td>
</tr>
</tbody>
</table>

#### 2.4 The Board of Directors includes a sufficient number of independent directors.

2.4.1 An independent director is a person who has sufficient professionalism, experience and independence to form their own positions, is able to formulate objective and honest opinions, is independent from the influence of the company’s executive bodies, individual groups of shareholders and other interested parties. It should be kept in mind that, under normal conditions, a candidate (elected member of the Board of Directors) who is associated with the company, its major shareholders, a significant counterparty or competitor or the state may not be considered independent. During the reporting period, all independent members of the Board of Directors met all the criteria for independence set out in recommendations 102–107 of the Code or were recognised as independent by a decision of the Board of Directors. | Compliance | Partial compliance | Non-compliance |

#### 2.4.2 An assessment of the compliance of candidates for the Board of Directors with the criteria for independence shall be carried out, along with a regular review of the compliance of independent members of the Board of Directors with the independence criteria. In conducting such an assessment, content should prevail over form.

1. During the reporting period, the Board of Directors (or its Nominating Committee) formed an opinion about each candidate’s independence and presented shareholders with their conclusions. 2. During the reporting period, the Board of Directors (or its Nominating Committee) reviewed, on at least one occasion, the independence of the current members of the Board of Directors who are indicated as independent directors in the company’s Annual Report. 3. The company has developed procedures for determining the necessary actions a Board member must take in the event that he or she ceases to be independent, including the obligation to inform the Board of Directors about this in a timely manner. | Compliance | Partial compliance | Non-compliance |

#### 2.4.3 Independent directors account for at least one third of all directors elected to the Board.

Independent directors account for at least one third of all directors elected to the Board. | Compliance | Partial compliance | Non-compliance |

Of the 11 members of the Bank’s Supervisory Council, three are independent, which is less than one third of the composition of the Supervisory Council recommended in this paragraph. At the same time, the Bank elected a new Supervisory Council at the Bank’s AGM in 2019, which includes five directors with no relation to the principal shareholder, including four representatives of minority shareholders. According to the Bank, the current composition of the Bank’s Supervisory Council is balanced, representing the interests of a wide range of shareholders, and it is as independent as possible in its activities.
### 2.4.4 Independent directors play a key role in the prevention of internal conflicts within the company and in the company’s performance of material corporate actions.

Independent directors (who have no conflict of interest) provide a preliminary assessment of material corporate actions related to possible conflicts of interest, and the results of that assessment are presented to the Board of Directors.

#### 2.5 The Chairman of the Board of Directors shall facilitate the most effective performance of the functions assigned to the Board.

**2.5.1 The Chairman of the Board of Directors**

The Chairman of the Board of Directors is an independent director, or the elected independent directors select a senior independent director who coordinates the work of the independent directors and is responsible for communication with the Chairman of the Board of Directors.

The effectiveness of the work of the Chairman of the Board of Directors is evaluated in the framework of the performance evaluation procedures for the Board of Directors during the reporting period.

#### 2.6 Board members act in good faith and reasonably in the interests of the company and its shareholders on the basis of sufficient information, with due care and diligence.

**2.6.1 Board members take decisions based on all available information, without any conflicts of interest, taking into account the equal treatment of the company’s shareholders, within the framework of normal business risk.**

1. According to the company’s bylaws, a member of the Board of Directors must notify the Board of Directors if he or she has a conflict of interest in respect of any item on the agenda of a meeting of the board or of a board committee prior to the discussion of the relevant agenda item.

2. The company’s bylaws provide that a Board member must abstain from voting on any matter in which he or she has a conflict of interest.

3. The company has established a procedure that allows the Board of Directors to receive professional advice on matters within its remit at the company’s expense.

**2.6.2 The rights and obligations of members of the Board of Directors are clearly enshrined in the company’s bylaws.**

The company has adopted and published a bylaw that clearly stipulates the rights and responsibilities of members of the Board of Directors.

**2.6.3 Board members have sufficient time to perform their duties.**

1. Individual attendance at Board and committee meetings, as well as the time devoted to preparation for participation in such meetings, was taken into account as part of the Board of Directors assessment procedures during the reporting period.

2. In accordance with the company’s bylaws, members of the Board of Directors are required to notify the Board of their intention to be a part of the management bodies of other organisations (beyond those that are the company’s subsidiaries or dependent organisations), as well as the fact of such appointments.

The current members of the Committee are independent, and the other is a non-executive director. The current members of the Committee are selected based on the individual experience and competence of each member. In addition, the Bank complies with the requirements on corporate governance of the Moscow Exchange Listing Rules, including the requirements for the composition of the Supervisory Council committees.

At the same time, the Bank considered the practice of forming a committee from independent directors only to be inept in itself primarily because of the risk that the Committee would include members of the Supervisory Council without the necessary competence in this field. Bearing in mind that the decisions at Committee meetings are adopted by a simple majority, and the majority of the members of the Committee are independent, the Bank has minimised the risk of biased decisions.

At the same time, however, the Bank, in collaboration with its principal shareholder (the Federal Agency for State Property Management), plans to explore, prior to the Bank’s next AGM, in 2020, the issue of including as candidates for positions on the Supervisory Council more independent directors with the requisite experience to serve on the Committee.

### 2.8.3 For preliminary consideration of issues related to the implementation of staff planning (succession planning) and the professional composition and performance of the Board of Directors, a Nominating Committee (appointments, human resources) was established, most of whose members are independent directors.

3.1 The company’s Corporate Secretary is responsible for efficient ongoing interaction with its shareholders, coordination of the company’s actions designed to protect the rights and interests of its shareholders and support for the efficient work of its Board of Directors.

3.1.1 The Corporate Secretary has sufficient knowledge, experience and expertise for the execution of his or her duties. This official enjoys an impeccable reputation and the confidence of shareholders.

1. The company has adopted and disclosed a bylaw called the Regulation on the Corporate Secretary. 2. The company’s website and Annual Report provide biographical information about the Corporate Secretary. The same level of detail is provided about the members of the company’s Board of Directors and executive management.

3.1.2 The Corporate Secretary is sufficiently independent of the company’s executive bodies, and has been given the necessary authority and resources to carry out his assigned tasks.

The Board of Directors approves the appointment and dismissal of the Corporate Secretary, as well as decisions to award additional remuneration to the Corporate Secretary.

4.1 The level of remuneration paid by the company is sufficient to enable it to recruit, motivate and retain employees who have the required skills and qualifications. Remuneration is paid to Board members, executive bodies and other key managers at the company in accordance with the remuneration policy adopted by the company.

4.1.1 The level of remuneration provided by the company to members of the Board of Directors, executive bodies and other key executives creates sufficient motivation for them to work effectively, allowing the company to recruit and retain competent and skilled professionals. This allows the company to avoid having to pay a level of remuneration that is more than necessary, and it prevents the formation of unjustifiably large gaps in the level of remuneration between these officials and company employees.

The company has adopted a bylaw or bylaws (policy/policies) regulating the remuneration for members of the Board of Directors, executive bodies and other key executives, which clearly stipulate approaches to the remuneration of these individuals.

### 4.1.2 The company’s Remuneration Policy

The company’s Remuneration policy is determined by the Remuneration Committee and approved by the Board of Directors. The Board of Directors, with the support of the Remuneration Committee, monitors the introduction and implementation of the company’s Remuneration Policy, and, if necessary, it reviews and makes adjustments to it.

#### Remuneration Policy

- **Annual Remuneration**: Fixed annual remuneration was the only form of monetary remuneration that Board members received for their work on the Board during the reporting period.
- **Long-term incentive programmes**: The company does not provide any additional payments or compensation in the event of the early termination of members of the Board of Directors.
- **Transparency**: The Remuneration Committee reviewed and approved the Remuneration Policy (Policies) containing (contain) transparent mechanisms for determining the remuneration of members of the Board of Directors, executive bodies and other key executives at the company. It also regulates all types of payments, benefits and privileges provided to such individuals.

4.3 The system of remuneration due to members of the executive bodies and other key company executives provides that their remuneration is dependent on the company’s performance results and their personal contributions to achieving these.

4.3.1 Remuneration for members of executive bodies and other key executives at the company shall be determined in such a way as to provide a reasonable and justified ratio between their base salary and variable remuneration depending on the company’s results and the personal (individual) contribution of each employee to the final result.

1. During the reporting period, the annual performance indicators approved by the Board of Directors were used to determine the amount of variable compensation for members of executive bodies and other key executives at the company.

2. In the course of the last evaluation of the system of remuneration for members of executive bodies and other key executives at the company, the Board of Directors (the Remuneration Committee) confirmed that the Company employed an effective ratio of base salary to variable compensation.

3. The company has established a procedure that provides for the return of bonuses that were unlawfully obtained by members of the executive bodies and other key executives at the company.

4.3.2 The company has established a long-term incentive programme for members of the executive bodies and other key company executives using the company’s shares (options or other derivative instruments whose underlying asset is company shares).

1. The company has established a long-term incentive programme for members of the executive bodies and other key company executives using the company’s shares (financial instruments based on company shares).

2. The long-term incentive programme for members of executive bodies and other key company executives provides that the right to sell shares and other financial instruments that are granted within the programme shall not be granted less than three years from the date that such shares or instruments are awarded. The right to sell shares shall be conditional upon the company’s achievement of certain performance indicators.

5.1 The company has established an efficient risk management and internal control system that is designed to provide reasonable assurance that the company’s goals will be achieved.

5.1.1 The Board of Directors determines the principles and approaches used to shape the company’s risk management and internal control system.

The functions that the company’s various control bodies and divisions play in the risk management and internal control system are clearly stipulated in the company’s bylaws/relevant policies that were approved by the Board of Directors.

5.1.2 The company’s executive bodies shall ensure the establishment and maintenance of an effective system of risk management and internal control at the company.

The company’s executive bodies have ensured the distribution of functions and responsibilities for risk management and internal control between their subordinate units and department heads.

5.1.3 The company’s risk management and internal control system provides for an objective, fair and clear picture of the company’s current state and prospects, the integrity and transparency of the company’s reporting, and the reasonableness and acceptability of the risks taken by the company.

1. The company has approved a policy on preventing corruption.

2. The company provides an accessible means of notifying the Board of Directors or the Board’s Audit Committee about violations of the law, internal procedures and the company’s code of ethics.
5.1.4 The Board of Directors takes necessary measures to ensure that the company’s current risk management and internal control system complies with the principles and approaches determined by the Board of Directors to ensure that such a system is organised and functions effectively.

5.2 The company organises an internal audit to ensure the regular independent evaluation of the reliability and effectiveness of the risk management and internal control system and corporate governance practice.

5.2.1 The company has created a separate structural unit or contracted an independent external organisation to conduct the internal audit. The functional and administrative reporting relationship of the internal audit unit has been established. Functionally, the internal audit unit is subordinate to the Board of Directors.

5.2.2 The internal audit unit evaluates the effectiveness of the internal control system and assesses the effectiveness of the risk management and corporate governance systems. The company employs generally accepted standards in the field of internal auditing.

6.1 The company and its activities are transparent to shareholders, investors and other interested parties.

6.1.1 The company has developed and implemented an information policy that ensures effective communication of information between the company, shareholders, investors and other interested parties.

6.1.2 The company discloses information on its corporate governance system and practices, including detailed information on compliance with the principles and recommendations of the Code.

6.2 The company discloses complete, up-to-date and reliable information about the company to allow its shareholders and investors to make informed decisions.
6.2.2 The company avoids taking a formal approach to the disclosure of information, and it discloses important information about its activities even when such disclosure is not required by law.

6.2.3 The Annual Report, which is one of the most important tools for sharing information with shareholders and other interested parties, contains information that makes it possible to assess the company’s activities for the year.

6.3 The company provides information and documents requested by its shareholders in accordance with the principle of equal and unhindered access.

6.3.1 The company provides information and documents requested by its shareholders in accordance with the principle of equal and unhindered access.

6.3.2 When the company provides information to shareholders, it ensures a reasonable balance between the interests of specific shareholders and the interests of the company itself in ensuring the confidentiality of important trade secrets that could have a material impact on its competitiveness.

7.1 Any actions that will or may materially affect the company’s share capital structure and its financial position and, accordingly, the position of its shareholders (“material corporate actions”) shall be taken on fair terms and conditions ensuring that the rights and interests of the shareholders as well as other interested parties are observed.

7.1.1 Material corporate actions include the reorganisation of the company, the acquisition of 30 per cent or more of voting shares (takeover), material transactions by the company, an increase or decrease in the company’s share capital, the listing and delisting of company shares, as well as other actions that could lead to a significant change in the rights of shareholders or a violation of their interests. The company’s Charter includes a list of (criteria for) transactions or other actions falling within the category of material corporate actions. These actions fall within the remit of the company’s Board of Directors.

7.1.2 The Board of Directors plays a key role in making decisions on developing recommendations about material corporate actions. The Board of Directors relies on the position of the company’s independent directors. The company has stipulated a procedure under which the independent directors declare their positions on material corporate actions prior to their approval.

### 7.2 The company has established a procedure regulating material corporate actions that allows shareholders to receive timely and complete information on such actions, provides them with an opportunity to influence decision-making about such actions and ensures compliance with, and an adequate level of protection of, their rights in the performance of such actions.

#### 7.2.1 Information about material corporate actions

- During the reporting period, the company disclosed information on its material corporate actions in a timely manner and in detail, including the reasons for, and timing of, such actions.

#### 7.2.2 The rules and procedures governing material corporate actions taken by the company are stipulated in the company's bylaws.

- The company's bylaws establish a procedure for retaining an independent appraiser to determine the value of property that is alienated or acquired by a material transaction or a related-party transaction.
- The company's bylaws establish a procedure for retaining an independent appraiser to assess the value of shares that are acquired or bought back by the company.
- The company's bylaws establish an expanded list of grounds on which the members of the Board of Directors and other persons referred to in respective laws are deemed to have an interest in the company's transactions.

---

\(^1\) “Compliance” is indicated only if the company meets all the criteria for assessing compliance with the respective principle of corporate governance. Otherwise, the status of “partial compliance” or “Non-compliance” is indicated.

\(^2\) A status is assigned for each criterion that is used to assess compliance with corporate governance principles in the event that the company meets only part of the criteria or does not meet any of the criteria for assessing compliance with the principle. If the company indicates “compliance”, then no further explanation is required.

\(^3\) Specify which of the two alternative approaches permitted by the principle has been implemented within the company and explain why this approach was chosen.

\(^4\) In case the tasks of the Nominating Committee are performed by another committee, then name that committee here.

\(^5\) Provide a list of additional committees that have been created.
